Transversality is the keyword that permeates the spirit of these thirteen essays spanning almost half a century, from 1965 to 2009. The essays are exploratory and experimental in nature and are meant to be a transversal linkage between phenomenology and East Asian philosophy. Transversality is the concept that dispels all ethnocentrisms, including Eurocentrism. In the globalizing world of multiculturalism, Eurocentric universalism falls far short of being universal but simply parochial at the expense of the non-Western world. Transversality is intercultural, interspecific, interdisciplinary, and intersensorial. Transversal Rationality and Intercultural Texts means to transform the very way of philosophizing itself by infusing or hybridizing multiple traditions in the history of the world. Like no other scholar, Jung bridges the gap between Asian and Western cultures. By engaging Western philosophers as diverse as Bacon, Descartes, Heidegger, Hegel, Merleau-Ponty, Derrida, Glissant, Barthes, Fenollosa, McLuhan, and Eastern philosophers such as Wang Yang-ming, Nishida Kitaro, Nishitani Keiji, Watsuji Tetsuro, Nhat Hanh, and Suzuki Daisetz Teitaro, this book marks an unparalleled contribution to comparative philosophy and the study of philosophy itself.

Expecting to become a supervillain on his 16th birthday, Damien Locke, son of one of Golden City's most notorious supervillains, is horrified to discover that he may instead be destined to become a superhero.

Offers a personal account of a soldier who was held for eighteen months in Stalag 17 b after his bomber was shot down over the Dutch coast and the diverse experiences he had while there that helped him keep psychologically strong enough to survive the harrowing ordeal.

Unbinding the Binding of Isaac is an anthology of three faiths' interpretations of the Genesis 22:1-19 story. The various exegeses of this story have been mined by the Jewish, Islamic, and Christian faiths for a protracted period of time. The "Aqedah," as the binding story is known universally, stimulates the interests and imaginations of theologians, linguists, poets, historians, and artists of various skills and stripes. The Aqedah continues to stimulate inquiry and application to modern situations. Unbinding the Binding of Isaac is at once ancient and modern in its scope, purpose, and relevance to scholarly inquiry regarding this ongoing debate.

Cine-scapes explores the relationship between urban space, architecture and the moving image. While an impressive amount of research has been done with regards to the way in which architecture is portrayed in film, this book offers a

new perspective.... What happens if we begin to see the city as a place for an embodied visual consumption; a visual apparatus or, perhaps, a system that is based on movement, light and the body, and which we can explore in kinematic, kinetic, and kinaesthetic ways? Using film as a lens through which we look at urban spaces and places, Richard Koeck reveals the filmic and cinematic phenomena and spatial qualities that are present in postmodern landscapes, and which are perhaps otherwise disregarded or merely passively consumed. Drawing on the author's extensive knowledge derived from architectural and film practice, *Cine-scapes*: offers insight into architecture and urban debates through the eyes of a practitioner working in the fields of film and architectural design emphasizes how filmic/cinematic tendencies take place or find their way into urban practices can be used as a tool for educators, students and practitioners in architecture and urban design to communicate and discuss design issues with regard to contemporary architecture and cities *Cine-scapes* ignites new ways of seeing, thinking and debating the nature of architecture and urban spaces. Ernie Lepore and Barry Loewer present a series of papers on three key ideas of contemporary philosophy: that a theory of meaning for a language is best understood as a theory of truth for that language; that thought and language are best understood together via a theory of interpretation; and that the mental is

irreducible to the physical.

A collection of over 200 recipes from the familiar to the exotic including sorbets, gelatos, parfaits, spooms and ice-creams. Classic French, Italian and American ices are represented as well as those from Asia and the Middle East. The recipes cater for both adult and children's tastes. All are suitable for making with or without an ice-cream making machine.

Piratical attacks have become more frequent, violent, costly and increasingly threaten to undermine order in the international system. Much attention has focused on Somalia, but piracy is a problem worldwide. Recent coordination efforts among states in South East Asia appear to have helped in the area, but elsewhere piracy has expanded. Interestingly, international law has long recognized piracy as a crime and provided tools for universal suppression, yet piracy persists. In this book, a handpicked group of leading experts in the field of International Relations use maritime piracy as a means to expose the incongruities in our understanding of global governance. Using broadly constructivist approaches to understand international actors' responses to the challenges created by maritime piracy, the contributors question a number of myths and misconceptions around piracy and analyze the various ways that international law and organizations channel actors' understandings of maritime

piracy and their efforts to respond to it. In doing so, they expose some shaky foundations for IR theorists: how do we conceive of governance and legitimacy when they are delinked from the territorial aspect of the modern nation-state? What happens to prospects for cooperation when we get to the nitty-gritty questions of practice related to paying for trials, imprisoning and maintaining captured pirates, bearing the burden of policing sea-lanes, or even determining what constitutes a pirate? Does anyone have a monopoly on the legitimate use of force at sea, and how is that legitimacy constructed? *Maritime Piracy and the Construction of Global Governance* offers an improved theoretical understanding of the response of the international community to maritime piracy and broadens our understanding of the complex and sometimes countervailing motivations of all the actors involved, from international organizations and states down to the pirates themselves.

A nature book unlike any other, Jordan Fisher Smith's startling account of fourteen years as a park ranger thoroughly dispels our idealized visions of life in the great outdoors. Instead of scout troops and placid birdwatchers, Smith's beat -- a stretch of land that has been officially condemned to be flooded -- brings him into contact with drug users tweaked out to the point of violence, obsessed miners, and other dangerous creatures. In unflinchingly honest prose, he reveals the unexpectedly dark underbelly of patrolling and protecting public lands.

broke across network and cable news programs. After a high-speed chase to the top of Leo Frigo Memorial Bridge in Green Bay, Wisconsin, a young woman stopped, stepped out of her car, walked to the edge of the bridge--and jumped. State trooper Les Boldt raced over, thrust out his hand, and in a miracle of timing and determination, snagged the woman's wrist as she started the plunge. Other officers ran to his aid, and they pulled the woman to safety while the on-dash police cam captured the action. That woman on the edge was Tina Zahn, and in *Why I Jumped* she tells her story. In this gripping book, now available in paperback, Zahn gives readers a look at what led to such severe depression that suicide seemed the only answer. Readers won't be able to put down this powerful true story of crippling depression, dramatic rescue, and a return to hope.

This is a powerful novel that captures the varying emotions of two mothers, Mary (mother of Jesus) and Elizabeth (mother of John the Baptist) and the friendship that develops between them.

She needed a hero; instead, she got Cade. Cade was no hero. He was a nomad, a wanderer with no ties and he liked it that way. Hired out to save Fat Louise and her spoiled sister from a cartel run Mexican city was a risk he was willing to take, for the right price. With a certain gray eyed woman on his mind, he set's out to find her, fuck her and forget her. No harm, no foul. But it's all easier said than done when it comes to this plain Jane. He expected a biker bitch who knew the rules; instead, he got Fat Louise. Fat Louise wasn't about to put her crew in danger. She had to learn to handle problems on her own, even if they included a six-foot biker she was forced to rely on, if she was going to rescue her sister. She never expected to see Cade again after she'd left Mexico, but all it takes is one night with him to prove that even a bitch's heart

can be broken.

work in his second career as a sociologist. The essays deal with a diverse range of topics including technology and culture, religion and personal identity, the intellectual and society, and the validity of the concept of class.

This book focuses on the impact and design of international environmental regimes, which are established to preserve natural resources and reduce environmental degradation. The author addresses such regimes from both a conceptual and theoretical point of view as well as using comparative empirical evidence from issue areas such as marine pollution, acid rain, ozone layer depletion and global climate change. This book will be welcomed by students and scholars interested in environmental political economy and institutions, and by policy makers and practitioners involved in the negotiation process.

Intended for upper-level undergraduate and graduate courses in chemistry, physics, mathematics and engineering, this text is also suitable as a reference for advanced students in the physical sciences. Detailed problems and worked examples are included.

This work fills a gap in recent studies on the history of race and science. Focusing on both the classification systems of human variety and the development of science as the arbiter of truth, Brown looks at the rise of the emerging sciences of life and society – biology and sociology – as well as the debate surrounding slavery and abolition.

COGNOS is a database system of 400.000 chemical reaction types covering the literature period 1975-1991. COGNOS runs on a Macintosh computer and uses InfoChem-ChemReact reaction types.

Rick Moody's novels have earned him a reputation as a "breathtaking" writer (The New York

Times) and "a writer of immense gifts" (The San Francisco Examiner). His remarkable short stories have led both the New Yorker and Harpers to single him out as one of the most original and admired voices in a generation. These stories are abundant proof of Rick Moody's grace as a stylist and a shaper of interior lives. He writes with equal force about the blithe energies of youth ("Boys") and the rueful onset of middle age ("Hawaiian Night"), about Midwestern optimists ("Double Zero") and West coast strategists ("Baggage Carousel"), about visionary exhilaration ("Forecast from the Retail Desk") and delusional catharsis ("Surplus Value Books: Catalog Number 13.") The astounding title story, which has already been reprinted in four different anthologies, is a masterpiece of remembrance and thwarted love. Full of deep feeling and stunningly beautiful language, the stories in Demonology offer the deepest pleasures that fiction can afford.

This official NASA history document provides enlightening tales about the Apollo lunar landing program by those who were there: astronauts (Duke and Schmitt), managers and scientists (von Braun, Webb, Paine, Gilruth, Mueller, Low, Faget, Rogers, Guin), and a protocol assistant who accompanied the Apollo 11 on their whirlwind presidential goodwill mission (Barnes). From the foreword by Christopher Kraft: For a project as massive as the Apollo program, history may distance itself to the extent where modern interpretation distills a feeling that such events took place without extensive human involvement. Nothing could be further removed from the truth. Through the verbal accounts offered by the oral histories such as presented in this volume, we are reintroduced to the critical human factor which is the essence of any history. People made Apollo happen and it is important to preserve their thoughts, feelings, and recollections for future generations. The oral histories presented in this volume offer a sample of what NASA has done to preserve the story of Apollo as part of our nation's human

spaceflight heritage. The accounts included in this book are a small sampling of the large number of oral histories that have been conducted under the auspices of the NASA history program, since near the beginning of the Agency. They also represent the many personal contributions made during Project Apollo, the single largest peacetime endeavor in American history. These recollections span the origins, management, and completion of that enormous effort and measurably enhance our appreciation of its difficulty. I am pleased that the comments of some of the key individuals involved in Project Apollo are being preserved by NASA and made available through this book. The people who are quoted in this book were among the top leaders of NASA. All of them played a prominent part in the conduct and accomplishments of Apollo. As one of those who knew and watched these individuals lead, I have a particular sense of their statements. I always had the feeling of having been granted a special privilege to participate and work on the Mercury, Gemini, and Apollo programs. The contents of this book reveal that these people had similar experiences. They all recognized that it took literally thousands of dedicated people to bring these efforts to fruition and that it was up to them to provide the necessary leadership to allow all of the workers on the project to accomplish their tasks. It was a wondrous thing to watch. Anyone interested in the underlying strength of NASA in this time period

will find these accounts a fascinating read.

Jedediah Troyer just wants to start a farm and homestead on some affordable land in an Amish community, but... what if the only good, cheap, available land is on another planet? In this intellectual history-making volume, multiple award-winning W. E. B. Du Bois scholar Reiland Rabaka offers the first book-length treatment of Du Bois's seminal sociological discourse: from Du Bois as inventor of the sociology of race to Du Bois as the first sociologist of American religion; from Du Bois as a pioneer of urban and rural sociology to Du Bois as innovator of the sociology of gender and inaugurator of intersectional sociology; and, finally, from Du Bois as groundbreaking sociologist of education and critical criminologist to Du Bois as dialectical critic of the disciplinary decadence of sociology and the American academy. *Against Epistemic Apartheid* brings new and intensive archival research into critical dialogue with the watershed work of classical and contemporary, male and female, black and white, national and international sociologists and critical social theorists' Du Bois studies. *Against Epistemic Apartheid* offers an accessible introduction to Du Bois's major contributions to

sociology and, therefore, will be of interest to scholars and students not only in sociology, but also African American studies, American studies, cultural studies, critical race studies, gender studies, and postcolonial studies, as well as scholars and students in 'traditional' disciplines such as history, philosophy, political science, economics, education, and religion.

Environmental professionals who look beyond their specialties and acquire knowledge in a variety of sciences not only make solving on-the-job problems easier for themselves, but they also increase their employment opportunities. This fifth book in the 'non-specialist' series provides both professionals and students with a clear, concise overview of the most important aspects of physics in a way that anyone, even those who have never taken a formal physics course, can relate to. Starting with the basic principles of measurement, conversion factors, and math operations, the author explores the topics of motion and force, work and energy, gravity, atoms, heat, sound, light and color, and basic electricity. Each chapter examines the jargon, concepts, key concerns, and applications of physics in action and ends with a chapter review test.

Forts and Forays is a rare account of frontier soldiering in the pre-Civil War Southwest by an enlisted man. James A. Bennett joined the regular army in 1849 and was stationed in New Mexico for six years before he deserted to Mexico. Assigned to the First Dragoons, he visited most major New Mexico posts such as Forts Union, Craig, and Fillmore. His company was stationed at or passed through Taos, Santa Fe, Albuquerque, Socorro, and other New Mexico settlements. In six years, his rank climbed from private to sergeant before an unknown infraction reduced him to the ranks. Bennett served under future Civil War generals Edwin V. Sumner, Richard S. Ewell, and John W. Davidson. During his service, Bennett waged war on the Kicarilla, Mogollon, Mescalero, and Mimbres Apaches, the Navajos, and the Utes, suffering serious wounds at the Battle of Cienguilla Forts and Forays is a unique glimpse into the routine duties and terrifying ordeals of soldiering in the antebellum Southwest. Offers professional caregivers and teachers strategies for building relationship-based early childhood education programs in order to promote the emotional, physical, and cognitive health of young children.
