Build and modify your 1973-1987 GMC or Chevrolet truck in your garage with step-by-step processes to boost power, add curb appeal, and improve stopping ability, handling, safety, and more. GM's square-body trucks are a solid, simple, and easy-to-find rig--and that makes them perfect for modification. They're American classics, and they've become the hot rods of a new generation. Veteran magazine editor Jim Pickering brings these trucks into focus, taking you through the aspects that make them so popular and modifications you can perform to put a modern spin on their classic looks. He takes an in-depth look at all the major systems in your C10 and covers what can be done to them to turn your classic hauler into the modern hot rod that you want: a truck that's fast, safe, full of curb appeal, and reliable enough to drive whenever and wherever you want. Built in massive numbers during an 18-year production run, these trucks aren't hard to source, but finding a good starting point and mapping out your plan are important. This book covers a lot of territory: how to find a good starter truck, LS power builds and installs, slammed air suspension and coilover systems, automatic and manual transmission choices (including a 6-speed manual conversion), cooling system upgrades, safely adding a modern alternator to factory GM wiring, modifying a mechanical clutch pedal to use a hydraulic master and slave cylinder, making new fuel lines and brake lines to support fuel injection and big brakes, installing a 4-link rear suspension system, fabricating an under-bed mount to hide air suspension components, building exhaust, adding LED lighting, interior restoration, and more. If you're building a square-body truck that you'd actually like to drive regularly, you've come to the right place. There hasn't ever been a more comprehensive, authoritative look at building a complete truck for street use that includes all the steps required to make it work.

A superb color history on Chevrolet's pickup trucks from 1918-1984. This in-depth history traces the trends in truck styling and focuses on the popular 1950s and 60s period.

As the 1950s dawned, General Motors focused its industrial might on producing revolutionary rather than evolutionary cars with the ultimate goal to become the clear market leader in the automotive industry. To accomplish this goal, the company designed, developed, and consistently released innovative automotive technology. During the decade, Chevrolet introduced the small-block V-8, automatic transmission, air-conditioning, power steering, and many other innovations that made the cars faster, more comfortable, and safer. All of the pieces had fallen into place. General

Motors had astute leadership, a brilliant engineering team, forward-thinking stylists, a massive manufacturing infrastructure, and the capability to produce cutting-edge technology. With unbridled optimism and exuberance to meet the demands of the booming U.S. economy of the 1950s, the company designed, developed, and delivered an unprecedented number of breakthrough technologies, and established the blueprint for the modern automobile.

Automotive historian and veteran author David Temple goes behind the scenes to reveal how these technologies were designed, manufactured, and installed on Chevrolet's fine portfolio of cars: the Corvette, 1955-1957 Bel Air, Nomad, Impala, and many more. Inside General Motors, many dedicated and talented leaders who were determined to make Chevrolet cars the best on the market. Vice President of Styling Harley Earl and his team designed the 1952 Corvette concept car for the Motorama show. After receiving numerous accolades, it was rushed into production. Design chief Bill Mitchell used his design acumen and creative vision as he led his team to style the 1955-1957 Bel-Air. Zora Arkus-Duntov worked tirelessly and transformed the Corvette from a touring car into a genuine sports car. Ed Cole and his engineers overcame many challenges to develop the compact, efficient, and powerful Chevy small-block V-8, which continued in production for decades. Chevrolets of the 1950s retraces the design, development, and production of these cars, but it also covers innovative vital components that were installed in them. If you have been looking for the inside story on GM's arguably greatest decade, the models, and the technology it produced, you have found it.

The beginning of this book is the story of my life followed by the life of my ancestors. I start with my own story, not a story of a hero. Its not a about a famous baseball player that I envisioned in my dreams. My story doesnt involve any spy adventures like the books I enjoy reading. Rather my life I share with you is about a boy born in the hills of Northern New Mexico. Its about a kid that lived the first five years of my life in one of the most impoverished counties in the United States. My story recognizes the important role my mother Fedelina, played in my life. She gave me and my siblings the opportunity to be educated. Because of her efforts I became educated in the Catholic School system. Because of her foresight I grew up in Santa Cruz, New Mexico, and became educated in the Catholic tradition. Its about a person that carried through his Mothers wishes. The world she opened led me to become one of the first members of the Martinezs clan to get a College degree. Its about a career that starts in the New Mexico State capitol and winds up in the California Aerospace Industry. Its about a person that is proud of his heritage, proud of his family, and proud of his country. My life has been driven by a philosophy learned from the experiences of others. I recognized the importance of learned experiences so I embraced what they shared with me. I adopted their experiences as my own. I lost my father at an early age so I really couldnt use him as a model for learning. I listened to the elders where ever and whenever the occasion presented itself. I learned to avoid the bad and accept what I perceived to be good. Those of my parents; Andres and

Fedelina follow my own story. The others that follow are those of their parents and grandparents. I have enjoyed doing research on them, and it has been especially rewarding to actually put all these stories on paper. My family comprising of both the Martinez Clan and the Archuletas number in the hundreds. Papatin and Mama Ignacita had thirteen children; the Archuletas Papa Esquipula and Mama Aleja had seven children. Without a doubt some of these relatives can share much more interesting memoirs than mine. I have knowledge of many interesting stories about them. My uncles served our Country during World War II as some of my older cousins did. Im sure they can relate to some very interesting experiences during those times. Documentation that contains historical data on our ancestors is available for those interested in Genealogy. The Catholic Churches and missions throughout the southwest have kept records dating back to the colonization of the New World. Other agencies like the United States Census Bureau, The New Mexico Genealogical society and the Organized Church of the Latter Day Saints also maintain information on settlers coming to live in the New World. Information exists on almost every US citizen; all it takes is hours of research. Also in the past, information about ones ancestors was passed on either written or orally. Ancestors would keep records in Bibles or in books theyd written themselves. It was also very common for the family elders to repeat tales during campfire gatherings or around the dinner table. My first recollection of tales involving ancestors was my Grandma Ignacita talking about her side of the family. I remember these tales being told over and over. The story of my maternal grandfather, Luciano Herrera is one that I heard over and over. Mother used to repeat stories relating to him, to a point that I became familiar and intrigued with his life story. I started to do research on him only to discover that genealogy could be fascinating which lead me to do further research on my other ancestors. Ive documented much

In the pages of Chevrolet Pickups, you'll find a legendary tale of how Chevrolet's line of trucks evolved from cars with beds to the sophisticated luxurious trucks of modern times. Mueller's text includes the rise of the Depression-era trucks that made Chevrolet the number one manufacturer of light pickups, and Chevy's 30-year run in that top spot. Mueller explains how the leaders and engineers at Chevrolet made the company's truck line such a dominant force-" and goes in-depth on many specific models that had enormous impact on the pickup truck industry. "The complete history of Chevrolet trucks is covered, with side-trips that shed light on the GMC counterparts, competitive brands, and the ElCamino and Corvair pickups." Packed with photographs of beautifully restored pickup trucks, ""Chevrolet Pickups tells the history of one of the (20th) century's greatest accomplishments." Great collector cars are still out there--just waiting to be found! Sadly, there is very little reality in reality TV. That wouldn't be so bad except for the fact that these shows are the only TV shows for the barn-find collector car aficionado. Barn Find Road Trip is the antidote to all the manufactured collector "reality" shows. It's a real-world, barn-find banzai run in which auto archaeologist Tom Cotter, his car collector pal Brian Barr, and photographer Michael Alan Ross embarked on a 14-day collector-car-seeking adventure with no predetermined destinations. It's barn-find freestyle! Roaming the Southeast, they documented their day-to-day car search in photos and through stories and interviews. This trip is absolutely real and the same kind of junket any gearhead with the skills, knowledge, and time can undertake. Cotter and company hit the road in Cotter's 1939 Ford Woody, the kind of car that opened doors and started the conversations that revealed where interesting cars were squirreled away. The result? The discovery of over 1,000 collector cars and some of the most amazing barn-find stories Cotter has yet unearthed, all accompanied by Ross' evocative photography. If you love stories of automotive adventure, this is the book for you!

Chevrolet Camaro. Pontiac GTO. Dodge Charger. Ford Mustang. These names evoke memories of aggressively styled, amply powered kings of the road from the decade of the 1960s and the early 1970s, when Detroit was king, oil was cheap, and cars rumbled when you told them to. Muscle Cars: Kings of the Street from the Golden Era tells the story of these automobiles and dozens more, with insightful descriptions from the auto editors of Consumer Guide and full-color photographs on every page. More than 90 cars are profiled, including their mechanical and design highlights and their place in the muscle car pecking order. Exclusive specifications charts detail each car's vital statistics--how much it cost, how many were built, how fast it went and many more details. The focus is not on highly modified, professionally raced versions of these iconic machines; instead the focus is on

With the powerful, rhythmic sounds of Aboriginal English and Kokatha language woven through the narrative, Mazin Grace is the inspirational story of a feisty girl who refuses to be told who she is, determined to uncover the truth for herself. Growing up on the Mission isn't easy for clever Grace Oldman. When her classmates tease her for not having a father, she doesn't know what to say. Pappa Neddy says her dad is the Lord God in Heaven, but that doesn't help when the Mission kids call her a bastard. As Grace slowly pieces together clues that might lead to answers, she struggles to find a place in a community that rejects her for reasons she doesn't understand. In this novel, author Dylan Coleman fictionalizes her mother's childhood at the Koonibba Lutheran Mission in South Australia in the 1940s and 1950s.
