Autoworkers find themselves in a rapidly changing world as transnational corporations seek new forms of work organization and new boundaries for a North American auto industry. Inside the factory, management pursues new models of "lean production" that require workers to produce more with less—less time, less support, less material—in an atmosphere of accelerated and intensified labor. Outside the factory, "freetrade" policies and regional investment strategies widen the reach of transnational corporations, creating new opportunities in Mexico, Canada, and the U.S. for pitting worker against worker in a mutually destructive competition for jobs. In *Confronting Change*, researchers from a diverse range of universities and unions explore the impact of these changes on work and workers. The case studies and analyses show the wide range of potential outcomes as workers struggle to become actors, rather than victims, in the emerging North American auto industry.

And Tell Us What You See is a remarkable collection of articles he published during his retirement years over a ten year period in the 1990s with the Amsterdam, NY newspaper, *The Recorder*. As evidence of his willingness to explore complexity on the printed page, his articles are relevant to our day in that they take on the very issues that once were and continue to be the hallmark of the United States Episcopal Church and much of American culture, in general. Fully human yet fully the Christian priest, Robert Haven here reveals remarkable ranges of passion regarding his loves, angers, faiths and doubts. As preacher and public speaker, par excellence, he was never one to shy away from controversy and so here, too, some of his work is political and some is religiously poetic. It is also occasionally contradictory from one page to the next. The fact is, he never claimed to have it all worked out theologically and when pressed in person on specific issues, he could wax eloquent, but could also just as easily be dismissive and silently keep his own counsel. But in these newspaper articles contained herein, there is no taking the "fifth amendment" as he opens up to us and explains his sometimes complex views. I think he ultimately felt, especially given his many years in church ministry, that he'd earned the right to speak as pastor to anyone who comes to him. He turns no one away. In this book, Father Haven engages our minds and allegiances as he attempts to provide some answers if not at least one meaning to his lifetime hero, Christ Jesus, his Lord.

If you thought having a threesome could wreak havoc on a relationship, Monica from *My Woman His Wife* is back to show you why even the mere thought of a menage a trois with your spouse and an outsider should never enter your imagination. It's been three months since the Cinque household has been turned upside down by a sexual tryst gone terribly wrong. Although Jasmine and James are making moves to put their broken home and broken hearts back together, past lies and a lack of trust make it almost impossible to salvage what once was sacred. It's even harder with a conniving woman like Monica throwing salt in the wounds from the sidelines because she still hasn't gotten what she wants. Old family secrets are revealed and half truths are exposed as marriage vows are put to the test, painful memories are relived, and revenge is at the top of everyone's list. Drama, betrayal, and lust are all found on the pages of *Aftermath* -- when once just isn't enough.

Today, the Multinational Enterprise (MNE) is seen as a leading agent in the process of globalization. As they adopt global strategies, MNE's are seen to be creating stronger, deeper and more lasting links amongst countries, thus shifting the balance of power inexorably in their favour, to the detriment of the state. This book interrogates this idea by undertaking a historical analysis of the global strategies of Ford.

This one-of-a-kind, massive illustrated history of more than 10,000 American automobiles is perfect for the millions of classic car enthusiasts. With more than 1,300 pages and 12,500 illustrations covering 70 years, this may be the most complete visual history of the American automobile ever published. Nowhere else are there so many collector, luxury, sporting and every day cars assembled with fascinating information about original prices, engine sizes, horsepower, and other specifications. The pages are packed with genuine, factory-fresh photographs and drawings taken from contemporary advertisements, catalogs, and brochures. More than 250 manufacturers and hundreds of individual models trace the evolution of the American automobile, from the millions of Model Ts that rolled off Ford's assembly line through the art deco streamliners of the '30s, to the tail-finned land yachts of the '50s and muscle cars of the '60s and '70s up to the early SUVs of the '90s. Throughout author Tad Burness adds handwritten details not found anywhere else, including pointing out unusual options and differences found within a model. Automotive journalist Matt Stone provides a new general introduction and one to each era within the book.

From its first appearance in 1993, *The X-Files* has attracted millions of viewers interested in the paranormal investigations of intuitionist and belief-driven Fox Mulder and his partner, Dana Scully, the "consummate scientist" and skeptic. Addressing questions of trust and authority that plague our information-addled society, the series acquired a large fan base of individuals interested in debating and interpreting the philosophical themes that underlie the symbiotic partnership between Mulder and Scully. *The Philosophy of The X-Files* concentrates not only on the philosophical assumptions and presuppositions of the show but also on how the episodes portray the process of philosophical inquiry. Editor Dean A. Kowalski argues that both philosophy and *The X-Files* center around a determination to search for truth despite a frequent lack of information and proper tools. It is no surprise, then, to find the series riddled with common philosophical themes, including metaphysics, epistemology, ethics, political philosophy, aesthetics, and existentialism, among others. The first section of the book addresses the credos put forth by the series and examines the philosophical significance of its three popular slogans: "The truth is out there," "Trust no one," and "I want to believe." In the second section, contributors analyze the philosophical underpinnings of the characters of Mulder, Scully, the Cigarette Smoking Man, and Assistant Director Walter Skinner. A final section is devoted to individual episodes and engages with the philosophical issues raised by "Clyde Bruckman's Final Repose" and "Jose Chung's 'From Outer Space,'" in addition to the 1998 film *The X-Files: Fight the Future*. Two appendixes offer a summary of the main storyline and brief plot summaries of each television episode together with the philosophical issues it raises. The first collection of philosophical essays devoted exclusively to the show, *The Philosophy of The X-Files* shows a television series successfully engaged with the

philosophical quandaries of the modern world and explores how Mulder and Scully's personalities and actions invite inquiry into patterns of human belief and behavior. In the 87 issues of Snow Country published between 1988 and 1999, the reader can find the defining coverage of mountain resorts, ski technique and equipment, racing, cross-country touring, and the growing sport of snowboarding during a period of radical change. The award-winning magazine of mountain sports and living tracks the environmental impact of ski area development, and people moving to the mountains to work and live.
