The world is a wasteland, she's a walking corpse, and her "snack" has just melted into a noxious puddle of goo. She's had better days. But she won't go through the rest of her undead life alone. As Li hits the

road to figure out what happened, the end of the world brings her strange company, and even stranger enemies. The aliens are coming back, and it's going to take more than a handful of quirky zombies to stop them. She's going to need some serious fire power-like the remnants of the human race. If she can find them.

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's *Car Talk* declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a

race to the bottom that leaves the Yugo . . . at the bottom.
