Leaving a position covering Los Angeles events in the early 70's, Jim Bennet becomes one of NBC's most aggressive and comprehensive Vietnam war correspondents. Digging deep into the misfortunes of the ill-advised war, Bennet's commitment leads him to being fully embedded with U.S. troops deep inside the Vietnam theater of war. Exasperated by the military and the chaos of war, Bennet surrenders to the temptations of alcohol, women and violent behavior. Soon though, he and his international colleagues find themselves caught behind enemy lines deep in the jungles of Cambodia where he snaps back into the reality of purpose, walking the increasingly fine line between reporting and self-preservation. War Junkies is a tale that reflects the heroic commitment made by a few to bring the truth back to the many.

In modern-day America, newspaper advice columns have become public forums for the discussion of human sexuality. Although questions posed to newspaper advice columnists ranges from matters of etiquette to intimacy, as they have for decades, increasingly most of the limited space in these newspaper features address issues that fall under a broader heading of sexuality. Questions about marital fidelity, dating and relationships, sexual practices, gender roles, and sexual taboos have all become "hot button" topics within the morally conservative mainstream press. In Confidential to America, David Gudelunas shows how, since the 1950s, advice columns have been one of the few consistent, mainstream, and widely available public forums for the discussion of topics severely restricted in other places. Newspaper advice columns serve as sites of discussion about sexuality within a larger culture that is severely divided on questions of how, when, and to what extent one may formally speak about sexuality. Even now, at the turn of the twenty-first century, high schools remain hesitant to devote more than a semester or two to formal discussions of sexuality. When they do, under current governmental policy and pressure, these discussions are often restricted to abstinence-only programs or what might be described as "non-discussions" of sexuality. Community-based sexual education programs are similarly restricted in their reach, funding, and, more often than not, effectiveness. In America in the twenty-first century, talking about sex in educational contexts is perceived to be almost as risky as having sex. Gudelunas demonstrates that while formal discussions of sexuality are strictly regulated and often thwarted, the informal curriculum of sexuality, particularly in the American mass media, has become ever more vocal on the topic of sex. From depictions conveyed through fictional and reality-based popular culture, to discussions taking place in the cafeteria (if not the classroom) and in Internet chat rooms, sexuality dominates our collective conscience.

Readers will find this charming, funny, easy-to-read middle-grade novel from the beloved Patrick Jennings an absolute hoot! When the new kid joins his class, Woodrow agrees with his schoolmates—Toulouse is really weird. He's short—kindergarten short—dresses in a suit like a grandpa, has huge eyes, and barely says a word. But Woodrow isn't exactly Mr. Popularity. The frequent target of the class bully himself, he figures that maybe all Toulouse needs is a chance. And when the two are put together in gym to play volleyball, they make quite the team. Toulouse can serve, set, and spike like a pro. He really knows how to fly around the court. But when the attention and teasing switch back to Woodrow, he learns that the new kid is great at something else: being a friend. Full of heart and laughs, Odd, Weird, and Little is another winner from the author of the Guinea Dog series.

Tragedy and comedy intimately and movingly mingle in Helene Cixous's *The Day I Wasn't There*. Its narrator, who resembles Cixous, recounts the birth and death of her first child, a Dawn's syndrome baby she abandons to the care of her midwife mother in an Algerian maternity hospital. She uses this event to probe her family history and her relationship with her mother, a refugee from Nazi Germany; her dead father, after whom the baby is named; her doctor brother, who takes the infant under his wing; and her grandmother Omi. Cixous's elusive writing bears all the trademarks of her poetic and provocative style, vivid with wordplay, intense feeling, and a stream of consciousness that moves freely over time and place. Informed by psychoanalytical theory and always brutally honest, *The Day I Wasn't There* is above all an intimate study of a woman's inner landscape.

Nutrition spans a wide range of mechanisms from acquisition of food to digestion, absorption and retention of energy substrates, water and other nutrients. Nutritional principles have been applied to improving individual health, athletic performance and longevity of humans and of their companion animals, and to maximizing agricultural efficiency by manipulating reproduction or growth of tissues such as muscle, hair or milk in livestock. Comparative nutrition borrows from these traditional approaches by applying similar techniques to studies of ecology and physiology of wildlife. Comparative approaches to nutrition integrate several levels of organization because the acquisition and flow of energy and nutrients connect individuals to populations, populations to communities, and communities to ecosystems. Integrative Wildlife Nutrition connects behavioral, morphological and biochemical traits of animals to the life history of species and thus the dynamics of populations. An integrated approach to nutrition provides a practical framework for understanding the interactions between food resources and wildlife populations and for managing the harvest of abundant species and the conservation of threatened populations. This book is for students and professionals in animal physiology and ecology, conservation biology and wildlife management. It is based on our lectures, demonstrations and practical classes taught in the USA, Canada and Australia over the last three decades. Instructors can use Integrative Wildlife Nutrition as a text in wildlife and conservation biology programs, and as a reference source for related courses in wildlife ecology.

A charming, illustrated celebration of puttering, doodling, daydreaming, and settling down after years on the road. Following a lifetime of trekking across the globe, Vivian Swift racked up twenty-three temporary addresses in twenty years, finally dropped her well-worn futon mattress and rucksack in a small town on the edge of the Long Island Sound. She spent the next decade quietly taking stock of her life, her immediate surroundings, and, finally, what it means to call a place a home. The result is When Wanderers Cease to Roam. Filled with watercolors of beautiful local landscapes, seasonal activities, and small, overlooked pleasures of easy living, each chapter chronicles, month by month, the beautifully mundane perks of remaining at home—from curious notices in the local paper to the variations of autumnal clouds. At once gorgeously rendered and wholly original, this delightful and masterfully observed year of staying put shows us how the details of travel and the details of our lives remain with us—how they can nurture and sustain us, and how the past and the present become, in the end, intertwined.

This book studies Virgil's ideas of nature, history, sense of nation, and sense of identity. It is exact and patient in its probing for nuance and detail, but also bold, wide, and original in its scope. It combines the study of Virgil with the study of attitudes to nature throughout antiquity. Blending literature with history, and in the case of Lucretius, philosophy, it offers a vision and an interpretation of the culture of the 1st century BC as a whole. It argues that Lucretius and Virgil affected a revolution in Western sensibility; claiming that a book about poetry should be a book about life, it combines scholarship and precision with a sense of the importance of literature and its capacity to enhance our understanding of our past and of ourselves.
