Webster's Dictionary lists the term showman as "a notably spectacular, dramatic, or effective performer." In the art of drag racing, Hubert Platt checked all boxes. Known as the "Georgia Shaker," Platt cut his motoring teeth on the long straightaways and twisty back roads of South Carolina while bootlegging moonshine. After a run-in with the law in 1958, Platt transferred his driving skills from illegal activity to sanctioned

drag racing and began one of the most dominant runs in drag racing history until his retirement in 1977. After stints in 1957, 1938, and 1962 Chevrolets, Platt's next ride was a Z11 Impala, which carried his first "Georgia Shaker" moniker. Once Chevrolet pulled out of sanctioned racing, Platt found a new home with Ford for 1964 and remained there until he hung up his helmet. Some of the cars he campaigned became icons in their own right. His factory-backed and personal machines included a 1963 Z11 Impala, 1964 Thunderbolt, 1965 Falcon, 1966 Mustang Funny Car, 1967 Fairlane 427, 1968-1/2 Cobra Jet, 1969 CJ Mustang, 1970 427 SOHC Mustang, and 1970 Boss 429 Maverick. A 1986 NHRA Hall of Fame member, Platt's lasting legacy on the sport can't be denied. Whether he was launching his Falcon with the door open, conducting a Ford Drag Team seminar, or posting low E.T. at the 1967 US Nationals in his Fairlane, Platt's imprint on drag racing was all-encompassing. His son and biggest fan, Allen Platt, shares his dad's iconic career in, Hubert Platt: Fast Fords of the "Georgia Shaker"!

Despite the growing body of work on the media in Wales, very little exists on the history of commercial television in Wales. This book seeks to address this imbalance by tracing the growth and development of ITV in Wales and assessing its contribution to the life of the nation. ITV has been a powerful force in British broadcasting since its inception in 1955. When commercial television came to Wales for the first time in 1958, it immediately got caught up in with matters of national identity, language and geography. Compared with the BBC, it is a relative newcomer; its growth was slower than that of the BBC and it took until 1962 to complete the network across the UK. Once it had arrived, however, its impact was considerable. The book will provide an historical narrative and critical analysis of independent television (ITV) in Wales from 1958 up until the present day.

Vintage, retro, or classic hot rods have been an enduring element of the hot rod hobby. These vintage roadsters, sedans, and coups have become very popular because they are the bedrock of the hot rodding culture. However, many rodders have built a rod dedicated to a particular decade, era, region, flavor, or style, but these have lacked all the period correct details, and it's crucial to get all the details (ie parts) right. If some parts are not of the complementary or the package does not faithfully replicate a particular style or era, the theme of the hot rod can be ruined. Hot rod veteran Gerry Burger explains how to identify, buy, or build the parts to create a faithful period correct hot rod/a car that you will be proud of

and will gain the respect from others in the hobby. The book showcases all the parts that make a faithful and consistent hot rod of a certain era, flavor, or style. The book covers 50s and 60s style, both East Coast and West Coast. It details the wide range of stock parts and popular high-performance parts from a particular era. He discusses when they were first produced and when they were in popular use. Once you decide on the theme and time period for your hot rod build, Burger discusses how to choose the period correct engine for your chassis, valve covers, intakes, and carbs that also match the period from Edelbrock, Offenhauser, and others. Similar chapters also cover, interiors, wheels and tires, frames, suspension, and all other components. When it comes to putting together all the pieces to create an attractive, accurate, and fun hot rod from the 50s, 60s, and 70s, no other book is a better guide than "How to Build Period Correct Hot Rods."

The venerable Jeep 4.0-liter inline-six engine has powered millions of Jeeps, including CJs, YJs, Wranglers, Cherokees, and Wagoneers. The 4.0 delivers adequate horsepower from the factory, but many off-road drivers want more horsepower and torque to conquer challenging terrain, which means these engines are often built and modified. The Jeep 4.0, or 242-ci, is affordable, abundant, exceptionally durable, and many consider it one of the best 4x4 off-road engines. In this Workbench title, veteran author and Chrysler/Jeep engine expert Larry Shepard covers the rebuild of an entire engine in exceptional detail. He also delves into popular high-performance modifications and build-ups. Step-by-step photos and captions cover each crucial step of the engine disassembly. He shows the inspection of all critical parts, including block, heads, rotating assembly, intake, and exhaust. Critical machining processes are covered, such as decking the block, line boring, and overboring the block. The book provides exceptional detail during the step-by-step assembly so your engine is strong and reliable. Installing a larger-displacement rotating assembly or stroker package is one of the most cost-effective ways to increase performance, and the author covers a stroker package installation in detail. With millions of Jeep 4.0 engines in the marketplace (which are subjected to extreme use), many of these engines require a rebuild. In addition, many owners want to extract more torque and horsepower from their 4.0 engines so these engine are also modified. Until now, there has not been a complete and authoritative guide that covers the engine rebuild and build-up process from beginning to end. Jeep 4.0 Engines is the essential guide for an at-home mechanic to perform a professional-caliber rebuild or a high-performance build-up.

Haynes manuals are written and photographed from "hands-on" experience gained by a complete teardown and rebuild of the specific vehicle. Hundreds of photographs depict repair procedures, wiring diagrams, owner maintenance, emissions systems and more.
