In this hilarious collection of old car stories, Canada's very own "Old Car Detective" Bill Sherk presents 80 of his favourite stories from all 10 provinces, spanning the years from 1925 to 1965. In this book you will meet the man in New Brunswick who chopped the top off his 1927 Whippet sedan in honour of the coronation of Queen Elizabeth II; the young fellow from Kingston, Ontario, who thought his 1937 Ford coach looked better with all four fenders taken off; the owner of a 1947 Hudson that burned so much oil he had to wear a snorkel mask while driving it; the father who borrowed his son's hot-rodded '53 Monarch (built only in Canada!) and got pulled over by the police for street racing; and the grandmother who moved from England to Canada and drove her Morris Minor on the wrong side of the road. Behind every old car there's a story waiting to be told, all the way from your grandparents' Model T Ford to the Mustang you drove in high school. All the stories and photographs in this book are in chronological order from 1925 to 1965, giving you a 40-year journey through Canada's rich automotive heritage and brought to life by the people who owned and drove the cars of yesteryear – and some still do! PART ONE (1925 to 1942) takes you from the middle of the Roaring Twenties to February 1942, when the Second World War brought automobile production to a halt for three long years. PART TWO (1946 to 1965) takes you through the Baby Boom years when cars driven by Canadians went through many exciting changes in styling and engineering. If you have ever owned (or still own) a car that was built between 1925 and 1965, turn to the last page in this book to see how you can send in your story for Bill

Ford FE engines, which were manufactured from the late 1950s all the way through the mid-1970s, were designated as the large-displacement engines in the Ford lineup. FE means Ford Edsel, and reflects an era when Ford sought to promote the Edsel name. The design of these engines was implemented to increase displacement over its predecessor, the Y-Block engines of the previous decade. Early models were fairly modest in displacement, as were most big-blocks of the era, but they grew quickly to fill the needs of rapidly changing chassis requirements and consumer demand for larger vehicles. As it grew, the FE engine performed admirably as a heavy passenger car and light truck engine. It also became quite accomplished in performance circles, winning the 24 Hours of Le Mans, as well as powering Ford's muscle car and drag racing programs in the mid- to late 1960s. In this book, you will learn everything you need to know to rebuild one of these legendary engines. CarTech's unique Workbench series format takes you step-by-step through the entire rebuilding process. Covered are engine identification and selection, disassembly, cleaning, parts analysis and assessment, machine shop processes, replacement parts selection, re-assembly and start-up/break-in techniques. Along the way you find helpful tips on performance upgrades, trouble spots to look for, special tools required, and professional builder's tips. FE master, owner of Survival Motorsports, and veteran author Barry Raboutnick shares all of his tricks and secrets on building a durable and reliable FE engine. Whether you are simply rebuilding an old truck for reliable service use, restoring a 100-point show car, or building the foundation for a high-performance street and strip machine, this book will be an irreplaceable resource for all your future FE engine projects. With a Haynes manual, you can do it yourself...from simple maintenance to basic repairs.

trucks, marking what many historians feel was its official entry into the dedicated truck business. Sure, after-market pickup beds could be added to a Model T car to convert it to a pickup, but with the debut of the rugged Model TT truck chassis, Ford was firmly in the truck market. Eight years later, Ford introduced its first factory-produced pickup, a sturdy half-ton job the public loved. During the century that has passed since that first Ford truck chassis, the F-series has become the best-selling truck in the world, and the best-selling vehicle of any type in America. Ford Tough: 100 Years of Ford Trucks tells the entire Ford truck story from the very beginning, when Ford got its start in truck production. The epic story also told in the film FORD V. FERRARI: By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. Go Like Hell tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. Go Like Hell transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom. This compendium of everything that's new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select what's safe, reliable, and fuel-frugal.
