Description of the phenomenon groundswell, a social trend in which people use technologies to get things they need from each other instead of from companies, and how to turn the force of customers connecting to the advantage of companies.

Whether suicide, murder, accident, or illness, five young students at a Buddhist university will carry a body wherever it needs to go to free its soul, giving the dead who are still trapped in their corpses the opportunity to move on to the next stage in their reincarnation.

"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." – The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

"During the 1920s, Cadillac engineers sought to build a "halo car" that would draw interest and admiration from buyers. Cadillac accomplished that with the 1930 V-16. This memoir recounts the author's relationship with the 1930 V-16, and is a story of res

This book presents over 100 papers from the 3rd Engineering & Product Design Education International Conference dedicated to the subject of exploring novel approaches in product design education. The theme of the book is "Crossing Design Boundaries" which reflects the editors' wish to incorporate many of the disciplines associated with, and integral to, modern product design and development pursuits. Crossing Design Boundaries covers, for example, the conjunction of anthropology and design, the psychology of design products, the application of soft computing in wearable products, and the utilisation of new media and design and how these can be best exploited within the current product design arena. The book includes discussions concerning product design education and the cross-over into other well established design disciplines such as interaction design, jewellery design, furniture design, and exhibition design which have been somewhat under represented in recent years. The book comprises a number of sections containing papers which cover highly topical and relevant issues including Design Curriculum Development, Interdisciplinarity, Design Collaboration and Team Working, Philosophies of Design Education, Design Knowledge, New Materials and New Technologies in Design, Design Communication, Industrial Collaborations and Working with Industry, Teaching and Learning Tools, and Design

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely. Described as "retro yet contemporary", the PT Cruiser is making its mark in the auto world. In this illustrated collector's volume, two leading automotive journalists dissect every facet of PT (Personal Transportation) Cruiser development, performance, and marketing. 150 color photos.

Unprecedented shifts in the age distribution and diversity of the global labor pool are underway. Within the decade, as the massive boomer generation begins to retire and fewer skilled workers are available to replace them, companies in industrialized markets will face a labor shortage and brain drain of dramatic proportions. Ken Dychtwald, Tamara Erickson, and Robert Morison argue that companies ignore these shifts at great peril. Survival will depend on redefining retirement and transforming management and human resource practices to attract, accommodate, and retain workers of all ages and backgrounds. Based on decades of groundbreaking research and study, the authors present innovative and actionable management techniques for leveraging the knowledge of mature workers, reengaging disillusioned midcareer workers, and attracting and retaining talented younger workers. This timely book will help organizations sustain their competitive edge in tomorrow's inevitably tighter labor markets.

Ginny Lavoie has just been suspended from the NYPD when she gets a late-night phone call and hears two awful words: "Danny's dead." That message-a plea from her childhood best friend to solve the brutal murder of her teenage son-brings Ginny back to the scruffy, gray New England mill town she left many years ago. Now trying to uncover the secrets and lies hidden by an insular community, she confronts suspects ranging from a homeless Vietnam vet to Manhattan hipsters to Danny's own stepfather...and runs into childhood ghosts and new demons every step of the way. After the town's first murder in recent memory gives way to a second, then a third, Ginny must race to find the killer's identity-before she becomes victim number four.

The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have

become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets of the automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM.

“This is the end of the world as we’ve known it,” Kurt Andersen writes in *Reset*. “But it isn’t the end of the world.” In this smart and refreshingly hopeful book, Andersen—a brilliant analyst and synthesizer of historical and cultural trends, as well as a bestselling novelist and host of public radio’s *Studio 360*—shows us why the current economic crisis is actually a moment of great opportunity to get ourselves and our nation back on track. Historically, America has always shifted between wild, exuberant speculation and steady, sober hard work, as well as back and forth between economic booms and busts, and between right and left politically. This is one of the rare moments when all these cycles shift dramatically and simultaneously—a moment when complacency ends, ossified structures loosen up, and enormous positive change is possible. The shock to the system can enable each of us to rethink certain habits and focus more on the things that make us authentically happy. The present flux can enable us as a society to consolidate the enormous gains of the last several decades in areas such as technology, crime prevention, women’s and civil rights, and the democratization of the planet. We can reap the fruits of a revival of realism and pragmatism at home and abroad. As we enter a new era of post-party-line common sense, we can start to reinvent hopelessly broken systems—in health care, education, climate change, and more—and rediscover some of the old-fashioned American values of which we’ve lost sight. In *Reset*, Andersen explains how we’ve done it before and why we are about to do it again—and better than ever.

Provides information on the truck and specialty vehicles business, including: automotive industry trends and market research; mergers, acquisitions, globalization; automobile manufacturers; truck makers; makers of specialty vehicles such as RVs; automobile loans, insurance and other financial services; dealerships; and, components manufacturers.

We organize information, information about things, and information about information. Organizing is a fundamental issue in many professional fields, but these fields have only limited agreement in how they approach problems of organizing and in what they seek as their solutions. The Discipline of Organizing synthesizes insights from library science, information science, computer science, cognitive science, systems analysis, business, and other disciplines to create an Organizing System for understanding organizing. This framework is robust and forward-looking, enabling effective sharing of insights and design patterns between disciplines that weren't possible before. The Professional Edition includes new and revised content about the active resources of the "Internet of Things," and how the field of Information Architecture can be viewed as a subset of the discipline of organizing. You'll find: 600 tagged endnotes that connect to one or more of the contributing disciplines Nearly 60 new pictures and illustrations Links to cross-references and external citations Interactive study guides to test on key points The Professional Edition is ideal for practitioners and as a primary or supplemental text for graduate courses on information organization, content and knowledge management, and digital collections. FOR INSTRUCTORS: Supplemental materials (lecture notes, assignments, exams, etc.) are available at <http://disciplineoforganizing.org>. FOR STUDENTS: Make sure this is the edition you want to buy. There's a newer one and maybe your instructor has adopted that one instead.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to:

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems
- Feed exploits through infotainment and vehicle-to-vehicle communication systems
- Override factory settings with performance-tuning techniques
- Build physical and virtual test benches to try out exploits safely

If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

efforts? It's an unstoppable groundswell that affects every industry -- yet it's still utterly foreign to most companies running things now. When consumers you've never met are rating your company's products in public forums with which you have no experience or influence, your company is vulnerable. In *Groundswell*, Josh Bernoff and Charlene Li explain how to turn this threat into an opportunity. In this updated and expanded edition of *Groundswell*, featuring an all new introduction and chapters on Twitter and social media integration, you'll learn to:

- Evaluate new social technologies as they emerge
- Determine how different groups of consumers are participating in social technology arenas
- Apply a four-step process for formulating your future strategy
- Build social technologies into your business

Groundswell is required reading for executives seeking to protect and strengthen their company's public image.
