"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." – The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

Abandoned cars on America's most iconic abandoned road. Sounds like a great idea for a road trip. For a nation that loves the idea of the road, there is no more legendary ribbon of highway than the 2,451 miles comprising historic Route 66. Along the Mother Road lies the detritus of the automotive age: motels, roadside attractions, diners, service stations, drive-ins, and dives. Hidden in, around, and behind its buildings or abandoned along its roadside hide collector cars, lost trucks, and moldering motorcycles. How could there be a better destination for automotive archaeologist Tom Cotter? In Route 66 Barn Find Road Trip Cotter and his BFF (best barn finder) pal Brian Barr jump on Route 66, just outside Chicago, seeking rusted gold in every state Route 66 passes through. Along the way, ace lensman Michael Alan Ross documents their finds, mishaps, and various adventures. Starting in the Midwest and barreling through Oklahoma, Texas, and New Mexico, the barn-find bunch continues on to Arizona before completing their quest in Santa Monica, California. You'll never guess what automotive treasure they see peeking out from corroded garages and behind weary buildings along the way. You can bet every awesome barn find was investigated and recorded in Route 66 Barn Find Road Trip. Whether you've only dreamed of retracing US 66 or are familiar with its path but never considered car hunting there, Route 66 Barn Find Road Trip will take you on the trip of a lifetime. Hop in; you can ride shotgun.

Immerse yourself in this complete guide on Lamborghini's ultimate performance cars. Nearly 50 years ago, upstart high-end sports car manufacturer Lamborghini set the performance car world on its ear with its stunning supercar, the Miura. Wrapped in a svelte Marcello Gandini - designed body and powered by a 350-horsepower V-12, the Miura instantly made every other car look antiquated. In 1974, Lamborghini again shocked the automotive world with the mad Countach (an Italian expression one might utter at the sight of a beautiful woman), another Gandini masterpiece. Wide, low, and menacing, the original Countach completely

recalibrated the supercar template. The Diablo replaced the Countach in 1990 and was the last of the Lamborghini supercars under the auspices of the "original" company. Audi acquired the company in 1997 and would bring significant German efficiency to bear, turning out supercars to a new template: the Murielago in 2001, the Gallardo in 2003, the Reventon in 2008, the Aventador in 2011, and, most recently, the appropriately named Huracan. Each one is an ultimate car. Many were collector vehicles from the moment they rolled off the production line. Beneath their stunning bodywork lie chassis and powerplants bristling with the best technology of their respective eras. Lamborghini's latest supercars zip from 0 to 60 miles per hour in under 3 seconds and hit top speeds in excess of 220 miles per hour. Their prices are equally staggering. Lamborghini Supercars 50 Years is devoted exclusively to all of Lamborghini's ultimate performance cars. No enthusiast of these world-class sports cars will want to miss it! Our investments are devastated, obesity is epidemic, test scores are in decline, blue-chip companies circle the drain, and popular medications turn out to be ineffective and even dangerous. What happened? Didn't we listen to the scientists, economists and other experts who promised us that if we followed their advice all would be well? Actually, those experts are a big reason we're in this mess. And, according to acclaimed business and science writer David H. Freedman, such expert counsel usually turns out to be wrong -- often wildly so. Wrong reveals the dangerously distorted ways experts come up with their advice, and why the most heavily flawed conclusions end up getting the most attention--all the more so in the online era. But there's hope: Wrong spells out the means by which every individual and organization can do a better job of unearthing the crucial bits of right within a vast avalanche of misleading pronouncements.

The Art of Mopar: Chrysler, Dodge, and Plymouth Muscle Cars is the ultimate portrayal of history's ultimate muscle cars. This is the ultimate visual history of greatest muscle cars. The history of Chrysler Corporation is, in many ways, a history of a company floundering from one financial crisis to the next. While that has given shareholders fits for nearly a century, it has also motivated the Pentastar company to create some of the most outrageous, and collectible, cars ever built in the United States. From the moment Chrysler unleashed the Firepower hemi V-8 engine on the world for the 1951 model year, they had been cranking out the most powerful engines on the market. Because the company pioneered the use of lightweight unibody technology, it had the stiffest, lightest bodies in which to put those most powerful engines, and that is the basic muscle-car formula: add one powerful engine to one light car. When the muscle car era exploded onto the scene, Chrysler unleashed the mighty Mopar muscle cars, the Dodges and Plymouths that defined the era. Fabled nameplates like Charger, Road Runner, Super Bee, 'Cuda, and Challenger defined the era and rank among the most valuable collector cars ever produced by an American automaker.
