

## 2009 Antique Maps Poster Calendar

Theory-based, practice-driven strategies for handling separation issues in military families by internationally renowned consultant/trainer.

The Thrift Book is a guide to how to live well while spending less by bestselling writer India Knight. Feeling poor because of the credit crunch? Feeling guilty because of global warming? Feeling like you'd like to tighten your belt, but aren't ready to embrace DIY macramé handbags? No need to panic. Put down the economy mince and buy this book instead - it's a blueprint for living beautifully, while saving money and easing your conscience. India Knight will show you: - How to make wonderful dinners with every little money - How to dress on a budget and still look fabulous - How to make friends and start sharing with your neighbours - How to holiday imaginatively - with barely a carbon footprint Try it - you have nothing to lose but your overdraft. 'A blueprint for living well, however broke you are, with thrifty tips on looking fab, cooking, pampering and partying' Cosmopolitan 'The Thrift Book might be the only sure-fire investment out there' Harper's Bazaar 'A triumphant treat and a useful and sensible manual' Independent India Knight is the author of four novels: My Life on a Plate, Don't You Want Me, Comfort and Joy and Mutton. Her non-fiction books include The Shops, the bestselling diet book Neris and India's Idiot-Proof Diet, the accompanying bestselling cookbook Neris and India's Idiot-Proof Diet Cookbook and The Thrift Book. India is a columnist for the Sunday Times and lives in London with her three children. Follow India on Twitter @indiaknight or on her blog at <http://indiaknight.tumblr.com>.

This volume focuses on the impact of the Armenian Genocide on different academic disciplines at the crossroads of the centennial commemorations of the Genocide. Its interdisciplinary nature offers the opportunity to analyze the Genocide from different angles using the lens of several fields of study.

"A 22-volume, highly illustrated, A-Z general encyclopedia for all ages, featuring sections on how to use World Book, other research aids, pronunciation key, a student guide to better writing, speaking, and research skills, and comprehensive index"--

"Time Maps extends beyond all of the old clichés about linear, circular, and spiral patterns of historical process and provides us with models of the actual legends used to map history. It is a brilliant and elegant exercise in model building that provides new insights into some of the old questions about philosophy of history, historical narrative, and what is called straight history."-Hayden White, University of California, Santa Cruz Who were the first people to inhabit North America? Does the West Bank belong to the Arabs or the Jews? Why are racists so obsessed with origins? Is a seventh cousin still a cousin? Why do some societies name their children after dead ancestors? As Eviatar Zerubavel demonstrates in Time Maps, we cannot answer burning questions such as these without a deeper understanding of how we envision the past. In a pioneering attempt to map the structure of our collective memory, Zerubavel considers the cognitive patterns we use to organize the past in our minds and the mental strategies that help us string together unrelated events into coherent and meaningful narratives, as well as the social grammar of battles over conflicting interpretations of history. Drawing on fascinating examples that range from Hiroshima to the Holocaust, from Columbus to Lucy, and from ancient Egypt to the former Yugoslavia, Zerubavel shows how we construct historical origins; how we tie discontinuous events together into stories; how we link families and entire nations through genealogies; and how we separate distinct historical periods from one another through watersheds, such as the invention of fire or the fall of the Berlin Wall. Most people think the Roman Empire ended in 476, even though it lasted another 977 years in Byzantium. Challenging such conventional wisdom, Time Maps will be must reading for anyone interested in how the history of our world takes shape.

This book transforms archaeological knowledge of Nazareth by publishing over 80 years of archaeological work at the Sisters of Nazareth convent, including a detailed re-investigation in the early twenty-first century under the author's direction. Although one of the world's most famous places and of key importance to understanding early Christianity, Nazareth has attracted little archaeological attention. Following a chance discovery in the 1880s, the site was initially explored by the nuns of the convent themselves – one of the earliest examples of a major programme of excavations initiated and directed by women – and then for decades by Henri Senès, whose excavations (like those of the nuns) have remained almost entirely unpublished. Their work revealed a complex sequence, elucidated and dated by twenty-first century study, beginning with a partly rock-cut Early Roman-period domestic building, followed by Roman-period quarrying and burial, a well-preserved cave-church, and major surface-level Byzantine and Crusader churches. The interpretation and broader implications of each phase of activity are discussed in the context of recent studies of Roman-period, Byzantine, and later archaeology and contemporary archaeological theory, and their relationship to written accounts of Nazareth is also assessed. The Sisters of Nazareth Convent provides a crucial archaeological study for those wishing to understand the archaeology of Nazareth and its place in early Christianity and beyond.

Whatever your favourite tippie, when you pour yourself a drink, you have the past in a glass. You can likely find them all in your own kitchen — beer, wine, spirits, coffee, tea, cola. Line them up on the counter, and there you have it: thousands of years of human history in six drinks. Tom Standage opens a window onto the past in this tour of six beverages that remain essentials today. En route he makes fascinating forays into the byways of western culture: Why were ancient Egyptians buried with beer? Why was wine considered a “classier” drink than beer by the Romans? How did rum grog help the British navy defeat Napoleon? What is the relationship between coffee and revolution? And how did Coca-Cola become the number one poster-product for globalization decades before the term was even coined?

Our critically acclaimed smash hit Cartographies of Time is now available in paperback. In this first comprehensive history of graphic representations of time, authors Daniel Rosenberg and Anthony Grafton have crafted a lively history featuring fanciful characters and unexpected twists and turns. From medieval manuscripts to websites, Cartographies of Time features a wide variety of timelines that in their own unique ways, curving, crossing, branching, defy conventional thinking about the form. A fifty-four-foot-long timeline from 1753 is mounted on a scroll and encased in a protective box. Another timeline uses the different parts of the human body to show the genealogies of Jesus Christ and the rulers of Saxony. Ladders created by missionaries in eighteenth-century Oregon illustrate Bible stories in a vertical format to convert Native Americans. Also included is the April 1912 Marconi North Atlantic Communication chart, which tracked ships, including the Titanic, at points in time rather than by their geographic location, alongside little-known works by famous figures, including a historical chronology by the mapmaker Gerardus Mercator and a chronological board game patented by Mark Twain. Presented in a lavishly illustrated edition, Cartographies of Time is a revelation to anyone interested in the role visual forms have played in our evolving conception of history. Travel the world without leaving your living room. This beautiful large-format poster book lets you put the world on your wall with gorgeous images from Big Picture Press's best-

selling Maps. A stunning celebration of the world, from tiny insects to immense mountains.

Provides an illustrated collection of maps covering the continents and major nations of the world, detailing cities, landmarks, and cultural icons for each.

Accompanied by a Celestial Atlas. Fifth edition.

GRADES 3–6: With age-appropriate activities, this beginning social studies workbook helps children build knowledge and skills for a solid foundation in map skills and geography.

INCLUDES: This elementary workbook features easy-to-follow instructions and practice on key topics such as US geography, grid maps, US regions, global geography, North and South American geography, and more! ENGAGING: This geography and map workbook features colorful photographs and illustrations with fun, focused activities to entertain children while they grasp concepts and skills for success.

HOMESCHOOL FRIENDLY: This elementary workbook for kids is a great learning resource for at home or in the classroom and allows parents to supplement their children's learning in the areas they need it most. WHY CARSON DELLOSA: Founded by two teachers more than 40 years ago, Carson Dellosa believes that education is everywhere and is passionate about making products that inspire life's learning moments.

This book re-presents the poetry of Rudyard Kipling in the form of bold slogans, the better for us to reappraise the meaning and import of his words and his art. Each line or phrase is thrust at the reader in a manner that may be inspirational or controversial... it is for the modern consumer of this recontextualization to decide. They are words to provoke: to action. To inspire. To recite. To revile. To reconcile or reconsider the legacy and benefits of colonialism. Compiled and presented by sloganist Dick Robinson, three poems are included, complete and uncut: 'White Man's Burden', 'Fuzzy-Wuzzy' and 'If'.

Provides basic information about the biology, life cycles, and behavior of birds, along with brief profiles of each of the eighty bird families in North America.

Contains stories first broadcast on NPR.

This comprehensive yet concise annual annotated reference source catalogs the important series, periodicals and reference tools published by U.S. government agencies. Over the years, the index section of the Guide to U.S. Government Publications has expanded to more than 40,000 entries. Agencies and titles are indexed, followed by a keyword title index for quick and easy referencing. No other single resource provides historical and current information on U.S. government publications in one place.

In a world of rapidly changing knowledge which requires new and transferable skills, classrooms are increasingly being viewed as places where pupils learn how to learn. In order to help pupils develop new skills, teachers must encourage them to work independently and manage themselves as learners. Learning for Themselves offers teachers a repertoire of effective strategies and frameworks to nurture independent learning. The chapters are organised into four broad areas: learning preferences thinking inquiry personal challenges. Each section includes learning tasks covering commonly addressed topics in primary school curriculums, with each task designed to be adapted by students and teachers to suit particular interests and a range of teaching and learning goals. Photocopiable learning proformas for each task, and additional proforma resources are included to assist teachers and pupils when planning, managing, monitoring and keeping records associated with independent learning. Saving valuable planning time for teachers, this book offers a creative and effective way to encourage pupil's independence and will appeal to all teachers who aim to equip their pupils with transferable skills.

Explores the history and the underlying basis for the important calendars of the world, from ancient times to modern, and provides descriptions of calendars devised by the Egyptians, the Mayans, the Aztecs and other civilizations

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

The highly anticipated second edition of Collecting Old Maps is completely revised and expanded with over 400 color illustrations. While maintaining the original approach to the nuts and bolts of map collecting, there is new information on collecting in the digital age, building and disposing of a collection, papermaking history, and the mythological figures, symbols and allegory used in cartography. The most significant change to this new edition is the Map Gallery, which is more comprehensive and profusely illustrated in full color. Nearly 200 maps were assembled to illustrate the five-century evolution of printed maps and how they changed both artistically and technically in response to various cultural and market influences. They illustrate the progression from the simple woodcuts of the incunabula period to the elegant copperplate engravings of Renaissance Italy, then to the Baroque Dutch compositions, the refined style of scientific cartographers, and finally the technically advanced, but sometimes whimsical, approach of 20th-century mapmakers. These maps represent a broad range of geographic regions, cartographic importance, and prices. Rather than focusing on the rare and obscure, these are maps that can be collected today.

Covering a variety of must-have topics, this quick, concise, and easy-to-use guide gets beginning teachers on their way to a successful school year.

Offers step-by-step instructions for creating twelve unique items using recycled and low-cost materials.

The Rough Guide to Moscow is the definitive guide to one of Europe's most fascinating and rewarding cities. The full-colour introduction covers the awe-inspiring Kremlin and The Red Square and includes the essential list of 'what not to miss'.
