In the late 1990s, a little bay horse with four white socks and a blaze was born. Dubbed Fergus," he has now traveled the world many times over by print, web, and satellite, inspired a line of merchandise featuring his visage, and gained a fervently devoted following in the hundreds-of-thousands on Facebook and through other social media outlets. Who is this horse and how can we explain his magnetism? What breed does he represent and at which sport does he excel? What makes him so special? Fergus the Horse (Equus hilarious) is the creation of artist Jean Abernethy, and the truth is, he is not meant to represent a particular breed, nor does he pursue one specific equestrian discipline. Perhaps it is this generic quality of every man or woman's horse" that has led to his immense popularity. When fans write, Fergus reminds me of my horse,' I cannot be paid a higher compliment," says Abernethy. But while his familiarity may woo us, it is most likely his expressiveness, honesty, charm, and of course that keen sense of humor that wins our hearts. Now, in recognition of Fergus' growing fan club, Abernethy has brought together the backstory of Fergus the Horse how he came to be, his early years, the history of his friends" and support characters and combined them with his greatest hits," including the most-loved comic strips and cartoon moments, some rarely seen sketches, and brand new additions created exclusively for this book. The result is a lively, colorful, highly illustrated treasury that will entertain anyone with an eye for a horse and a need for a laugh.

What happened when America's richest car company, producing many thousands of cars per year, went head-to-head with Ferrari of Italy in the mid '60s? This is the story of an unstoppable force coming up against the stubbornness of an immovable object – that is, Ford against Ferrari. Enzo Ferrari, whose company produced fewer than four hundred cars per year in 1963, wasn't going to bow to Ford after he had turned down its offer to buy his company. The only place left to duke it out was on the racetracks of the world ... and one in particular: Le Mans '66.

In Day One, automotive journalist Marty Schorr recalls life on the front line in the classic muscle car era, thrashing brand-new cars that would become collector vehicles. Most muscle-car books celebrate beautifully-restored vehicles surrounded by hard facts; Day One tells the real

story from the point-of-view of one of the period's most respected automotive journalists, Marty Schorr. For the first time in print, you'll get a unique perspective on what it was like to actually drive, race, and otherwise thrash what are some of today's most valuable collector cars. CARS, the iconic magazine Marty wrote and edited didn't rely on industry advertising for revenue. Instead, the magazine made money the old fashioned way, from newsstand sales, leaving it able to be honest and frank in its coverage of high-performance street cars. CARS magazine reported on both Day stock and modified cars, cars the traditional magazines wouldn't touch, like the ultra-high-performance vehicles from companies like Baldwin-Motion, Yenko Chevrolet, Nickey Chevrolet, Royal Pontiac, and Tasca Ford. Prepare yourself for Day One to cover the most important cars of a given year, including: Pontiac's 1962-1963 lightweight Super-Duty 421 street and Swiss Cheese models Chevrolet's 1963 big-block 427 Mystery Motor and ZL-1 Impala. The Complete Book of Pontiac GTO gives you a year-by-year, model-by-model exploration of the world's first muscle car, all in full color photography, most of which has never been published. When Pontiac created the original muscle car—the GTO—it reshaped the automotive world like a four-inch piston going through a three-inch cylinder bore. Everything changed the moment John Zachery DeLorean and his crew of hot-rodding miscreants bolted a big engine into a smaller car and created the 1964 GTO. Make no mistake: DeLorean and his partners in crime were genuine outlaws. The GTO broke so many of General Motors' corporate rules that the people responsible should have been fired. And they would have been, except the car was a hit. The Complete Book of Pontiac GTO explores every iteration of the first car created specifically for baby boomers. With rare photography from the archives of Hot Rod and Motor Trend magazines, this book is the complete resource for fans of of the world's first muscle car.

The birth of the muscle car, mid-sized cars with big engines making big horsepower, marked not only a revolution in performance?but also a revolution in marketing. For the first time ever, car manufacturers tailored their product to a youth audience. The genre thrived in the 60s and early 70s and was reborn in the 21st century. The All-American Muscle Car celebrates the fifty-year history of the breed through stunning modern and archival photography, and brilliant essays from today?s top muscle-car writers. Organized by themes, its chapters cover the introduction and early years of muscle; the cultural trends that made muscle cars so wildly popular; the pop culture that surrounded the cars in music, film, and television; and racing, both legal and illegal. Great rivalries are detailed?Camaro versus Mustang versus Firebird versus Challenger versus?Cuda, GTO versus Road Runner versus Super Bee versus Chevelle SS versus Buick Gran Sport versus Oldsmobile 4-4-2, and the like. The book also explores the illogical extremes at the end of the classic era, the Plymouth Superbirds, GTOJudges, LS6 Chevelles, Hemi?Cudas, W-30 Oldsmobiles, Ram Air IV Pontiacs, Stage I GSX Buicks, and 440/6 Road Runners; the dark years and the death of performance; the rebirth of the muscle car; and the modern interpretations of the breed including the new Camaro, Mustang, and Challenger.

In the 50-plus years illustrated here, two basic changes in the marketing of motor vehicles is evident: the rising proportion of trucks among all vehicles sold and the incursion of European and Asian brands into the market. Even though the number of different Chevrolet passenger car models tripled, total car sales for the brand fell. "The COPO Camaro was ushered into existence in the late '60s by Chevrolet dealers who were installing big-block engines in Camaros and taking them racing. Chevrolet management knew a good thing when they saw it and, tapping into GM's Central Office Production Order (COPO) system, began to outfit stock Camaros with essentially Corvette drivetrains. Then, upping the ante in 1969, Chevy built just 69 super-high-performance COPO Camaros with aluminum-block engines and they became instant classics. The result was a performance configuration that made history. Now, more than four decades later, Chevrolet has recreated the magic by building 69 2012 COPO Camaros intended for sportsman class drag racing competition. ... This behind-the-scenes story puts the new COPO Camaro into historical context and provides specifications for every one of the 69 units created."--Publisher's description.

Webster's Dictionary lists the term showman as "a notably spectacular, dramatic, or effective performer." In the art of drag racing, Hubert Platt checked all boxes. Known as the "Georgia Shaker," Platt cut his motoring teeth on the long straightaways and twisty back roads of South Carolina while bootlegging moonshine. After a run-in with the law in 1958, Platt transferred his driving skills from illegal activity to sanctioned drag racing and began one of the most dominant runs in drag racing history until his retirement in 1977. After stints in 1957, 1938, and 1962 Chevrolets, Platt's next ride was a Z11 Impala, which carried his first "Georgia Shaker" moniker. Once Chevrolet pulled out of sanctioned racing, Platt found a new home with Ford for 1964 and remained there until he hung up his helmet. Some of the cars he campaigned became icons in their own right. His factory-backed and personal machines included a 1963 Z11 Impala, 1964 Thunderbolt, 1965 Falcon, 1966 Mustang Funny Car, 1967 Fairlane 427, 1968-1/2 Cobra Jet, 1969 CJ Mustang, 1970 427 SOHC Mustang, and 1970 Boss 429 Maverick. A 1986 NHRA Hall of Fame member, Platt's lasting legacy on the sport can't be denied. Whether he was launching his Falcon with the door open, conducting a Ford Drag Team seminar, or posting low E.T. at the 1967 US Nationals in his Fairlane, Platt's imprint on drag racing was all-encompassing. His son and biggest fan, Allen Platt, shares his dad's iconic career in, Hubert Platt: Fast Fords of the "Georgia Shaker"!

It was many years before Kevin Mackay came to rescue this prominent machine. If you like L88 Corvettes, no one has bought and restored more of them than Kevin Mackay! A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.
