This volume contains the proceedings of the international conference ``Around Langlands Correspondences'', held from June 17-20, 2015, at Universite Paris Sud in Orsay, France. The Langlands correspondence (nowadays called the usual Langlands correspondence), conjectured by Robert Langlands in the late 1960s and early 1970s, has recently seen some new mysterious generalizations: the modular Langlands correspondence, the p -adic Langlands correspondence, and the geometric Langlands correspondence, the last of which seems to share deep connections with the Baum-Connes conjecture. The aim of this volume is to present, through a mix of research and expository articles, some of the fascinating new directions in number theory and representation theory arising from recent developments in the Langlands program. Special emphasis is placed on nonclassical versions of the conjectural Langlands correspondences, where the underlying field is no longer the complex numbers.

and matching strings and more complicated patterns such as trees, regular expressions, graphs, point sets, and arrays. The goal is to derive non-trivial combinatorial properties of such structures and to exploit these properties in order to either achieve superior performance for the corresponding computational problem or pinpoint conditions under which searches cannot be performed efficiently. The meeting also deals with problems in computational biology, data compression and data mining, coding, information retrieval, natural language processing, and pattern recognition.

James Okoro was born to a trader, Mr Oke Okoro. Oke Okoro was born in Isoko in Delta State of Konganoga. By this accident of birth, all the progeny of the Okoro family were assigned to be natives of Isoko. The Okoro family lived in Zungera in a different region of the country, Konganoga. In the course of his education, James started from Zungera and studied in Premier University in yet another part of the country. For the prescribed National Service, he was posted to teach in a co-educational government secondary school, Kejigi. There, he met Fatima, a full-time member of staff. James was assigned some of the classes she taught prior to his arrival. Soon, one thing led to more things. Slowly at first and steadily later, the need for further education would set both on a course. In spite of circumstances to the contrary, religion and culture, James and Fatima developed affection for each other. James was admitted to do a Master's program in Detroit, USA. Before he left for the USA, they introduced themselves to their parents who were oblivious of their mutual affectionate relationship. Eventually, Fatima joined James in Detroit. The two families were persuaded to consent to the desired marital union of James and Fatima. They got married and raised their family in the USA. In spite of the disparate socio-economic realities between Konganoga and the USA, James and Fatima returned home to settle down.
