Visual working memory allows us to temporarily maintain and manipulate visual information in order to solve a task. The study of the brain mechanisms underlying this function began more than a half century ago, with Scoville and Milner’s (1957) seminal discoveries with amnesic patients. This timely collection of papers brings together diverse perspectives on the cognitive neuroscience of visual working memory from multiple fields that have traditionally been fairly disjointed: human neuroimaging, electrophysiological, behavioural and animal lesion studies, investigating both the developing and the adult brain.

Quality Control in the Beverage Industry, volume 17, in the Science of Beverages series, presents a detailed account of the most common aspects and challenges relating to quality control. It covers the latest global trends in how to improve beverages using assessment tools, authenticity approaches and novel quality control technologies. The book presents a great, hands on approach for anyone who needs to understand the big picture regarding analytical methods. Topics covered include safety, the economic impacts of contamination, and detection techniques. Provides tools to assess and measure sulfites in beverages using different instrumental techniques Presents the application of nanotechnology for the improvement of beverages, including taste, structure and overall quality Includes analytical procedures for measuring and controlling quality

Generative modeling is one of the hottest topics in AI. It’s now possible to teach a machine to excel at human endeavors such as painting, writing, and composing music. With this practical book, machine-learning engineers and data scientists will discover how to re-create some of the most impressive examples of generative deep learning models, such as variational autoencoders, generative adversarial networks (GANs), encoder-decoder models and world models. Author David Foster demonstrates the inner workings of each technique, starting with the basics of deep learning before advancing to some of the most cutting-edge algorithms in the field. Through tips and tricks, you’ll understand how to make your models learn more efficiently and become more creative. Discover how variational autoencoders can change facial expressions in photos Build practical GAN examples from scratch, including CycleGAN for style transfer and MuseGAN for music generation Create recurrent generative models for text generation and learn how to improve the models using attention Understand how generative models can help agents to accomplish tasks within a reinforcement learning setting Explore the architecture of the Transformer (BERT, GPT-2) and image generation models such as ProGAN and StyleGAN

This book constitutes refereed proceedings of the 15th International Conference on Parallel Computational Technologies, PCT 2021, held in March-April 2021. Due to the COVID-19 pandemic the conference was held online. The 22 revised full papers presented were carefully reviewed and selected from 89 submissions. The papers are organized in topical sections on high performance architectures, tools and technologies; parallel numerical algorithms; supercomputer simulation.

The book also contains 5 Mock tests designed exactly as per the latest pattern of XAT. Each Mock Test has 2 parts as per the new format. Part I contains questions on Decision Making, English Language & Logical Reasoning and Quantitative Ability whereas Part 2 contains Essay Writing and questions on General Awareness on Business Environment, Economics and Polity. The detailed solution to each test is

provided at the end of the book. The book also contains the list of essays asked in the last 15 years of XAT and a list of essays for practice.

Top 50 Notable Works of Nonfiction in 2017—The Washington Post “Privilege”—the word, the idea, the accusation that is nearly impossible to disprove—is the new rhetorical power play. From social media to academia, public speech to casual conversation, the word is utilized to brand people of all kinds with a term once reserved exclusively for those who came from wealth and old money—inherited advantage. Today “privileged” applies to anyone who enjoys an unearned advantage in life, inherited or not. White privilege, male privilege, straight privilege—those conditions make everyday life easier, less stressful, more lucrative, and generally better for those who hold one, two, or all three designations. But what about white female privilege in the context of feminism? Or fixed gender privilege in the context of transgender? Or weight and height privilege in the context of hiring practices and salary levels? Or food privilege in the context of widening inequality for single-parent families? In *The Perils of “Privilege,”* Phoebe Maltz Bovy examines the rise of this word into extraordinary potency. Does calling out privilege help to change or soften it? Or simply reinforce it by dividing people against themselves? And is privilege a concept that, in fact, only privileged people are debating? *The Perils of “Privilege”* explores how this word is deployed, and offers ways to begin anew so many of the conversations it has silenced.

Complemented by a DVD that enables access to a total of six full-length practice exams, a reference for aspiring law students provides detailed explanations for every question, strategies for each section of the test, and comprehensive score reports.

One hundred years ago the idea of 'the economy' didn't exist. Now, improving the economy has come to be seen as perhaps the most important task facing modern societies. Politics and policymaking are conducted in the language of economics and economic logic shapes how political issues are thought about and addressed. The result is that the majority of citizens, who cannot speak this language, are locked out of politics while political decisions are increasingly devolved to experts. *The Econocracy* explains how economics came to be seen this way - and the damaging consequences. It opens up the discipline and demonstrates its inner workings to the wider public so that the task of reclaiming democracy can begin.

THIS BOOK WILL SOON BE AVAILABLE AS OPEN ACCESS BOOK This book is a valuable resource for policymakers and practitioners as it brings insights mainly from developing countries where relatively less research activity takes place. It is also a valuable resource for courses in mathematics education in the teacher education colleges, and departments of education in the sub-Saharan Africa region. In the increasingly global and technological world mathematics is seen as a significant gatekeeper of opportunities for social and economic advancement and mobility. Hence, countries and development agencies in the broader sub-Saharan Africa region are looking towards increasing access to relevant and high-quality secondary education as a lever towards economic development. Policy makers and other key decision makers in education look towards improvement in mathematics teaching and learning as a key focus in education reform. In the East Africa region also a number of initiatives have been taken at the national level in the respective countries to improve the quality of mathematics education. This book provides an in-depth comparative analysis of the developments and issues in mathematics education in Kenya, Tanzania, Rwanda and Uganda, and advances our understanding of the state of secondary mathematics education in East Africa.

Reflecting the internationalization of the field of second language writing, this book focuses on political aspects and pedagogical issues of writing instruction and testing in a global context. High-stakes assessment impacts the lives of second language (L2) writers and their teachers around the world, be it the College English Test in China, Common Core-aligned assessments in the U.S., English proficiency tests in Poland, or the material conditions (such as access to technology, training, and other resources) affecting a classroom. With contributions from authors working in ten different countries in a variety of institutional contexts, the chapters examine the uses and abuses of various writing-

related assessments, and the policies that determine their form and use. Representing a diverse range of contexts, methods, and disciplines, the authors jointly call for more equitable testing systems that consider the socioeconomic, psychometric, affective, institutional, and needs of all students who strive to gain access to education and employment opportunities related to English language proficiency.

In this commemorative volume, India's top business leaders and economic luminaries come together to provide a balanced picture of the consequences of the country's economic reforms, which were initiated in 1991. What were the reforms? What were they intended for? How have they affected the overall functioning of the economy? With contributions from Mukesh Ambani, Narayana Murthy, Sunil Mittal, Kiran Mazumdar-Shaw, Shivshankar Menon, Montek Singh Ahluwalia, T.N. Ninan, Sanjaya Baru, Naushad Forbes, Omkar Goswami and R. Gopalakrishnan, India Transformed delves deep into the life of an economically liberalized India through the eyes of the people who helped transform it.

This edited volume addresses issues that promote the notion of Classroom-based Language Assessment (CBLA) for the academic community and beyond. The book explores recent thinking and research on CBLA within the fields of language testing, assessment and general education based on theoretical and research papers presented at the recent CBLA SIG – EALTA Symposia held in Cyprus and the pre-conference EALTA workshops in various countries around Europe. The volume contains 17 chapters which involve both high-stakes tests and classroom-based assessments conducted by academics, professionals and researchers in the field. It brings together high-quality submissions that cover a gap in a research area that has long been in need of theoretical and empirical attention. Overall, this edited collection, with its international scope, offers a ground-breaking resource, bringing together in balanced relationship the fields of education and second language testing and assessment.
