So far, humanity hasn't done very well in addressing the ongoing climate catastrophe. Veteran science educator L. S. Gardiner believes we can learn to do better by understanding how we've dealt with other types of environmental risks in the past and why we are dragging our feet in addressing this most urgent emergency. Weaving scientific facts and research together with humor and emotion, Gardiner explores human responses to erosion, earthquakes, fires, invasive species, marine degradation, volcanic eruptions, and floods in order to illuminate why we find it so challenging to deal with climate change. Insight emerges from unexpected places—a mermaid exhibit, a Magic 8 Ball, and midcentury cartoons about a future that never came to be. Instead of focusing on the economics and geopolitics of the

debate over climate change, this book brings large-scale disaster to a human scale, emphasizing the role of the individual. We humans do have the capacity to deal with disasters. When we face threatening changes, we don't just stand there pretending it isn't so, we do something. But because we're human, our responses aren't always the right ones the first time—yet we can learn to do better. This book is essential reading for all who want to know how we can draw on our strengths to survive the climate catastrophe and forge a new relationship with nature.

WHAT "Lira, a famous siren, must prove herself by stealing the heart of the man, a prince, threatening their race"-- The fiction story is trying to portray the need and way to save the devastating humans and their world. Any living is capable to play the role of a savior. No living shall be considered weak and underneath. Mermaid, a life of fiction and anecdotes, is granted the power to rule and design the civilization with ideal approach and lifestyle. Such a Mermaid lives in various places, may it be water or land, and then establishes a world with wisdom and justice wherever she lives. But in the early part of the story the inhabitants of her civilization are non-humans. Flourishment has its own fragrance and the fragrance of Mermaid civilization reaches the sufferings and

Further Mermaid decides to be the Savior to the humans. The further story circles around the combat to save the humans and ends with the end of the fight. Frailty, thy name is women. the book expands on descriptive-oriented studies to offer a more linguistically driven perspective on children's picture books. The volume explores the choice afforded to and the lexico-semantic and discursive strategies employed by writers and illustrators in conveying representational, interpersonal, and textual meanings in the verbal and non-verbal components in these narratives in order to challenge gender stereotypes and promote the social inclusion of same-sex parent families. This book will be of particular interest to students and scholars in multimodality, discourse analysis, social semiotics, and children's literature.

Repeatedly the chapters in the collection encounter the contemporary relevance of our fears of the sea and its inhabitants – through the dehumanising media depictions of refugees in the Mediterranean to the encroaching ecological disasters of global warming, pollution and the threat of mass marine extinction.

A teenage girl's suicide raises questions of culpability for internet bullies in this investigation by the criminologist and true crime author. On September 5, 2015, in a public park in LaVergne, Tennessee, fourteen-year-old Sherokee Harriman drove a kitchen knife into her stomach as other teens watched in horror. The coroner ruled it a "suicide." But was it? Or was it a crime perpetuated by other teens who had bullied her? Sherokee's tragic death created a media frenzy focused more on sensationalism than finding the truth. Meanwhile the community of LaVerge sought answers to questions about who, if anyone, should be held criminally responsible for bullying. Criminologist Judith A. Yates peels back the distorting layers of social media and news coverage to examine a timely question with far-reaching implications: was Sherokee Harriman bullied to death?

This concise and accessible critical introduction examines the world of popular fairy-tale television, tracing how fairy tales and their social and cultural implications manifest within series, television events,

anthologies, and episodes, and as freestanding motifs. Providing a model of televisual analysis, Rudy and Greenhill emphasize that fairy-tale longevity in general, and particularly on TV, results from malleability—morphing from extremely complex narratives to the simple quotation of a name (like Cinderella) or phrase (like "happily ever after")—as well as its perennial value as a form that is good to think with. The global reach and popularity of fairy tales is reflected in the book's selection of diverse examples from genres such as political, lifestyle, reality, and science fiction TV. With a select mediagraphy, discussion questions, and detailed bibliography for further study, this book is an ideal guide for students and scholars of television studies, popular culture, and media studies, as well as dedicated fairy-tale fans.

Certified Fairyologist Toni Klein first heard whispers from beyond as a child growing up among the farmlands of central New Jersey. She has learned from those whispers as they have shaped her into an experienced communicator who has since been guiding others on how to connect and receive their own heavenly messages. In *Fairies: An Informational and Whimsical Guide*, she presents a detailed look into the intriguing world of fairies and other elementals. In addition to the chapters dedicated to the facts of fairy life, Klein presents sections on the whimsical side, including poetry, crafts, and how to

host a fairy party. She also offers information on unicorns, mermaids, butterflies, and other mystical beings. Giving insight into the world of mystery and magic, Fairies discusses how fairies coexist with humans on earth as nature angels, and they are here to protect nature and the environment, guard from dangerous pollution, and show love to animal friends.

In an exuberant picture book, a glimpse of costumed mermaids leaves one boy flooded with wonder and ready to dazzle the world. While riding the subway home from the pool with his abuela one day, Julián notices three women spectacularly dressed up. Their hair billows in brilliant hues, their dresses end in fishtails, and their joy fills the train car. When Julián gets home, daydreaming of the magic he's seen, all he can think about is dressing up just like the ladies in his own fabulous mermaid costume: a butter-yellow curtain for his tail, the fronds of a potted fern for his headdress. But what will Abuela think about the mess he makes — and even more importantly, what will she think about how Julián sees himself? Mesmerizing and full of heart, Jessica Love's author-illustrator debut is a jubilant picture of self-love and a radiant celebration of individuality.

become the star attraction of history's greatest showman. Once there was a mermaid called Amelia who could never be content in the sea, a mermaid who longed to know all the world and all its wonders, and so she came to live on land. Once there was a man called P. T. Barnum, a man who longed to make his fortune by selling the wondrous and miraculous, and there is nothing more miraculous than a real mermaid. Amelia agrees to play the mermaid for Barnum and walk among men in their world, believing she can leave anytime she likes. This Indian film music book is a collection of eighty essays about the people who made remarkable music in Bollywood cinema, especially during the great era, and the ideas such people brought to the recording studios. When songs had to go without rhythms or when melodies had plenty of Q n A in them. In this music book, we flirt with Rock n Roll and scan songs that speed up at the end, we peep behind the screen to see what the idea was behind chorus songs in our films – even if there was no one to sing that chorus on the screen; it's a huge list. These pages are a reflection of the time when everyone was fired up in their art, and when no one wanted to finish last in the race. It is about artists who every now and then dreamt ideas, and only after crystallizing things perfectly in their mind's eye, went out to translate and transform their dreams into unforgettable melodies in Indian movies. Jukebox will interest the layman as well as the academician.

This is an annually updated presentation of each sovereign country in Nordic, Central and Southeastern Europe, past and present.

Emerging from the confluence of Greco-Roman mythology and regional folklore, the mermaid has been an enduring motif in Western culture since the medieval period. It has also been disseminated more widely, initially through Western trade and colonisation and, more recently, through the increasing globalisation of media products and outlets. Scaled for Success offers the first detailed overview of the mermaids dispersal outside Europe. Complementing previous studies of the interrelationship between the mermaid and Mami Wata spirit in West Africa, this volume addresses the mermaids presence in a range of Middle Eastern, Asian, Australian, Latin American and North American contexts.

Individual chapters identify the manner in which the mermaid has been variously syncretised and/or resignified in contexts as diverse as Indian public statuary, Thai cinema and Coney Islands annual Mermaid Parade. Rather than lingering as a relic of a bygone age, the mermaid emerges as a versatile, dynamic and, above all, polyvalent figure. Her prominence exemplifies the manner in which contemporary media-lore has extended the currency of established folkloric figures in new and often surprising ways. Analysing aspects of religious symbolism, visual art, literature and contemporary popular culture, this copiously illustrated volume profiles an intriguing and highly diverse phenomenon. Philip Hayward is editor of the journal *Shima* and holds adjunct professor positions at the University of Technology Sydney and at Southern Cross University. His previous volume, *Making a Splash: Mermaids (and Mermen) in 20th and 21st Century Audiovisual Media*, was published by John Libbey Publishing/Indiana University Press in 2017.
