

22 Immutable Laws Of Marketing

The book that completes Positioning . . . Thirty years ago, Jack Trout and Al Ries published their classic bestseller, Positioning: The Battle for Your Mind—a book that revolutionized the world of marketing. But times have changed. Competition is fiercer. Consumers are savvier. Communications are faster. And once-successful companies are in crisis mode. Repositioning shows you how to adapt, compete—and succeed—in today’s overcrowded marketplace. Global marketing expert Jack Trout has retooled his most effective positioning strategies—providing a must-have arsenal of proven marketing techniques specifically redesigned for our current climate. With Repositioning, you can conquer the “3 Cs” of business: Competition, Change, and Crisis . . . BEAT THE COMPETITION: Challenge your rivals, differentiate your product, increase your value, and stand out in the crowd. CHANGE WITH THE TIMES: Use the latest technologies, communications, and multimedia resources to connect with your consumers. MANAGE A CRISIS: Cope with everything from profit losses and rising costs to bad press and PR nightmares. Even if your company is doing well, these cutting-edge marketing observations can keep you on top of your game and ahead of the pack. You’ll discover how expanding product lines may decrease your overall sales, why new brand names often outsell established brands, and why slashing prices is usually a bad idea. You’ll learn the dangers of attacking your competitors head-on—and the value of emphasizing value. You’ll see how consumers can have too many choices to pick from—and what you can do to make them pick your brand. Drawing from the latest research studies, consumer statistics, and business-news headlines, Trout reveals the hidden psychological motives that drive today’s market. Understanding the mindset of your consumers is half the battle. Winning in today’s world is often a matter of repositioning. It’s how you rethink the strategies you’ve always relied on. It’s how you regain the success you’ve worked so hard for. It’s how you win the new battle of the mind.

It's not just smaller, lesser-known companies that have launched dud brands. On the contrary, most of the world's global giants have launched new products that have flopped - spectacularly and at great cost. Haig organizes these 100 ""failures"" into ten types which include classic failures (e.g., New Coke), idea failures (e.g., R.J.Reynolds' smokeless cigarettes), extension failures (e.g. Harley Davidson perfume), culture failures (e.g., Kellogs in India), and technology failures (e.g., Pets.com).

Branding guru Aaker shows how to eliminate the competition and become the lead brand in your market This ground-breaking book defines the concept of brand relevance using dozens of case studies-Prius, Whole Foods, Westin, iPad and more-and explains how brand relevance drives market dynamics, which generates opportunities for your brand and threats for the competition. Aaker reveals how these companies have made other brands in their categories irrelevant. Using dozens of case studies, shows how to create or dominate new categories or subcategories, making competitors irrelevant Shows how to manage the new category or subcategory as if it were a brand and how to create barriers to competitors Describes the threat of becoming irrelevant by failing to make what customer are buying or losing energy David Aaker, the author of four brand books, has been called the father of branding This book offers insight for creating and/or owning a new business arena. Instead of being the best, the goal is to be the only brand around-making competitors irrelevant.

Now that product differences are rapidly and easily copied, or are perceived to be minimal, differentiating a company's products and services from the competition has become key to corporate survival. Marketing guru Jack Trout delivers a practical guide for businesses on developing powerful differentiation strategies.

Why are some products and ideas talked about more than others? Why do some articles make the most emailed list? Why do some YouTube videos go viral? Word-of-mouth. Whether through face-to-face conversations, emails from friends, or online product reviews, the information and opinions we get from others have a strong impact on our own behaviour. Indeed, word-of-mouth generates more than two times the sales of paid advertising and is the primary factor behind 20-50% of all purchasing decisions. It is between 8.5 and 30 times more effective than traditional media. But want to know the best thing about word-of-mouth? It's available to everyone. Whether you're a Fortune 500 company trying to increase sales, a corner restaurant trying to raise awareness, a non-profit trying to fight obesity, or a newbie politician running for city council, word-of-mouth can help you succeed. And you don't have to have millions of dollars to spend on an advertising budget. You just have to get people to talk. The challenge, though, is how to do that. This book will show you how.

From FSGO x Logic: a revealing examination of digital advertising and the internet's precarious foundation In Subprime Attention Crisis, Tim Hwang investigates the way big tech financializes attention. In the process, he shows us how digital advertising—the beating heart of the internet—is at risk of collapsing, and that its potential demise bears an uncanny resemblance to the housing crisis of 2008. From the unreliability of advertising numbers and the unregulated automation of advertising bidding wars, to the simple fact that online ads mostly fail to work, Hwang demonstrates that while consumers’ attention has never been more prized, the true value of that attention itself—much like subprime mortgages—is wildly misrepresented. And if online advertising goes belly-up, the internet—and its free services—will suddenly be accessible only to those who can afford it. Deeply researched, convincing, and alarming, Subprime Attention Crisis will change the way you look at the internet, and its precarious future. FSG Originals x Logic dissects the way technology functions in everyday lives. The titans of Silicon Valley, for all their utopian imaginings, never really had our best interests at heart: recent threats to democracy, truth, privacy, and safety, as a result of tech’s reckless pursuit of progress, have shown as much. We present an alternate story, one that delights in capturing technology in all its contradictions and innovation, across borders and socioeconomic divisions, from history through the future,

beyond platitudes and PR hype, and past doom and gloom. Our collaboration features four brief but provocative forays into the tech industry's many worlds, and aspires to incite fresh conversations about technology focused on nuanced and accessible explorations of the emerging tools that reorganize and redefine life today.

Bestselling authors and world-renowned marketing strategists Al and Laura Ries usher in the new era of public relations. Today's major brands are born with publicity, not advertising. A closer look at the history of the most successful modern brands shows this to be true. In fact, an astonishing number of brands, including Palm, Starbucks, the Body Shop, Wal-Mart, Red Bull and Zara have been built with virtually no advertising. Using in-depth case histories of successful PR campaigns coupled with those of unsuccessful advertising campaigns, The Fall of Advertising provides valuable ideas for marketers -- all the while demonstrating why advertising lacks credibility, the crucial ingredient in brand building, and how only PR can supply that credibility; the big bang approach advocated by advertising people should be abandoned in favor of a slow build-up by PR; advertising should only be used to maintain brands once they have been established through publicity. Bold and accessible, The Fall of Advertising is bound to turn the world of marketing upside down.

Why are most slogans and taglines ineffective? Because they're just words and a mind cannot understand words. A mind can only understand sounds. Why do most Americans remember the battlecry of the French Revolution (Libert , galit , fraternit) when they cannot remember the battlecry of the American Revolution? Because the sounds of the words "Libert , galit , fraternit " rhyme and that's one of the powerful techniques for creating a memorable slogan. In addition to "rhyme," there are four other techniques outlined in my new book, Battlecry. (1) Rhyme: "Roto-Rooter, that's the name. And away go troubles down the drain." (2) Alliteration: "M&Ms melt in your mouth, not in your hands." (3) Repetition: "The few. The proud. The Marines." (4) Reversals: "Two great tastes that taste great together. Reese's peanut butter cups." (5) Double-entendre: "A diamond is forever." You might think companies and their ad agencies would be wise to these techniques. But few slogans actually use any of these memory-building tactics. In a recent survey of 266 advertising slogans, only 19 used any one of them. Battlecry is a companion book to my previous book, Visual Hammer, and should be read together. Creating a slogan is only half the battle. The other half of the battle is a visual that will help drive your slogan into prospects' minds. The contour bottle helps drive "The real thing" into the minds of cola drinkers. The duck helps drive the Aflac name into prospects' minds. The straw-in-the-orange helps drive "Not from concentrate" into the minds of Tropicana buyers. Even "The ultimate driving machine" would not have been effective, in my opinion, without a visual hammer. And what was BMW's visual hammer? It was the television commercials showing BMWs being driven over winding road by happy owners. Over the years, there have been many advertising campaigns showing beautiful automobiles being driven over lush, winding roads. The hammers are terrific, but the nails are missing. The trick is to find the right combination of a visual hammer and a verbal nail. And my two books, Battlecry and Visual Hammer, can help you do exactly that.

How maverick companies have passed up the growth treadmill — and focused on greatness instead. It's an axiom of business that great companies grow their revenues and profits year after year. Yet quietly, under the radar, a small number of companies have rejected the pressure of endless growth to focus on more satisfying business goals. Goals like being great at what they do, creating a great place to work, providing great customer service, making great contributions to their communities, and finding great ways to lead their lives. In Small Giants, veteran journalist Bo Burlingham takes us deep inside fourteen remarkable companies that have chosen to march to their own drummer. They include Anchor Brewing, the original microbrewer; CitiStorage Inc., the premier independent records-storage business; Clif Bar & Co., maker of organic energy bars and other nutrition foods; Righteous Babe Records, the record company founded by singer-songwriter Ani DiFranco; Union Square Hospitality Group, the company of restaurateur Danny Meyer; and Zingerman's Community of Businesses, including the world-famous Zingerman's Deli of Ann Arbor. Burlingham shows how the leaders of these small giants recognized the full range of choices they had about the type of company they could create. And he shows how we can all benefit by questioning the usual definitions of business success. In his new afterward, Burlingham reflects on the similarities and learning lessons from the small giants he covers in the book.

Lee is a conviction politician whose speeches are unambiguous, characterful and eminently quotable; this collection of almost 600 short quotations provides a compelling summary of his views on a wide range of topics from Singapore's past, present and future. In Lee's own words: "I have been accused of many things in my life, but not even my worst enemy has ever accused me of being afraid to speak my mind."

What Charles Darwin did for biology, Al and Laura Ries do for branding. In their exciting new book, The Origin of Brands, the Rieses take Darwin's revolutionary idea of evolution and apply it to the branding process. What results is a new and strikingly effective strategy for creating innovative products, building a successful brand, and, in turn, achieving business success. Here, the Rieses explain how changing conditions in the marketplace create endless opportunities to build new brands and accumulate riches. But these opportunities cannot be found where most people and most companies look. That is, in the convergence of existing categories like television and the computer, the cellphone and the Internet. Instead, opportunity lies in the opposite direction—in divergence. By following Darwin's brilliant deduction that new species arise from divergence of an existing species, the Rieses outline an effective strategy for creating and taking to market an effective brand. In The Origin of Brands, you will learn how to: Divide and conquer Exploit divergence Use the theories of survival of the fittest and survival of the second best Harness the power of pruning Using insightful studies of failed convergence products and engaging success stories of products that have achieved worldwide success through divergence, the Rieses have written the definitive book on branding. The Origin of Brands will show you in depth how to build a great brand and will lead you to success in the high-stakes world of branding.

The first book to deal with the problems of communicating to a skeptical, media-blitzed public, Positioning describes a revolutionary approach to creating a "position" in a prospective customer's mind—one that reflects a company's own strengths and weaknesses as well as those of its competitors. Writing in their trademark witty, fast-paced style, advertising gurus Ries and Trout explain how to: Make and position an industry leader so that its name and message wheedles its way into the collective subconscious of your market—and stays there Position a follower so that it can occupy a niche not claimed by the leader Avoid letting a second product ride on the coattails of an established one. Positioning also shows you how to: Use leading ad agency techniques to capture the biggest market share and become a household name Build your strategy around your competition's weaknesses Reposition a strong competitor and create a weak spot Use your present position to its best advantage Choose the best name for your product Determine when—and why—less is more Analyze recent trends that affect your positioning. Ries and Trout provide many valuable case histories and penetrating analyses of some of the most phenomenal successes and failures in advertising history. Revised to reflect significant developments in the five years since its original publication, Positioning is required reading for anyone in business today.
