

250 Cases In Clinical Medicine By R R Baliga

This text presents a collection of clinical cases arranged by clinical area, emphasising the key diagnostic features of clinical conditions as commonly presented in clinical examinations in general internal medicine.

Prior to publication of the first edition of *Clinical Medicine of the Dog and Cat*, no other comprehensive small animal veterinary medicine book existed with a comparable amount of relevant illustrated material. This new third edition continues and expands on the revolutionary approach of the previous two editions, now including more than 1,850 highly valuable clinical colour photographs, diagrams, and tables. The third edition of this book has been completely revised and updated. The book is now divided into five color-coded sections – General Approach, Disease of Specific Organ Systems, Multisystemic Disorders, Elements of Therapy and Case Studies. As with the first and second editions of this book the overriding principle of succinct, yet comprehensive text presented in a clear format with an abundance of good quality images remains. Section I: General Approach is completely new and covers medical history and client communication, and common clinical problems. Section II: Specific Organ Systems is organized by body system with chapters structured in a systematic manner that include the definition for each disorder, its causes, clinical features, differential diagnoses, diagnostic methodology, treatment and prognosis, providing readers with easy access to important clinical information. New to this section are chapters covering diseases of the oral cavity and teeth, approach to thoracic radiographs, approach to abdominal radiographs, and disorders of hemostasis. Section III: Multisystemic Disorders covers revised and updated chapters including clinical toxicology, infectious diseases, and immunologic disorders. Section IV: Elements of Therapy covers therapies such as fluid therapy, pain management, nutrition of the critically ill dog and cat and a new chapter on management of the obese dog or cat. Section V: Case Studies includes over 25 case studies that enable the reader to relate the knowledge gained in the book to clinical cases seen in practice. Written by board-certified experts with several case contributions by clinicians in advanced phases of resident training, topics were carefully selected to make this a valuable resource to the general practitioner and also to small animal interns and veterinary students.

A book of over 150 cases which mimic the style and approach of the MRCP PACES exam. The book will equip the candidate attempting to pass the MRCP examination, and will also provide an overview of evidence-based medicine for competency-based training.

This 8.5 x 11 inch workbook and medical text is an outstanding resource for studying Internal Medicine. Dr. Gullberg is double boarded in Internal Medicine and Infectious Diseases and has mentored 100's of medical, PA, and nursing students. Because of his years of experience, Dr. Gullberg knows the best format for learning regarding a core of Internal Medicine topics. Dr. Gullberg has handpicked the most common topics and presents them in an easy to learn format. The majority of the cases presented are patients whom he has seen in the hospital or clinic. The book will be a helpful tool for quick reference and learning. It is an excellent tool for studying for the Boards at any level and there are over 200 topical questions and answers in over 15 categories throughout. The resources for this text are too numerous to count, and many are the physicians and colleagues who have mentored Dr. Gullberg over the last 34 years. Dr. Gullberg has practiced Internal Medicine and Infectious Diseases in a Community Hospital for almost three decades. He is a seasoned lecturer in the area of clinical Internal Medicine, and he continues to teach principles of Internal Medicine on a daily basis. Robert M. Gullberg M.D., F.A.C.P., hales from the Midwest, and grew up in Park Ridge, Illinois. He was educated at Northwestern University with an undergraduate degree in Chemistry. He then attended the University of Illinois Medical School and graduated in 1981. He did his internship and residency in Internal Medicine at the Evanston Hospital, then affiliated with Northwestern University Medical School. He had excellent training there under the tutorege of Dr. Steven Kurtides, Chief of Medicine. That was followed by a Fellowship in Infectious Diseases at Northwestern University in Chicago, Illinois where he was mentored by Dr. John Phair.

From choosing the relevant investigation through to interpretation and its effects on patient management, *Radiology: Clinical Cases Uncovered* provides an overview of the modern imaging department, including radiation and safety considerations, putting radiology in its clinical context. The cases, covering a broad spectrum of disease processes in all body systems, are illustrated with over 250 high-quality images, while the extensive self-assessment section and accompanying explanatory notes consolidates learning and provides invaluable examination practice. *Radiology: Clinical Cases Uncovered* is perfect for medical students, Foundation doctors and radiographers.

The ninth edition of this best-selling textbook of clinical medicine builds even further on its formidable, prize-winning formula of excellence, comprehensiveness and accessibility. 'This book is stunning in its breadth and ease-of-use. It still remains the "gold standard", thorough guide to clinical medicine its forefathers were.' BMA Medical Book Awards judges. New to this edition: 2 new chapters: Global Health and Women's Health. 25 new authors. New online editor, Adam Feather, with a team of young doctors to augment the e-book which accompanies the print book with clinical tips, key learning points, drug tips, learning challenges, case studies and MCQs. Full text redesign to incorporate: New system overview diagrams for clinical chapters. New coloured headings to help identify content relating to disease, management, investigations etc. New icons to aid text navigation. 11 new members and a new co-editor, Senaka Rajapakse, of the International Advisory Board. Edited by Kumar and Clark, clinicians and educators of world-renowned expertise. Authors comprise consultants at the top of their fields, paired with younger doctors closer to the exam experience, to ensure authority and relevance. Enhanced e-book accompanies the print book, for ease of transportation and use on the move. International Advisory Board, led by Professor Janaka de Silva and Professor Senaka Rajapakse, providing guidance for global coverage from across the world. Contributions to the e-book by members of the International Advisory Board to amplify areas of

clinical importance in their parts of the world

The latest addition to the Kumar & Clark family, this thoroughly updated new edition covers more than 200 cases presenting with acute symptoms in the hospital, everything from shingles and breathlessness to chest pain, acute coronary syndromes, poisoning, renal failure and stroke. The authors give clear and concise advice on immediate and further management, management of complications, differential diagnoses, history-taking, tips and pitfalls, alerts, investigations, and prioritization. • More than 200 cases • Remember! boxes • Investigations boxes • Information boxes Edited by Parveen Kumar, CBE, BSc, MD, FRCP, FRCP(Edin) and Michael L Clark, MD, FRCP Enhanced e-book accompanies the print book, for ease of transportation and use on the move. Over 200 cases

A 32-year-old Caucasian lady was admitted to hospital following a collapse at the gym. Her friends described the patient falling to the floor while exercising on the rowing machine, followed by twitching of her arms and legs and a period of being unrousable. You are the medic on duty... 100 Cases in Acute Medicine presents 100 acute conditions commonly seen by medical students and junior doctors in the emergency department, or on the ward, or in the community setting. A succinct summary of the patient's history, examination, and initial investigations, including photographs where relevant, is followed by questions on the diagnosis and management of each case. The answer includes a detailed discussion of each topic, with further illustration where appropriate, providing an essential revision aid as well as a practical guide for students and junior doctors. Making clinical decisions and choosing the best course of action is one of the most challenging and difficult parts of training to become a doctor. These cases will teach students and junior doctors to recognize important clinical symptoms and signs, and to develop their diagnostic and management skills.

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. Realistic patient cases to help sharpen clinical decision-making skills The 60 cases in Case Files: Family Medicine feature realistic clinical scenarios designed to help you enhance and hone your clinical decision-making skills. Each case includes an easy-to-understand discussion correlated to key concepts, definitions of key terms, clinical pearls, and Board-style review questions to reinforce learning. The format allows you to review a patient vignette and then explore/examine the case in a contextual, application-based manner. The book is ideal for both quick-access and slow and careful study.

Designed to help medical students through their exams. Built around the successful 'Essential Revision Notes for MRCP', this title focuses on what is essential learning for medical undergraduates and gives readers an 'all round' knowledge of medicine at this level.

This book will serve as a helpful learning manual for undergraduate and PG students preparing for MBBS, FCPS, MD, MRCP, FRACP or any other equivalent examination in internal medicine or any other related subspecialty. An easy book to learn the approach in common short cases with the basic knowledge and skill, essential for presentation and interpretation in any examination. A complete outline of comprehensive medical encounter including physical examination and interpretation of gathered information to formulate a diagnosis. Provides short notes and brief discussions on various common diseases, helpful for a quick review without going through voluminous textbooks. 800 coloured photographs are there to help the students to develop a good clinical eye. Easy to understand, concise, yet full of necessary information. Some new short cases like "Inferior vena caval obstruction", "Tricuspid stenosis", "Pulmonary regurgitation", "Lobectomy and pneumonectomy", "Rheumatoid lung", "Polycythemia Rubra Vera" including many others are added. Also, new investigations and latest treatment protocols of many diseases are added, such as Filariasis, DVT, Atrial fibrillation, pneumothorax, consolidation, Kala-azar etc.

Macleod's Clinical Diagnosis is an innovative new book complementing its companion sister textbook, the internationally-respected Macleod's Clinical Examination. It is a practical manual of clinical assessment that describes how common presenting problems are evaluated and diagnosed in modern clinical practice. This book will be an invaluable resource for senior medical students and junior doctors as they attempt to make the difficult transition from mastering basic clinical skills to assessing patients in the real world of clinical medicine. The format of the book is as follows: Part 1: The principles of clinical assessment: in addition to defining the scope and remit of the book this initial group of chapters invites readers to reconsider the overall aims of clinical assessment, the contribution that each element of the assessment can make to these aims and how the approach must be adapted to fit the clinical context. It also touches on diagnostic theory and explains some different approaches to diagnosis. Part 2: How to assess common presenting problems: this section forms the core of the book and consists of a series of 'diagnostic guides' covering the major presenting problems in medicine and surgery; these provide the reader with a system for how to use the tools of history-taking, physical examination and routine tests to arrive at a logical differential diagnosis. The guides also cover some limited 'post-diagnosis information' in the form of severity/prognostic indicators. A unique book allowing a reader to apply the skills of clinical examination in the formulation of a differential diagnosis and placing a patient's symptoms in context. Takes a problem-based approach to diagnostic reasoning, reflecting both modern medical and current educational practices. Builds on the clinical skills outlined in the companion Macleod's Clinical Examination textbook.

This book of over 140 cases is designed for candidates preparing for all surgical examinations, whether at undergraduate, postgraduate or exit examination level. It will demystify and simplify the clinical assessment of surgical cases and provides invaluable advice on how to achieve success. The text includes top tips, acronyms and up-to-date summaries of current practice based on the authors' personal experience of surgical examinations. Cases are graded in terms of likely appearance in the examinations. Top tips emphasize specific subjects which cause confusion. The text provides advice on the most appropriate time to finish an examination. Examples of the common procedures and props that

come up in the skill-based examination format are included. This fully revised Second Edition is now in colour and includes photographs of key manoeuvres performed during specific surgical examination routines Includes a new section on communication skills A new co-author in academic surgery joins the project.

The Fenway Guide provides guidance, practical guidelines, and discussions of clinical issues pertinent to the LGBT patient and community. It also focuses on helping healthcare professionals gain a better understanding of the LGBT population, the LGBT life continuum, health promotion and disease prevention, transgender health, and patient communication and the office environment, The Fenway Guide is truly a one-of-a kind comprehensive resource! Written in conjunction with the renowned Fenway Community Health, of Boston, MA, The Fenway Guide to Lesbian, Gay, Bisexual, and Transgender Health is an invaluable resource for healthcare professionals seeking further knowledge and guidance on sexual minority health care.

Rev. ed. of: Davidson's clinical cases. 2008.

Medical curricula change continually to reflect the evolving roles of doctors, changes in treatments and advances in technology. Medicine moves at pace and it takes a practitioner committed to continuing professional development to keep up. This new edition of 250 Cases in Clinical Medicine has been thoroughly updated to reflect the changing form of the Royal College of Physicians' curriculum. Some chapters from the previous edition have been dropped to allow new, more clinically relevant topics to be included. Chapters of symptom-based cases have also been added, as well as a section on acute medical problems and their management. Essential reading for MBBS, PLAB, MRCP (UK), MRCPI, MD (New Zealand, Malaysia, Singapore, India, Pakistan, Sri Lanka and Bangladesh), FRACP, FCCP and postgraduate medical examinations in the USA including USMLE and ABIM. New author team Cases alphabetised by system Procedures for the core medical curriculum added Symptoms-based cases added Emergency presentations added Self-assessment by system added Accompanying e-book on StudentConsult Now in full colour

100 Diagnostic Dilemmas in Clinical Medicine presents 100 real-life scenarios seen in the hospital and community setting. A succinct summary of the patient's history, examination and any initial investigations is followed by a detailed consideration of the diagnosis and management of each case, in the short, medium and, where appropriate, long-term. Making speedy and appropriate clinical decisions, and choosing the best course of action to take as a result, is one of the most important and challenging parts of training to become a doctor. These true-to-life cases will teach students and junior doctors to recognize important medical conditions, and to develop their diagnostic and management skills.

The book is to assist medical students and trainee doctors who are preparing to take clinical examinations that include a long case. There has been a recent review of medical school curricula and all medical schools have recognised the "Long Case as an integral part of the learning and examination process of the medical program. The book explains the scientific and clinical basis of long case assessment and how long case mastery provides the doctor with the confidence and aptitude to practice medicine from clinical assessment to definitive treatment. The book deals with the different subspecialty sections of internal medicine.

Real-Life Cases for the Internal Medicine Clerkship and the USMLE Step 3 "...an excellent internal medicine review book written especially for medical students in their clinical years. It is perfect for clerkships, sub-internships, shelf, and USMLE exams. Sized to fit in the pocket of a white coat for easy portability, this book offers an engaging and high-yield re-view of internal medicine. It promotes active learning, using patient presentations and thought-provoking questions to encourage deeper thinking about clinical problems. The format will be comfortable for anyone who has spent time on the wards learning from patients and engaging in problem-based learning....This book is highly recommended to supplement internal medicine clerkships and sub-internships and to prepare for shelf and USMLE exams."--Yale Journal of Biology & Medicine You need exposure to high-yield cases to excel on the Internal Medicine clerkship and the shelf-exam. Case Files: Internal Medicine presents 60 real-life cases that illustrate essential concepts in Internal Medicine. Each case includes a complete discussion, clinical pearls, references, definitions of key terms, and USMLE-style review questions. With this system, you'll learn in the context of real patients, rather than merely memorize facts. 60 clinical cases, each with USMLE-style questions Clinical pearls highlight key concepts Primer on how to approach clinical problems and think like a doctor Proven learning system improves your shelf-exam scores

Presents trainees with detailed clinical cases for numerous diseases and disorders covering various body systems including respiratory, gastroenterology, neurology and haematology. Questions and answers are provided at the end of each case.

Prepared by residents and attending physicians at Massachusetts General Hospital, this pocket-sized looseleaf is one of the best-selling references for medical students, interns, and residents on the wards and candidates reviewing for internal medicine board exams. In bulleted lists, tables, and algorithms, Pocket Medicine provides key clinical information about common problems in internal medicine, cardiology, pulmonary medicine, gastroenterology, nephrology, hematology-oncology, infectious diseases, endocrinology, and rheumatology. This Fifth Edition is fully updated and includes a sixteen-page color insert with key and classic abnormal images. If you purchased a copy of Sabatine: Pocket Medicine 5e, ISBN 978-1-4511-8237-8, please make note of the following important correction on page 1-36: Oral anticoagulation (Chest 2012;141:e531S; EHJ 2012;33:2719; Circ 2013;127:1916) All valvular AF as stroke risk very high Nonvalv. AF: stroke risk ~4.5%/y; anticoag @ 68% ~ stroke; use a risk score to guide Rx: CHADS2: CHF (1 point), HTN (1), Age =75 y (1), DM (1), prior Stroke/TIA (2) CHA2DS2-VASc: adds 65+74 y (1) =75 y (2), vasc dis. [MI, Ao plaque, or PAD (1)]; ? (1) score 32 @ anticoag; score 1 @ consider anticoag or ASA (? latter reasonable if risk factor age 65-74 y, vasc dis. or ?); antithrombotic Rx even if rhythm control [SCORE CORRECTED] Rx options: factor Xa or direct thrombin inhib (non-valv only; no monitoring required) or warfarin (INR 2-3; w/ UFH bridge if high risk of stroke); if Pt refuses anticoag, consider ASA + clopi or, even less effective, ASA alone (NEJM 2009;360:2066) Please make note of this correction in your copy of Sabatine: Pocket Medicine 5e immediately and contact LWW,,s Customer Service Department at 1.800.638.3030 or 1.301.223.2300 so that you may be issued a corrected page 1-36. You may also download a PDF of page 1-36 by clicking [HERE](#). All copies of Pocket Medicine, 5e with the ISBN: 978-1-4511-9378-7 include this correction.

This new book is a highly structured case-based text to help candidates pass the new MRCP PACES (Practical Assessment of Clinical Examination Skills) examination. Its contents correspond to the five clinical stations of the exam and the systems that each contains. Each system is covered in a structured way, providing an examination scheme followed by a series of detailed case-based clinical scenarios. The book also covers the communication and history-taking skills and ethics stations which are new to this exam. Designed to thoroughly prepare candidates for the Practical Assessment of Clinical Examination Skills (PACES). Written as a systematic text which exactly complements the format of the exam: Station 1: Respiratory System, Abdominal System Station 2: History Taking Skills Station 3:

Cardiovascular System, Nervous System Station 4: Communication Skills and Ethics Station 5: Skin, Locomotor System, Eyes, Endocrine Uses a practical, user-friendly, case-based format Each system in Stations 1,3 and 5 starts with a detailed examination scheme followed by a unique Recognition-Interpretation-Discussion format for each case. This has been carefully designed to make preparing for PACES efficient and maximise marks on the day of the exam. Stations 2 and 4 both start with introductions to the history taking and communication skills tested in the exam. Cases then follow, each comprising boxed history taking or communication skills/ethics points relating to the case followed by questions and answers The book is an up to date, detailed medical text for PACES candidates, striking the balance between the need to be concise and the needs to carefully explain concepts which candidates find difficult. Suitable as a 'ward adjunct' in the months and weeks prior to PACES, and may also be used for quick reference close to the exam Recognises the needs of busy doctors preparing for the exam Suitable for medical students approaching final MB Suitable also for PLAB candidates, FRACP, etc A helpful learning manual for undergraduates and PG students preparing for FCPS, MD, MRCP, FRACP or any other equivalent exam in Internal Medicine. A completely new section (Section B) is included. The first section (Section A) contains short clinical cases, followed by relevant questions, their answers and brief discussions. Section B contains Data Interpretation, ECG, X-ray, coloured photograph of common diseases and few instruments, which are helpful for undergraduate students. An easy book to learn the approach to diagnosis and management of common short cases. Cases have been described in the way a student is expected to approach a medical situation in examinations as well as in day-to-day practice. Provides short notes on various common diseases, which will help the students to get a comprehensive knowledge without going through extensive textbooks. Have about 700 colored photographs and a few X-rays, CT scans, etc. to help students to develop a good clinical eye. Easy to understand, concise, yet full of necessary information.

The 3rd edition of PACES for the MRCP has been fully revised and updated throughout to retain its pole position as the textbook to accompany core medical training (CMT) and prepare candidates for success in the Practical Assessment of Clinical Examination Skills and a future specialty career. Features Fully revised for the new Station 5 and completely updated throughout. Promotes understanding and deeper learning of modern medicine applicable to PACES and the specialist registrar. Emphasis on clinical assessment – history-taking, examination and communication skills – equipping candidates with appropriate differential diagnoses from which to develop the right diagnosis. Encourages candidates to question why a diagnosis has arisen and consider its consequences. For example, 'Heart failure' is a not a diagnosis until a candidate has considered the differential diagnoses of breathlessness and decided why heart failure is most likely, and then considered its cause (not always ischaemic heart disease), its presentation (acute, chronic, left or right ventricular or both) and, most importantly, the effects of it and its treatments on a patient's life. This 3rd edition of PACES for the MRCP continues to provide fully revised, up-to-date, evidence-based coverage of investigations and treatments. Whilst the emphasis of PACES is on clinical skills, candidates who understand when, for example, a patient with rheumatoid arthritis might benefit from a biologic agent and how this will influence inflammatory disease, is better equipped for success. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5 stations of the PACES exam – respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case – excellent preparation for the exam Boxed tips highlight vital information – helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added, bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam

Cases for PACES provides a concise study aid to Part II of the MRCP examination; the Practical Assessment of Clinical Examination Skills or PACES. The new edition of this very popular study guide has been completely updated, and now includes scenarios for Station 5, introduced in October 2009. Featuring a 'case study' format that matches the style of the exam, it includes all the essential information - perfect for on-the-ward revision and study. Written by authors who remember their own PACES examination, their experience in learning and teaching PACES is condensed to provide exactly what you need to know to pass. With its informal style, Cases for PACES is also ideal for self-directed learning in groups, and will help you hone your clinical skills and boost your confidence in the run-up to the examination. For more titles to help you prepare for MRCP examinations go to <http://www.wileymedicalstudent.com/> www.wileymedicaleducation.com/a

This practical self-assessment text tests examination candidates' underlying knowledge of clinical medicine and diagnostic skills. Each of the 250 cases reflects the exam setting, and focuses on what each candidate needs to know to pass.

This book is an invaluable resource with 400 self-assessment cases and data interpretation questions covering all aspects of internal medicine. It has great breadth of coverage, superb illustration, lively presentation, precise answers and detailed discussion.

A new, fully updated edition of Baliga's very popular collection of short cases arranged by clinical area, emphasising the key diagnostic features of clinical conditions as commonly presented in the short-case part of the Final MB and MRCP examinations. Also included are likely instructions or commands expected from the examiner for each condition, and the key points which the candidate must tell the examiner. A must-have for the final-year undergraduate and trainee doctor. From customer reviews of the previous edition: 'This book is the most useful guide that money can buy for the final exams in the current MBChB undergraduate course. It covers important areas of clinical medicine in a question based format and highlights classical scenarios. The questions raised are classical of examiners in the long and short case examinations. This is a must buy for any undergraduate medical student!!!' 'The book is a must during the period that the young doctor or student is on the wards. It allows one to focus on the important physical findings and the relevant clinical pearls associated with the different medical conditions met... It discusses important physical findings and their diagnostic importance. I have found it useful in preparing for attending ward rounds and also for sharpening my clinical skills. The discussion section is well organised such that undergraduates as well as postgraduates can benefit and the material is up to date with good references for further reading.' 'Excellent preparation for finals as well the MRCP ...MUST HAVE before MRCP PACES.' Features Ideal for use in the ward. Each of the 250 cases presents a disease or topic which is covered consistently to address: ? salient features ? history ? examination ? diagnosis ? questions covering investigations and differentiations ? advanced-level questions ? management. New to this edition: Over 350 new images Enhanced advanced-level questions Many more tables

This title is written for MRCP candidates preparing for PACES exam in UK and rest of world. Clinical examinations in the OSCE style of marked stations are daunting for all students, whether undergraduates or MRCP candidates. The recent introduction of the 5-station PACES (Progressive Assessment of Clinical Examination Skills) exam inspired a great deal of apprehension, so the appearance of the first edition of Hall's PACES for MRCP was greatly welcomed by candidates and became an immediate success. This new edition builds on the book's reputation. It

provides, in one colourful and attractive volume, complete coverage of all the most common medical cases that will be covered in PACES and similar exams. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5 stations of the PACES exam - respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case - excellent preparation for the exam Boxed tips highlight vital information - helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added, bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam

For over half a century Davidson's Principles and Practice of Medicine has informed and educated students, doctors and other health professionals all over the world, providing a comprehensive account of the practice of medicine. Davidson's Essentials of Medicine provides the core content of the main textbook in a condensed format which will be invaluable whenever you are on the move – whether commuting, travelling between training sites, or on electives. This book provides a distillation of the core information required for clinical studies in medicine. While retaining the acclaimed readability of the main textbook it presents the key information in a format more appropriate for practical clinical work. The contents have been carefully selected by a team of junior doctors, emphasising only the topics that will be essential for clinical studies. The book includes additional chapters of content to aid clinical practice including a practically-focussed chapter on therapeutics and a useful guide to interpreting major clinical investigations. The text draws directly on the depth and breadth of experience of the Davidson's authors and its International Advisory Board. Updated to include key changes and new illustrations included in Davidson's Principles and Practice of Medicine.

250 Cases in Clinical Medicine E-BookElsevier Health Sciences

Oxford Cases in Medicine and Surgery, second edition, teaches students a hypothesis-driven, logical step-by-step approach to diagnosis when faced with each of 29 common patient presentations. This approach mirrors that used by successful clinicians on the wards, challenging students with questions at each stage of a case (history-taking, examination, investigation, management). In tackling these questions, students understand how to critically analyse information and learn to integrate their existing knowledge to a real-life scenario from start to finish. Each chapter focuses on a common presenting symptom (e.g. chest pain). By starting with a symptom, mirroring real life settings, students learn to draw on their knowledge of different physiological systems - for example, cardiology, respiratory, gastroenterology - at the same time. All the major presenting symptoms in general medicine and surgery (mapped to UK medical school curricula) are covered, together with a broad range of pathologies. This book is an essential resource for all medicine students, and provides a modern, well-rounded introduction to life on the wards. Ideal for those starting out in clinical medicine and an ideal refresher for those revising for OSCEs and finals.

The definitive evidence-based introduction to patient history-taking NOW IN FULL COLOR For medical students and other health professions students, an accurate differential diagnosis starts with The Patient History. The ideal companion to major textbooks on the physical examination, this trusted guide is widely acclaimed for its skill-building, and evidence based approach to the medical history. Now in full color, The Patient History defines best practices for the patient interview, explaining how to effectively elicit information from the patient in order to generate an accurate differential diagnosis. The second edition features all-new chapters, case scenarios, and a wealth of diagnostic algorithms. Introductory chapters articulate the fundamental principles of medical interviewing. The book employs a rigorous evidenced-based approach, reviewing and highlighting relevant citations from the literature throughout each chapter. Features NEW! Case scenarios introduce each chapter and place history-taking principles in clinical context NEW! Self-assessment multiple choice Q&A conclude each chapter—an ideal review for students seeking to assess their retention of chapter material NEW! Full-color presentation Essential chapter on red eye, pruritus, and hair loss Symptom-based chapters covering 59 common symptoms and clinical presentations Diagnostic approach section after each chapter featuring color algorithms and several multiple-choice questions Hundreds of practical, high-yield questions to guide the history, ranging from basic queries to those appropriate for more experienced clinicians

Health Sciences & Professions

An integrated approach to teaching basic sciences and clinical medicine has meant that medical students have been driven to a range of basic science textbooks to find relevant information. Medical Sciences is designed to do the integration for you. In just one book, the diverse branches of medical science are synthesised into the appropriate systems of the human body, making this an invaluable aid to approaching the basics of medicine within in a clinical context. . An integrated approach to teaching basic sciences and clinical medicine has meant that medical students have been driven to a range of basic science textbooks to find relevant information.
