Once upon a time Linus Torvalds was a skinny unknown, just another nerdy Helsinki techie who had been fooling around with computers since childhood. Then he wrote a groundbreaking operating system and distributed it via the Internet -- for free. Today Torvalds is an international folk hero. And his creation LINUX is used by over 12 million people as well as by companies such as IBM. Now, in a narrative that zips along with the speed of e-mail, Torvalds gives a history of his renegade software while candidly revealing the quirky mind of a genius. The result is an engrossing portrayal of a man with a revolutionary vision, who challenges our values and may change our world.

In a riveting exploration of the power the past wields over the present, critically acclaimed author Antoinette van Heugten writes the story of a woman whose child's life hangs in the balance, forcing her to confront the roots of her family's troubled history in the dark days of World War II… It's the stuff of nightmares: Nora de Jong returns home from work one ordinary day to find her mother has

been murdered. Her infant daughter is missing. And the only clue is the body of an unknown man on the living-room floor, clutching a Luger in his cold, dead hand. Frantic to find Rose, Nora puts aside her grief and frustration with the local police to start her own search. But the contents of a locked metal box she finds in her parents' attic leave her with as many questions as answers—and suggest the killer was not a stranger. Saving her daughter means delving deeper into her family's darkest history, leading Nora half a world away to Amsterdam, where her own unsettled past and memories of painful heartbreak rush back to haunt her. As Nora feverishly pieces together the truth from an old family diary, she's drawn back to a city under Nazi occupation, where her mother's alliances may have long ago sealed her own–and Rose's—fate.
