

3rd Sem Diploma In Civil Engineering File Type

This volume contains papers and reports from the Conference held in Romania, June 2000. The book covers many topics, for example, place, role and content of geotechnical engineering in civil, environmental and earthquake engineering.

Modern Surveying is unimaginable without the use of electronic equipment and information technology. Surveying with conventional systems has been completely replaced with advanced automated systems. Total Station, Global Positioning System (GPS), Remote Sensing and Geographical Information System (GIS) have all become an inextricable part of surveying. Advanced Surveying: Total Station, GIS and Remote Sensing provides a thorough working knowledge of these technologies.

This text on building materials includes discussion of structural clay products, rocks and stones, wood, materials for making concrete, ferrous and non-ferrous metals, and miscellaneous materials.

In recent years the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE), the International Association for Engineering Geology and Environment (IAEG), and the International Society for Rock Mechanics (ISRM) have concluded a Cooperation Agreement, leading to the foundation of the Federation of International Geo-engineering

“Materials Of Construction-II” is intended to be used as a text book for Second Semester Diploma in Civil Engineering and is designed for comprehensively covering all topics relevant the subject as per the Syllabus Prescribed by the Board of Technical Education, Karnataka. The book contains six chapters. Chapter 1 - Cement, manufacture of cements, types and tests on cement discussed. Chapter 2 & Chapter 3 - deals with aggregates, tests of aggregates, mortar and its types. Chapter 4 - in this chapter concept of cement concrete, types, method of placing, compacting, curing, discussed. Chapter 5 - in this chapter paints and its types discussed. Chapter 6 - Consists of new modern materials used in Civil Engineering works and its properties. At the end of each chapter, Points to remember, Fill up the blanks & Descriptive type questions is given. To enhance the utility of book, Multiple Choice Questions are given towards the end of the book along with answers. This should benefit the students preparing for Common Entrance Test. It is hoped that this book will be immense use to teachers and students of Polytechnics. I wish to express my gratitude to MEI Polytechnic, Bangalore for providing me an opportunity to bring out this text book. I am grateful to Sri Nitin S.Shah, M/s Sapna Book House (P) Ltd., Bangalore for publishing this book within a reasonable time. I am thankful to M/s Datalink, Bangalore for neatly typing the manuscript of this book. I also express my sincere thanks to Sri C.Chandrashekar, HOD (Civil) and colleagues for their encouragement. The readers are welcome to send their valuable comments and suggestions for further improvement of this book.

Volume two of Leading Issues in e-Learning Research brings together a collection of the latest ideas in the area of e-Learning research. e-Learning is undergoing a revolution. The expectations of X and Y generation learners are changing the way we teach. They want more interactive, social and mobile course presentation formats which are resulting in novel teaching methods like flipped classrooms, new tools for learning, apps, social learning and augmented reality. Also, the rise of MOOCs (Massive Open Online Courses) can offer free education for learners around the world. Behind the trends is an ever more globalised, complex and interconnected world which has led to new expectations regarding training, especially in higher education settings: students need to be digitally literate and able to manage uncertainty through creative thinking. This is a profound change which draws its inspiration from the world of business, fostering pedagogical innovation to create new e-Learning initiatives. Melanie Ciussi has put together an excellent collection of leading research papers on the pedagogical innovations that are part of this digital revolution. The general reader as well as researchers, teachers and students will find this book very rewarding."

This book deals with good ventilation, thermal comfort, and acoustic requirements when planning a building. As well as satisfying minimum standards and the regulations of local authorities, economics and future expansions are considered. The book discusses building drawings created through computer aided design. To understand the commands of AutoCAD and use them, the sequential procedure and steps involved while drawing plan, elevation and section are stored as screen captures and collection of these screen shots are placed in a CD which is enclosed with this book. The practising engineer will also find it as an excellent reference book.

Um instrumento de trabalho prático e de consulta que surge da necessidade de congregar, num único volume de consulta rápida e fácil, o conjunto de diplomas que constitui, atualmente, o enquadramento estrutural do sistema financeiro de Angola e da atividade nele exercida. Esta colectânea visa, fundamentalmente, os aspectos institucionais (onde se agrupam os diplomas relativos à função supervisora e às diversas vertentes relacionadas com o exercício da actividade financeira) e os aspectos materiais agrupando diplomas diversos, com especial destaque para os que apresentam uma relevância transversal a todo o ordenamento jurídico, como é o caso da Lei das Cláusulas Contratuais Gerais ou da Lei de Defesa do Consumidor. "A publicação desta vasta e bem organizada colectânea de legislação, cobrindo todas as vertentes de intervenção do sistema financeiro, constitui uma iniciativa merecedora de aplauso, à qual nos associamos com elevado sentido de responsabilidade. A obra vai reforçar o acesso à informação necessária para dar resposta às diversas solicitações dos agentes económicos e a todos permitirá uma visão dinâmica do conjunto de diplomas que estruturam o sistema e a actividade, incorporando um valioso suporte de consulta rápida." Marcel Kruse, Director Geral Executivo do Banco Kuanza Investimento, S.A. Estrutura da obra: Função

supervisora; Exercício da atividade; Instituições financeiras não bancárias; Capital social; Operações bancárias; Operações de seguros; Operações cambiais; Legislação complementar Público Alvo: a obra faculta aos alunos universitários, profissionais do setor e, em geral, a todos os interessados, uma forma simples e articulada de conhecer os diplomas fundamentais do sistema financeiro angolano.

Primarily aimed to be an introductory text for the first course in surveying for civil, architecture and mining engineering students, this book, now in its second edition, is also suitable for various professional courses in surveying. Written in a simple and lucid language, this book at the outset, presents a thorough introduction to the subject. Different measurement errors with their types and nature are described along with measurement of horizontal distances and electronic distances measurements. This text covers in detail the topics in levelling, angles and directions and compass survey. The functions and uses of different instruments, such as theodolites, tacheometers and stadia rods are also covered in the text. Besides, the book elaborates different fields of surveying, such as plane table surveying, topographical surveying, construction surveying and underground surveys. Finally, the book includes a chapter on computer applications in surveying. KEY FEATURES : Includes about 400 figures to explain the fundamentals of surveying. Uses SI units throughout the book. Offers more than 170 fully-solved examples including the questions generated from premier universities. Provides a large number of problems and answers at the end of each chapter. Incorporates objective questions from AMIE exams and Indian Engineering Services exams.

Regionalization and Harmonization in TVET contains the papers presented at the 4th UPI International Conference on Technical and Vocational Education and Training (TVET 2016, Bandung, Indonesia, 15-16 November 2016). 1. Standardization in Regionalization and Harmonization 2. Skill and Personal Development 3. Social and Cultural Issues 4. Teaching Innovations in TVET 5. Innovations in Engineering and Education.

The success of any concrete structure depends on the designer's sound knowledge of concrete and its behaviour under load, under temperature and humidity changes, and under exposure to the relevant environment and industrial conditions. This book gives students a thorough understanding of all aspects of concrete technology from first principles. It covers concrete ingredients, properties and behaviour in the finished structure with reference to national standards and recognised testing methods used in Britain, the European Union and the United States. Examples and problems are given throughout to emphasise the important aspects of each chapter. An excellent coursebook for all students of Civil Engineering, Structural Engineering and Building at degree or diploma level, Concrete Technology will also be a valuable reference book for practising engineers in the field.

A obra Direito Civil Brasileiro, v. 3, de Carlos Roberto Gonçalves, apresenta os principais aspectos e desdobramentos doutrinários e jurisprudenciais sobre contratos e atos unilaterais do direito civil. O autor trata de temas como: formação dos contratos, classificação dos contratos, vícios redibitórios, evicção, contratos aleatórios, cotrat preliminar, extinção do contrato, contratos de várias espécies, cláusulas especiais. Além de explorar o instituto dos atos unilaterais, promessa de recompensa, gestão de negócios, pagamento indevido, pagamento indevido, enriquecimento sem causa, títulos de

créditos e contratos especiais. Obra indicada para alunos de graduação, pós-graduação e profissionais da área.
