Emerging in the 1940s, the first cybernetics—the study of communication and control systems—was mainstreamed under the names artificial intelligence and computer science and taken up by the social sciences, the humanities, and the creative arts. In *Emergence and Embodiment*, Bruce Clarke and Mark B. N. Hansen focus on cybernetic developments that stem from the second-order turn in the 1970s, when the cyberneticist Heinz von Foerster catalyzed new thinking about the cognitive implications of self-referential systems. The crucial shift he inspired was from first-order cybernetics' attention to homeostasis as a mode of autonomous self-regulation in mechanical and informatic systems, to second-order concepts of self-organization and autopoiesis in embodied and metabiotic systems. The collection opens with an interview with von Foerster and then traces the lines of neocybernetic thought that have followed from his work. In response to the apparent dissolution of boundaries at work in the contemporary technosciences of emergence, neocybernetics observes that cognitive systems are operationally bounded, semi-autonomous entities coupled with their environments and other systems. Second-order systems theory stresses the recursive complexities of observation, mediation, and communication. Focused on the neocybernetic contributions of von Foerster, Francisco Varela, and Niklas Luhmann, this collection advances theoretical debates about the cultural, philosophical, and literary uses of their ideas. In addition to the interview with von Foerster, *Emergence and Embodiment* includes essays by Varela and Luhmann. It engages with Humberto Maturana's and Varela's creation of the concept of autopoiesis, Varela's later work on neurophenomenology, and Luhmann's adaptations of autopoiesis to social systems theory. Taken together, these essays illuminate the shared commitments uniting the broader discourse of neocybernetics. Contributors. Linda Brigham, Bruce Clarke, Mark B. N. Hansen, Edgar Landgraf, Ira Livingston, Niklas

Luhmann, Hans-Georg Moeller, John Protevi, Michael Schiltz, Evan Thompson, Francisco J. Varela, Cary Wolfe

This is the graphic, first-hand story of the maiden voyage and disastrous sinking of the RMS Titanic, told by the survivors themselves. The story of the sinking of the great liner has been told countless times since that fateful night on April 14, 1912, by historians, novelists, and film producers alike, but no account is as graphic or revealing as those from the people who were actually there. Through survivors' tales and contemporary newspaper reports from both sides of the Atlantic, here are eyewitness accounts full of details that range from poignant to humorous, stage by stage from the liner's glorious launch in Belfast to the somber sea burial services of those who perished on her first and only voyage. In this book, the voices of the survivors share their own stories, as well as the official records, press reports, and investigations into what went wrong that night.

In recent years, endurance athletes, bodybuilders, and long-distance runners such as Ruth Heidrich, Scott Jurek, Rich Roll, Brendan Brazier, Robert Cheeke, and many others have destroyed the notion that you cannot be a top-flight competitor on a plant-based diet and upended the stereotype that veganism means weakness, placidity, and passivity. But are there deeper connections between veganism and running, for example, that reach beyond attaining peak performance to other aspects of being vegan: such as living lightly on the land, caring for other-than-human life, and connecting to our animal bodies? The fifteen writers in *Running, Eating, Thinking* wager that there are, and they explore in manifold ways how those connections might be made. From coping with cancer to reflecting on the need of the confined animal to run free, from Buddhist ideas of nonviolence to harnessing the breath for singing and running, and from extolling the glories of lentils to committing oneself to the long run in animal activism, *Running, Eating, Thinking* is a pioneering anthology that may redefine your thinking about veganism and running.

Side by side with these, we have chapters on the

importance to a DBA of communicating clearly with their co-workers and business leaders, presenting data as useful information that the business can use to make decisions, adopting a more Agile approach to their work, and sound project management skills. The resulting book, Tribal SQL, is a reflection of how a DBA's core and long-standing responsibilities sit alongside new thinking and fresh ideas about where the DBA role is going, and what it means to be a DBA in today's businesses.

Based on face-to-face interviews with students across the country, *Sex and the Soul* achieved national acclaim, illuminating the as-yet-unexplored struggles of college students navigating the lines of faith and sexuality. Now, in this updated edition, Freitas reflects on the hundreds of conversations she has had with students since the book was first published in an all-new afterword, and offers practical advice for young people struggling with issues of sex and spirituality and for the adults giving them guidance.

While the law of evidence has dominated jurisprudential treatment of the subject, evidence is in truth a multi-disciplinary subject. This book is a collection of materials concerned not only with the law of evidence, but also with the logical and rhetorical aspects of proof; the epistemology of evidence as a basis for the proof of disputed facts; and scientific aspects of the subject. The editor raises issues such as the philosophical basis for the use of evidence; whether courtroom proof is essentially mathematical or non-mathematical; and the use of different theories of probability in legal reasoning.

In *Consoling Thoughts on God and Providence*, St. Francis de Sales, beloved Doctor of the Church, speaks of how God wants only good for us, and why we should have great confidence in His merciful love. This treasure of spirituality beautifully explains God's love for the sinner, how great His joy is upon the return of just one lost sheep, and how God's mercy extends even towards the damned. St. Francis encourages us to conform ourselves to God's will, and teaches us to abandon ourselves to the Lord who so desires our hearts. Readers of *Consoling Thoughts* will experience firsthand why St. Francis de Sales (1567-1622) is known to history as the Gentle Saint. St. Francis was Bishop of Geneva and a tireless preacher, who yet made time to correspond with numerous souls who wrote him for his insight and guidance. His

Consoling Thoughts are compiled from these letters as well as from his other spiritual works.

With the advance of biomedicine, certain individuals and groups are vulnerable because of their incapacities to defend themselves. The International Bioethics Committee as a UNESCO working group has for the last several years dedicated to deepen this principle of human vulnerability and personal integrity. This book serves to supplement this effort with a religious perspective given a great number of the world's population is affiliated with some religious traditions. While there is diversity within each of these traditions, all of them carry in them the mission to protect the weak, the underprivileged, and the poor. Thus, here presented is a collection of papers written by bioethics experts from six major world religions—Buddhism, Christianity, Confucianism, Hinduism, Islam and Judaism—who were gathered to discuss the meaning and implications of the principle of vulnerability in their respective traditions.

After the collapse of communism, some thirty countries scrambled to craft democratic constitutions. Surprisingly, the constitutional model they most often chose was neither the pure parliamentary model found in most of Western Europe at the time, nor the presidential model of the Americas. Rather, it was semi-presidentialism--a rare model known more generally as the "French type." This constitutional model melded elements of pure presidentialism with those of pure parliamentarism. Specifically, semi-presidentialism combined a popularly elected head of state with a head of government responsible to a legislature. Borrowing Constitutional Designs questions the hasty adoption of semi-

presidentialism by new democracies. Drawing on rich case studies of two of the most important countries for European politics in the twentieth century--Weimar Germany and the French Fifth Republic--Cindy Skach offers the first theoretically focused, and historically grounded, analysis of semi-presidentialism and democracy. She demonstrates that constitutional choice matters, because under certain conditions, semi-presidentialism structures incentives that make democratic consolidation difficult or that actually contribute to democratic collapse. She offers a new theory of constitutional design, integrating insights from law and the social sciences. In doing so, Skach challenges both democratic theory and democratic practice. This book will be welcomed not only by scholars and practitioners of constitutional law but also by those in fields such as comparative politics, European politics and history, and international and public affairs.

While always well-stocked with clean sheets, Lily Hill is not expecting visitors. At least not in the numbers that descend upon her genteely dilapidated New England ancestral home in the summer of '89. Brother Harvey arrives first, thrice-widowed and eager for company; then perennially self-dramatizing niece Ginger and her teenaged daughter Betsy; then Alden, just laid-off from Wall Street, with his wife Becky, and their rowdy brood of four . . . As summer fades into fall, it becomes clear that no one intends to leave. But just as Lily's industrious hospitality gives way to a somewhat strained domestic routine, the Hill clan must face new challenges together. Brimming with wit and a compendium of Yankee curiosities, *The Hills at Home* is an irresistible modern take on an old-fashioned comedy of manners.
