The March 2018 British National Formulary (BNF 75) is your essential reference book for prescribing, dispensing, and administering medicines.

Bridging the gap between physics and astronomy textbooks, this book provides step-by-step physical and mathematical development of fundamental astrophysical processes underlying a wide range of phenomena in stellar, galactic, and extragalactic astronomy. The book has been written for upper-level undergraduates and beginning graduate students, and its strong pedagogy ensures solid mastery of each process and application. It contains over 150 tutorial figures, numerous examples of astronomical measurements, and 201 exercises. Topics covered include the Kepler–Newton problem, stellar structure, binary evolution, radiation processes, special relativity in astronomy, radio propagation in the interstellar medium, and gravitational lensing. Applications presented include Jeans length, Eddington luminosity, the cooling of the cosmic microwave background (CMB), the Sunyaev–Zeldovich effect, Doppler boosting in jets, and determinations of the Hubble constant. This text is a stepping stone to more specialized books and primary literature. Password-protected solutions to the exercises are available to instructors at www.cambridge.org/9780521846561.

Roxanne Stokes doesn't believe in love. She does, however, believe in the sexy-as-sin stranger who literally knocks her off her feet in front of a nightclub. The chemistry sparking between them takes her breath away, and she'll do anything to ease the pain in his eyes...until she realizes the handsome stranger is her best friend's older brother who's just come home from war. Ian Walser had no idea the gorgeous woman he slept with the night of his homecoming party was his little sister's best friend—or that she'd be gone before morning. Roxanne's touch soothes him in a way nothing else can, and he's not ready to walk away from that yet. Not when spending time with her gave Ian a glimpse of everything he's ever wanted. When his sister unwittingly pushes them together, he sees his chance. But convincing a woman who doesn't believe in love that she's his Mrs. Right might be harder than any mission Ian's undertaken. Good thing this soldier likes a challenge... Each book in the Come Undone series is STANDALONE: * Wrong Bed, Right Guy * Chasing Mrs. Right * Two Wrongs, One Right * Seducing Mr. Right

In Mordin On Time, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). Mordin On Time enables the reader to construct their own speed ratings wherever they live.

"Subramaniam examines how science and religion have come together to propel a vision of the modern Indian nation, and in particular, a Hindu nationalist vision of India. Five illustrative cases of bionationalism animate this book: Hindu nationalist

narratives of scientific development, colonial law and sexual politics in India, surrogacy and women's roles, the politics of caste and race in the language of genes and genomics, and the alignment of environmental scientists and religious activists. Subramaniam demonstrates that the politics of gender, race, class, caste, sexuality, and indigeneity are deeply implicated in the projects and narratives of the nation. At the same time, she seeks spaces of possibility and new narratives for planetary salvation that defy binary logics, incorporating science and religion, human and nonhuman, and nature and culture"--
