A groundbreaking, research-based guide that sheds new light on why young people make dangerous choices--and offers solutions that work Texting while driving. Binge-drinking. Unprotected sex. There are plenty of reasons for parents to worry about getting a late-night call about their teen. But most of the advice parents and educators hear about teens is outdated and unscientific--and simply doesn't work. Acclaimed adolescent psychiatrist and educator Jess Shatkin brings more than two decades' worth of research and clinical experience to the subject, along with cutting-edge findings from brain science, evolutionary psychology, game theory, and other disciplines -- plus a widely curious mind and the perspective of a concerned dad himself. Using science and stories, fresh analogies, clinical anecdotes, and research-based observations, Shatkin explains: * Why "scared straight," adult logic, and draconian punishment don't work * Why the teen brain is "born to be wild"--shaped by evolution to explore and take risks * The surprising role of brain development, hormones, peer pressure, screen time, and other key factors * What parents and teachers can do--in everyday interactions, teachable moments, and specially chosen activities and outings--to work with teens' need for risk, rewards and social acceptance, not against it. "Presents new research, as well as insights as a clinician and a father....This book is a clear argument to stop putting ourselves in our children's shoes, and to try putting ourselves in their minds, instead." --The Washington Post "With stories (personal and professional), neuroscience and cognition, psychology and clinical experience Dr. Shatkin offers an abundance of understandable, engaging and actionable information. He explains why and shows how. We can reduce risk in the adolescents we love and teach, but only if we know to how to do so and then do it. Born To Be Wild shows us the way to succeed." --Psychology Today Winner, National Parenting Product Award 2017 Use the neuroscience of emotional learning to transform your teaching. How can the latest breakthroughs in the neuroscience of emotional learning transform the classroom? How can teachers use the principles and practices of positive psychology to ensure optimal 21st-century learning experiences for all children? Patty O'Grady answers those questions. *Positive Psychology in the Elementary School Classroom* presents the basics of positive psychology to educators and provides interactive

resources to enrich teachers' proficiency when using positive psychology in the classroom. O'Grady underlines the importance of teaching the whole child: encouraging social awareness and positive relationships, fostering self-motivation, and emphasizing social and emotional learning. Through the use of positive psychology in the classroom, children can learn to be more emotionally aware of their own and others' feelings, use their strengths to engage academically and socially, pursue meaningful lives, and accomplish their personal goals. The book begins with Martin Seligman's positive psychology principles, and continues into an overview of affective learning, including its philosophical and psychological roots, from finding the "golden mean" of emotional regulation to finding a child's potencies and "golden self."

O'Grady connects the core concepts of educational neuroscience to the principles of positive psychology, explaining how feelings permeate the brain, affecting children's thoughts and actions; how insular neurons make us feel empathy and help us learn by observation; and how the frontal cortex is the hall monitor of the brain. The book is full of practical examples and interactive resources that invite every educator to create a positive psychology classroom, where children can flourish and reach their full potential. #1 New York Times Bestseller Winner of the 2014 Living Now Book Award for Inspirational Memoir "An enormously smart, clear-eyed, brave-hearted, and quite personal look at the benefits of meditation." —Elizabeth Gilbert Nightline anchor Dan Harris embarks on an unexpected, hilarious, and deeply skeptical odyssey through the strange worlds of spirituality and self-help, and discovers a way to get happier that is truly achievable. After having a nationally televised panic attack, Dan Harris knew he had to make some changes. A lifelong nonbeliever, he found himself on a bizarre adventure involving a disgraced pastor, a mysterious self-help guru, and a gaggle of brain scientists. Eventually, Harris realized that the source of his problems was the very thing he always thought was his greatest asset: the incessant, insatiable voice in his head, which had propelled him through the ranks of a hypercompetitive business, but had also led him to make the profoundly stupid decisions that provoked his on-air freak-out. Finally, Harris stumbled upon an effective way to rein in that voice, something he always assumed to be either impossible or useless: meditation, a tool that research suggests can do everything from lower your blood pressure to essentially rewire your brain. *10% Happier* takes readers on a ride from the outer reaches of neuroscience to the inner sanctum of network news to the bizarre fringes of America's spiritual scene, and leaves them with a takeaway that could actually change their lives.

Chained up in the hold of a French warship, Lusignan's only hope of escape rests with his captor - Captain Paul. His prisoner is an innocent man, framed because he fell in love with a Count's daughter. Once the truth is revealed, Paul and Lusignan return to France, determined to seek justice. Inspired by the real life of American Revolutionary War hero John Paul Jones, "Captain Paul" is a rollicking melodrama, packed with action and romance. A fine precursor to Dumas' later classics, it's especially recommended for fans of naval adventures, like C.S. Forester's "Hornblower" series. Alexandre Dumas (1802 - 1870) was a hugely popular 19th Century French writer. Born of mixed French and Haitian heritage, Dumas first rose to prominence in Paris as a playwright, but later gained international fame with his historical fiction. Often co-authored with other writers, these stories wove together swashbuckling adventure, romance, and real events from France's past. Among the best known are "The Three Musketeers", and its sequels "Twenty Years After", and "Le Vicomte de Bragelonne: Ten Years Later". Set across four decades, this trilogy follows the rise of the dashing D'Artagnan—from hot-headed

influence on how we learn and which paths we take in life.”—Bill Gates, GatesNotes After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught *The 7 Habits of Highly Effective People* to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a
