A cutting-edge guide to quantum trading Original and thought-provoking, Quantum Trading presents a compelling new way to look at technical analysis and will help you use the proven principles of modern physics to forecast financial markets. He relates his work to that of legendary trader W.D. Gann and reveals how Gann's somewhat esoteric theories are consistent with his applications of Einstein's theory of relativity and quantum theory to price behavior. Applies concepts from modern science to financial market forecasting Shows how to generate support/resistance areas and identify potential market turning points Addresses how non-linear approaches to trading can be used to both understand and forecast market prices While no trading approach is perfect, the techniques found within these pages have enabled the author to achieve a very attractive annual return since 2002. major markets might make highs and lows through 2020. Written for those who might be unfamiliar with either commodities or astrology, Susan includes "101" chapters on each topic, as well as an astrological glossary. In addition, she covers how astrology can help you discover which markets you might be most attuned to trading. When Markets Peak and Bottom Susan researched six major commodity futures markets-S&P 500, Gold, Soybeans, Crude Oil, Euro FX and U.S. 10-year T-notes-and their connection to astrological transits, the ever-changing position of planets in the sky. To her delight, she found that each market showed tendencies to make important price highs and price lows when certain planets made certain connections to the horoscope chart cast for when each market began trading. This breakthrough research in the commodity markets required having the exact first-trade time and date. Susan obtained those dates and times with painstaking digging into exchange and news archives that sometimes revealed typos and errors in publicly available government documentation. This is where Susan's 40-year career in the commodity industry served her well and enabled her to spot potential discrepancies in first-trade data in order to find true, accurate information, which is essential to first-class astrological analysis.

an effective way of shifting perspective and approaching the market differently. For traders who have always wanted to know what to do when Mercury is in retrograde or the moon is new, A Trader's Guide to Financial Astrology provides information and insight from a leading market educator.

The financial markets are inexorably influenced by Astrology. New Moons, Mercury Retrograde, Venus Retrograde, Planetary Declination, Superior Conjunctions, Elongations and Natal Transits all variously bear curious alignments to short term and long term trend changes on stocks, indices and commodity futures. This connection between Astrology and the markets is not new. In the early years of the 20th century the most successful traders on Wall Street, including the venerable W.D. Gann and the mysterious Louise McWhirter, recognized the link between the financial markets and Astrology. They repeatedly used their knowledge of Astrology to profitably trade the markets at certain key astrological dates when price fluctuations and trend changes were most likely to occur. This 2019 Financial Astrology Almanac provides the reader with key astrological dates to watch for each month. These dates align to particular astrological occurrences that have been shown time and again to have a high propensity to result in trend changes on stocks, market indices and commodity futures. These key dates have been determined using exactly the same

analytical process that Gann and McWhirter would have used. This Almanac then goes deeper to present the reader with critical Quantum Price Lines for various market indices and commodity futures for 2019. Alternative measures of time are also discussed including the Gann Master Cycle, the Weston Model and the mysterious concept of the Shmitah Year. This Almanac is certain to assist the reader in taking trading and investing to a much deeper level.

Can the movements of Jupiter, Saturn and Uranus affect market cycles? Are price swings on the Dow Jones Industrial Average and the S&P 500 a reflection of lunar and planetary placements? Many people are surprised to find that changes in price trends on the financial markets are a reflection of the changing psychological emotions of market participants. Our emotions are impacted by the varying gravitational pulls and energy levels in our planetary cosmos. Scientific techniques such as square root mathematics, the Golden Mean, the Golden Sequence and astrological phenomena like lunar events, planetary transits and planetary aspects can thus be used to identify short term changes in price trend and long term market cycles. In the early part of the 20th century many successful traders on Wall Street, including the venerable W.D. Gann and the mysterious Louise McWhirter understood that emotion was intimately linked to the forces of nature. They used these scientific techniques and astrological phenomena to predict changes to price trend and to profit from the markets. The Lost Science will acquaint you with an extensive range of astrological and mathematical phenomena. From the Golden Mean and Fibonacci Sequence through planetary transit lines and square roots to an examination of lunar astrology, planetary aspects and market cycles, the numerous

Few of us can understand why the all important relationship between astrology and finance (financial astrology) has been so completely neglected. Despite the importance of the progress in other branches of astrology, the student and investor has not, until now been able to delve deeply into the roots of financial (market) astrology. The reason for this, we believe, is a lack of scientific logical or mythical information. And now it is the intention of this book to afford such knowledge. This book is in no sense of the word the complete text on the subject. It does aim to present in factual form an outstanding new theory of financial (market) astrology. It also attempts to trace the operation of this theory upon the investor's and trader's possibilities in the Indian Stock Market.

to believe that daily news, quarterly earnings reports and corporate events drive stock prices. Nothing could be further from the truth. The reality is - the financial markets are a reflection of the mass psychological emotion of traders, investors and fund managers. When market participants are feeling positive, they are driven to buy. When they are feeling uncertain or negative, they are driven to sell. So what then drives human emotion? In the opinion of stock trader and author M.G. Bucholtz, the ever-changing configurations of orbiting planets and other celestial bodies in our cosmos influence our body chemistry and thereby drive human emotion. The Sun is the centre of our planetary system. The Sun emits massive amounts of solar radiation in all directions into the vastness of space. This radiation is called solar wind. This solar wind interacts with the magnetic fields around Mercury, Venus, Moon, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto. These planets accept and then disburse the solar wind radiation. As the radiation is disbursed, a goodly amount of it finds its way towards the magnetic field around planet Earth. Changes in the density and speed of solar wind mean that the amount of radiation reaching Earth's magnetic field on a daily, weekly or monthly basis will be ever-changing. As a result, the intensity or flux of the Earth's magnetic field is also constantly changing. The alignment of the orbiting planets in our cosmos plays a significant role in determining how much solar

radiation is deflected towards Earth's magnetic field. We all have an electrical field that runs through our tissues. Hence, basic physics demands that changes to the Earth's magnetic field will then induce subtle changes to our bodily electrical circuitry. These subtle changes are what drive our emotional responses. Human emotion changing in response to events in the cosmos is not a new concept. In the early 1900's, the venerable W.D. Gann recognized the connection between changing emotions and price fluctuations on the stock and commodity markets. His trading success realized from applying astro phenomena to the markets is legendary. The astro models pioneered by other figures from this era including Louise McWhirter and Donald Bradley are as powerful today as they were back then. This Almanac begins by offering the reader an overview of the science of Astrology. "Let's face it. Traders in the stocks, futures, options, or FOREX markets are dead meat if they aren't profiting from the astro-trading advantage!" That's what Tim Bost, editor of FinancialCyclesWeekly.com newsletter and author of Mercury, Money and the Markets, says it takes to survive in today's increasingly treacherous trading environment. "I've been working with planetary factors in market timing for over a quarter of a century," he says, "and I've never seen the odds stacked against individual traders more than they are now. To compete with market manipulation on a massive scale and the onslaught of high-frequency trading robots, you've got to have market timing tools that give you the agility and tactical superiority of a trading guerrilla.
