The Millennium Development Goals, adopted at the UN Millennium Summit in 2000, are the world's targets for dramatically reducing extreme poverty in its many dimensions by 2015?income poverty, hunger, disease, exclusion, lack of infrastructure and shelter?while promoting gender equality, education, health and environmental sustainability. These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them. Achieving the Millennium Development Goals offers the prospect of a more secure, just, and prosperous world for all. The UN Millennium Project was commissioned by United Nations Secretary-General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals. As an independent advisory body directed by Professor Jeffrey D. Sachs, the UN Millennium Project submitted its recommendations to the UN Secretary General in January 2005. ?The core of the UN Millennium Project's work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world, including scientists, development practitioners, parliamentarians, policymakers, and representatives from civil society, UN agencies, the World Bank, the IMF, and the private sector.This report lays out the recommendations of the UN

Millennium Project Task Force on Education and Gender Equality.? In the education sector, the Task Force recommends that countries now ?off track? expand access, overcome demand-side barriers, and implement institutional changes to make the education system more responsive and accountable.? As part of a compact with low-income countries working toward the goal of 100% primary school completion by 2015, donors and the international community must fulfill commitments already made under the Fast Track Initiative, and commit to still greater levels of support.

The 2010 Patient Protection and Affordable Care Act (ACA, P.L. 111-148) requires certain health insurers to provide consumer rebates if they do not meet a set financial target known as a medical loss ratio (MLR). At its most basic, a MLR measures the share of health care premium dollars spent on medical benefits, as opposed to company expenses such as overhead or profits. For example, if an insurer collects \$100,000 in premiums and spends \$85,000 on medical care, the MLR is 85%. In general, the higher the MLR, the more value a policyholder receives for his or her premium dollar. The ACA requires an annual, minimum 80% MLR for individual and small group insurance plans, and an annual, minimum 85% MLR for large group plans. Congress imposed the MLR to provide "greater transparency and accountability around the expenditures made by health insurers and to help bring down the cost of health care."

My intent was simply to appeal to older folks of sixty-five years and older who have let their physical and mental muscles go to hell in a hand basket! However, I have to say at that point in time that I did not have a lot of enthusiasm or intensity for the task, which is why the book remained unfinished! However, my life was turned upside down when my wonderful big sister fell victim to Alzheimers, such a devastating illness! My sisters demise brought me to the shocking realization that many older people who, just like my sister, have not bothered to make any effort to maintain some level of physical and/or mental fitness could quite possibly fall victim to the same fate! In that instant, I realized that although I could do nothing to help my sister, I felt obligated to do anything in my power to help the Alzheimer Foundation do whatever it could to hopefully find a cure at some point for this devastating illness! What sprang from the realization that I needed to do something was what had been missing for several years! My all-empowering why! From that point, that awesome power enabled me to become energized, not only to finish writing this book, but it also empowered me to get my body and my mind into the best physical condition of my life! I now look and feel like a man in my forties! However, what truly inspires me is the fact that I now have a tried-and-tested formula to help other older folks to also get into the best shape of their adult lives! Come join my crusade, and follow my lead! Theres plenty more room for you to become energized and to be in the best shape of your adult life too! Just as I have done!

"A clarifying must-read in these uncertain times." —GOVERNOR ANDREW CUOMO Journey behind the front lines of the coronavirus pandemic with Northwell Health, New York's largest health system. What was it like at the epicenter, inside the health system that cared for more COVID-19 patients than any other in the United States? *Leading Through a Pandemic: The Inside Story of Lessons Learned about Innovation, Leadership, and Humanity During the COVID-19 Crisis* takes readers inside Northwell Health, New York's largest health system. From the C-suite to the front lines, the book reports on groundwork that positioned Northwell as uniquely prepared for the pandemic. Two decades ago, Northwell leaders began preparing for disasters—floods, hurricanes, blackouts, viruses, and more based on the belief that "bad things will happen and we have to be ready." Following a course highly unusual for an American health system, Northwell developed one of the most advanced non-government emergency response systems in the country. Northwell reached a point where leaders could confidently say "we are comfortable being uncomfortable in a crisis." But even with sustained preparation, the pandemic stands as a singularly humbling experience. *Leading Through a Pandemic* offers guidance on how hospitals and health systems throughout the country can prepare more effectively for the next viral threat. The book includes dramatic stories from the

front lines at the peak of the viral assault and lessons of what went well, and what did not. The authors draw upon the Northwell experience to prescribe changes in the health care system for next time. Beyond the obvious need for increased stockpiles of supplies and equipment is the far more challenging task of fundamentally changing the culture of American health care to embrace a more robust emergency response capability in hospitals and systems of all sizes across the nation. The book is a must read for health care professionals, policy-makers, journalists, and readers whose curiosity demands a deeper dive into the surreal realm of the coronavirus pandemic.

benefit for older Americans. Learn how to maximize your health coverage and save money. Social Security provides the bulk of most retirees' income and Medicare guarantees them affordable health insurance. But few people know what Medicare covers and what it doesn't, what it costs, and when to sign up. Nor do they understand which parts of Medicare are provided by the government and how these work with private insurance plans—Medicare Advantage, drug insurance, and Medicare supplement insurance. Do you understand Medicare's parts A, B, C, D? Which Part D drug plan is right and how do you decide? Which is better, Medigap or Medicare Advantage? What do you do if Medicare denies payment for a procedure that your doctor says you need? How do you navigate the appeals process for denied claims? If you're still working or have a retiree health plan, how do those benefits work with Medicare? Do you know about the annual enrollment period for Medicare, or about lifetime penalties for late enrollment, or any number of other key Medicare rules? Health costs are the biggest unknown expense for older Americans, who are turning sixty-five at the rate of 10,000 a day. 'My first serious blackout marked the line between sanity and insanity. Though I would have moments of lucidity over the coming days and weeks, I would never again be the same person ...' Susannah Cahalan was a happy, clever, healthy twenty-four-year old. Then one day she woke up in hospital, with no memory of what had happened or how she had got there. Within weeks, she would be transformed into someone unrecognizable, descending into a state of acute psychosis, undergoing rages and convulsions, hallucinating that her father had murdered his wife; that she could control time with her mind. Everything she had taken for granted about her life, and who she was, was wiped out. *Brain on Fire* is Susannah's story of her terrifying descent into madness and the desperate hunt for a diagnosis, as, after dozens of tests and scans, baffled doctors concluded she should be confined in a psychiatric ward. It is also the story of how one brilliant man, Syria-born Dr Najjar, finally proved - using a simple pen

and paper - that Susannah's psychotic behaviour was caused by a rare autoimmune disease attacking her brain. His diagnosis of this little-known condition, thought to have been the real cause of devil-possession through history, saved her life, and possibly the lives of many others. Cahalan takes readers inside this newly-discovered disease through the progress of her own harrowing journey, piecing it together using memories, journals, hospital videos and records. Written with passionate honesty and intelligence, *Brain on Fire* is a searingly personal yet universal book, which asks what happens when your identity is suddenly destroyed, and how you get it back. 'With eagle-eye precision and brutal honesty, Susannah Cahalan turns her journalistic gaze on herself as she bravely looks back on one of the most harrowing and unimaginable experiences one could ever face: the loss of mind, body and self. *Brain on Fire* is a mesmerizing story' -Mira Bartók, New York Times bestselling author of *The Memory Palace*
