This book covers the principles, concepts, techniques and practical tools of financial accounting in supporting overall business decisions. Using a comprehensive theoretical framework, this book is enhanced by practical examples, exercises, chapter summaries and complex cases in each of the eleven chapters. With the International Financial Reporting Standards (IFRS) and their specific Conceptual Framework as the baseline approach, this book also highlights Romanian regulation and practice specifically. Despite the globalisation efforts, this book demonstrates that there are still discrepancies and cultural challenges and will be of interest to students and academics of financial accounting.

"Accounting Standards contain important definitions, principles and accounting treatments which must be learned. All of these are covered in this book. By ensuring that students have good understanding of what the topic is about, this essential learning stops being a chore. This book is different from those that teach exam and memory techniques in that it takes such techniques and applies them to a real topic." --Back cover
