This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Kay details the sociological profiles of ten brands of modern conspiracists—the Failed Historian, the Mid-Life Crack-Up, the Damaged Survivor, the Campus Revolutionary, the Stoner, the Clinical Case, the Puzzle Solver, the Christian Doomsayer, the Cosmic Voyager, and the Egomaniac—in a compelling exploration of America's departure from reason and what it means for the very future of rational discourse as the nation steps further into the 21st century.
