Although complexity is a phenomenon that confounds and challenges program managers across industry sectors, there is little information available that identifies the set of competencies managers need to complete their program successfully and deliver the benefits desired by stakeholders. Program Management Complexity: A Competency Model fills this void. Written by two of the first professionals to obtain the Program Management Professional (PgMP®) certification from the Project Management Institute (PMI), this book begins with a literature review of program and project management complexity. Next, it presents a competency model, based on the authors' seven decades of collective experience in the field, which follows the

framework of PMI's model for project managers. Useful for corporate and government organizations, universities, executives, PMO directors and human resources professionals who need to determine program management training needs, this unique model is divided into performance competencies and personal competencies. The performance competencies are organized according to the six domains of program management, while the eight personal competencies are based on research plus a survey of PgMPs® worldwide. After presenting the model, along with detailed plans and guidelines for its implementation in a real-world setting, the book presents three questionnaires designed to help organizations, existing program managers, and aspiring program managers assess their own development plans. Supplying you with the insight to recognize the elements of complexity during the defining and initiating stages, this book includes detailed guidelines to help you recruit, train, and develop program managers capable of delivering stated program benefits, services, and results. How do you become a Registered Tax Return Preparer (RTRP)? You do not need an advanced degree, or even a college education; however, it does require some work. First, you must prepare for the IRS competency exam. The IRS has two separate tests that you can take depending on the type of returns you will file. This course covers both tests and provides FREE access to an online test bank for you to practice. Practice exams are also available online. We designed this course with you in mind, utilizing the experience of Enrolled Agents, CPA's and former IRS employees. In addition to providing you with a solid foundation in tax knowledge, this course has the essential material you must know to pass the test. New regulations require all paid tax return preparers-other than certain exempt individuals-to register for a PTIN, pass a competency exam, and complete 15 hours of annual continuing education. These registered tax return preparers will need to follow the rules in Circular 230 but are not enrolled to practice before the IRS.

This book, first published in 1993, focuses on the evolution of accounting institutions, practices and standard-setting in Canada. Canada's federal system complicates the jurisdictional authority for accounting matters. The Canadian constitution empowers the ten provinces to regulate the training and certification of accountants, and each can incorporate organizations. A great deal of effort has been made by accounting bodies on jurisdictional coordination and disputes, and this book analyses how these systems have come to function in their present form.
