The concept of learning to 'think like a lawyer' is one of the cornerstones of legal education in the United States and beyond. In this book, Jeffrey Lipshaw provides a critique of the traditional views of 'thinking like a lawyer' or 'pure lawyering' aimed at lawyers, law professors, and students who want to understand lawyering beyond the traditional warrior metaphor. Drawing on his extensive experience at the intersection of real world law and business issues, Professor Lipshaw presents a sophisticated philosophical argument that the "pure lawyering" of traditional legal education is agnostic to either truth or moral value of outcomes. He demonstrates pure lawyering's potential both for illusions of certainty and cynical instrumentalism, and the consequences of both when lawyers are called on as dealmakers, policymakers, and counsellors. This book offers an avenue for getting beyond (or unlearning) merely how to think like a lawyer. It combines legal theory, philosophy of knowledge, and doctrine with an appreciation of real-life judgment calls that multi-disciplinary lawyers are called upon to make. The book will be of great interest to scholars of legal education, legal language and reasoning as well as professors who teach both doctrine and thinking and writing skills in the first year law school curriculum; and for anyone who is interested in seeking a perspective on 'thinking like a lawyer' beyond the litigation arena.

The series features articles on a broad range of important and timely topics, including professionalism, social responsibility, ethical judgment, and accountability. The professional responsibilities of accountants are broad-based; they must serve clients and user groups whose needs, incentives, and goals may be in conflict. Further, accountants must interpret and apply codes of conduct, accounting and auditing principles, and securities regulations. Compliance with professional guidelines is judgment-based, and characteristics of the individual, the culture, and situations affect how these guidelines are interpreted and applied, as well as when they might be violated. Interactions between accountants, regulators, standard setters, and industries also have ethical components. Research into the nature of these interactions, resulting dilemmas, and how and why accountants resolve them, is the focus of this series. This title publishes annually.
