In *Russia and the Arms Trade* a group of Russian authors were commissioned to describe and assess the arms trade policies and practices of Russia under new domestic and international conditions. The authors, drawn from the government, industry, and academic communities, offer a wide-ranging assessment of the political, military, economic, and industrial implications of Russian arms transfers together with specific case studies of important bilateral armstransfer relationships.

The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

Eyewitnesses play an important role in criminal cases when they can identify culprits. Estimates suggest that tens of thousands of

eyewitnesses make identifications in criminal investigations each year. Research on factors that affect the accuracy of eyewitness identification procedures has given us an increasingly clear picture of how identifications are made, and more importantly, an improved understanding of the principled limits on vision and memory that can lead to failure of identification. Factors such as viewing conditions, duress, elevated emotions, and biases influence the visual perception experience. Perceptual experiences are stored by a system of memory that is highly malleable and continuously evolving, neither retaining nor divulging content in an informational vacuum. As such, the fidelity of our memories to actual events may be compromised by many factors at all stages of processing, from encoding to storage and retrieval. Unknown to the individual, memories are forgotten, reconstructed, updated, and distorted. Complicating the process further, policies governing law enforcement procedures for conducting and recording identifications are not standard, and policies and practices to address the issue of misidentification vary widely. These limitations can produce mistaken identifications with significant consequences. What can we do to make certain that eyewitness identification convicts the guilty and exonerates the innocent? Identifying the Culprit makes the case that better data collection and research on eyewitness identification, new law enforcement training protocols, standardized procedures for administering line-ups, and improvements in the handling of eyewitness identification in court can increase the chances that accurate identifications are made. This report explains the science that has emerged during the past 30 years on eyewitness identifications and identifies best practices in eyewitness procedures for the law enforcement community and in the presentation of eyewitness evidence in the courtroom. In order to continue the advancement of eyewitness identification research, the report recommends a focused research agenda. Identifying the Culprit will be an essential resource to assist the law enforcement and legal communities as they seek to understand the value and the limitations of eyewitness identification and make improvements to procedures.

The Book of Equanimity contains the first-ever complete English language commentary on one of the most beloved classic collections of Zen teaching stories (koans), making them vividly relevant to spiritual seekers and Zen students in the twenty-first century. Continually emphasizing koans as effective tools to discover and experience the deepest truths of our being, Wick brings the art of the koan to life for those who want to practice wisdom in their daily lives. The koan collection Wick explores here is highly esteemed as both literature and training material in the Zen tradition, in which koan-study is one of two paths a practitioner might take. This collection is used for training in many Zen centers in the Americas and in Europe but has never before been available with commentary from a contemporary Zen master. Wick's Book of Equanimity includes new translations of the preface, main case and verse for each koan, and modern commentaries on the koans by Wick himself.

"This is the first volume exclusively devoted to the Expositio by Berthold of Moosburg (c.1295-c.1361) on Proclus' Elements of Theology. The breadth of its vision surpasses every other known commentary on the Elements of Theology, for it seeks to present a coherent account of the Platonic tradition as such (unified through the concord of Proclus and Dionysius) and at the same time to consolidate and transform a legacy of metaphysics developed in the German-speaking lands by Peripatetic authors (like Albert the Great, Ulrich of Strassburg, and Dietrich of Freiberg). This volume aims to provide a basis for further research and discussion of this unduly overlooked commentary, whose historical-philosophical importance as an attempt to refound Western metaphysics is beginning to be recognized. The publication of this volume has received the generous support of the European Research Council (ERC) under the European Union's Horizon 2020 research and innovation programme through the ERC Consolidator Grant NeopLAT: A Comparative Analysis of the Middle East, Byzantium and the Latin West (9th-16th Centuries), grant agreement No 771640 (www.neoplat.eu). Despite the efforts of both the U.S. Department of Defense and the Veterans Health Administration to enhance mental health services, many service members are not regularly seeking needed care when they have mental health problems. Without appropriate treatment, these mental health problems can have wide-ranging and negative impacts on the quality of life and the social, emotional, and cognitive functioning of affected service members. The services have been actively engaged in developing policies, programs, and campaigns designed to reduce stigma and increase service members' help-seeking behavior. However, there has been no comprehensive assessment of these efforts' effectiveness and the extent to which they align with service members' needs or evidence-based practices. The goal of this research was to assess DoD's approach to stigma reduction, how well it is working and how it might be improved. To address these questions, RAND researchers used five complementary methods: (1) literature review, (2) a microsimulation modeling of costs, (3) interviews with program staff, (4) prospective policy analysis, and (5) an expert panel. The priorities outlined in this report identify ways in which program and policy development and research and evaluation can improve understanding of how best to efficiently and effectively provide needed treatment to service members with mental illness.

Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised "dead" drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll's patterns could be used to design a three-dimensional vault. Now a National Bestseller "Religion, politics, and love collide in this slim but powerful novel reminiscent of Donna Tartt's *The Secret History*, with menace and mystery lurking in every corner." --People Magazine "The most buzzed-about debut of the summer, as it should be...unusual and enticing ... *The Incendiaries* arrives at precisely the right moment." --The Washington Post "Radiant...A dark, absorbing story of how first love can be as intoxicating and dangerous as religious fundamentalism." --New York Times Book Review A powerful, darkly glittering novel of violence, love, faith, and loss, as a young woman at an elite American university is drawn into a cult's acts of terrorism. Phoebe Lin and Will Kendall meet in their first month at prestigious Edwards University. Phoebe is a glamorous girl who doesn't tell anyone she blames herself for her mother's recent death. Will is a misfit scholarship boy who transfers to Edwards from Bible college, waiting tables to get by. What he knows for sure is that he loves Phoebe. Grieving and guilt-ridden, Phoebe is drawn into a secretive cult founded by a charismatic former student with an enigmatic past. When the group commits a violent act in the name of faith, Will finds himself struggling to confront a new version of the fanaticism he's worked so hard to escape. Haunting and intense, *The Incendiaries* is a fractured love story that explores what can befall those who lose what they love most.

This book studies the syntax and semantics of numeral classifiers in Mandarin and other Chinese languages. It explores how Chinese classifiers are semantically interpreted in syntactic contexts and how semantic functions of classifiers are realized at the syntactic level. The book is a contribution to formal Chinese linguistics, and to the understanding of grammatical properties of nominal phrases in Chinese and East Asian languages.

This book discusses the decision to use the atomic bomb. Libraries and scholars will find it a necessary adjunct to their other studies by Pulitzer-Prize author Herbert Feis on World War II. Originally published in 1966. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The book presents a systematic theoretical account of the fundamental constructional mechanisms that underlie deverbal nominalization in general, and it makes an original descriptive contribution by discussing a number of nominalization systems in detail. The main theoretical motif is that nominalization strongly calls for a functional rather than purely structural approach. The book goes more deeply into a number of functional constructs needed to model nominalization (drawn from Cognitive Grammar and Systemic-Functional Grammar) and it elaborates on the internal functional organization of nominal and clausal structure [e.g. the notions of type specification, instantiation and grounding (Langacker 1991) are discussed in detail and shown to be crucial for the analysis of deverbal nominalization]. It is argued that deverbal nominalizations are basically re-classifications of verbal predicates into nominal constructions. This re-classification either applies at word rank or it involves the rank shift (Halliday 1966) of a clause-like unit, with its internal structure preserved (e.g. signing the contract quickly). The re-classified unit then adopts a specific nominal strategy, with some form of nominal determination and quantification (e.g. her signing the contract quickly). The descriptive part of the book zooms in on nominalizations that are derived at word rank (deverbal -er nominals) and on nominalizations applying to 'a temporal clausal heads' (e.g. John's playing the piano) and finite clauses. Of the gerundive and finite types of nominalization, those that function in factive contexts are focused on. In the analysis of deverbal -er nominals a case is made for a 'subject' analysis of the system and an elaborate discussion of the clausal middle construction (e.g. this book reads easily) - which is argued to show systematic resemblances with non-agentive -er nominals - is included. Of the remaining nominalization types (John's playing the piano; playing the piano; the fact that he plays the piano; that he plays the piano), especially the nominal behaviour (e.g. proper name vs. common noun strategy) and (in the case of gerundive nominals) the various structural and semantic subtypes that can be distinguished among them are discussed.

This first edition of *New South Wales Legislative Council Practice* brings together the history, practice and procedure of the New South Wales Legislative Council - the Upper House of the New South Wales Parliament, and the first and oldest legislative body in Australia. Since the advent of responsible government in New South Wales in 1856, the New South Wales Legislative Council has been the focus of continuous struggle regarding its composition, powers, role and very existence. However, from its tumultuous history, the Council has in recent years emerged as a democratically elected, powerful and effective upper house, in many ways mirroring the development of the Australian Senate. Today the Council performs key functions within the New South Wales system of government including representing the people and scrutinising the executive government as a 'House of Review'. The rich history of the New South Wales Legislative Council has brought with it a wealth of parliamentary precedent with which to guide modern practice and procedures in the House. While practitioners of parliamentary law and practice in New South Wales have long had access to authorities such as *Erskine May's Parliamentary Practice* and *Odgers' Australian Senate Practice*, the publication of *New South Wales Legislative Council Practice* will provide an essential reference book to understanding parliamentary privilege, practice and procedure in the New South Wales Upper House.

Originally published in 1983, this book presents both the technical and political information necessary to evaluate the emerging threat to world security posed by recent advances in uranium enrichment technology. Uranium enrichment has played a relatively quiet but important role in the history of efforts by a number of nations to acquire nuclear weapons and by a number of others to prevent the proliferation of nuclear weapons. For many years the uranium enrichment industry was dominated by a single method, gaseous diffusion, which was technically complex, extremely capital-intensive, and highly inefficient in its use of energy. As long as this remained true, only the richest and most technically advanced nations could afford to pursue the enrichment route to weapon acquisition. But during the 1970s this situation changed dramatically. Several new and far more accessible enrichment techniques were developed, stimulated largely by the anticipation of a rapidly growing demand for enrichment services by the world-wide nuclear power industry. This proliferation of new techniques, coupled with the subsequent contraction of the commercial market for enriched uranium, has created a situation in which uranium enrichment technology might well become the most important contributor to further nuclear weapon proliferation. Some of the issues addressed in this book are: A technical analysis of the most important enrichment techniques in a form that is relevant to analysis of proliferation risks; A detailed projection of the world demand for uranium enrichment services; A summary and critique of present institutional non-proliferation arrangements in the world enrichment industry, and An identification of the states most likely to pursue the enrichment route to acquisition of nuclear weapons.

Trans wizard Harriet Porber is a master spellsmith who's found herself in a bit of a pickle. After finishing wizard college, Harriet made a name for herself by creating a hit viral spell, but has since failed to craft a follow up. Now Harriet's agent, Minerma, is breathing down her neck, suggesting that Harriet take a trip to an island off the coast of England for inspiration. Hoping for some peace and quiet to clear her head, Harriet Porber arrives to find that her new neighbor, an angsty bard named Snabe from the band Seven Inch Nails, is already there making a racket. This parasaurulophus spellcaster is a bad boy through and through, and with his incredible powers of metamagic, Snabe reveals that this layer of reality is much more than it seems. Could Harriet and Snabe really be characters in a parody romance novel? Soon enough, these two are discovering they have more similarities than differences: both trans, both strong, and both hoping to create a new spell that will change the world. But with the addition of two devious sentient motorcycles to the mix, Dellatrix and Braco, things start to get complicated. Now trans wizard Harriet Porber is caught up in a tale of magic and mystery where nothing is as it seems, except for one universal truth: love is real. This is a 52,000 word bad boy romance novel for adults. It contains some explicit scenes.

The 1st ed. includes an index to v. 28-36 of St. Nicholas.

"The fulfilled renown of Moby-Dick and of *As I Lay Dying* is augmented by *Blood Meridian*, since Cormac McCarthy is the worthy disciple both of Melville and Faulkner," writes esteemed literary scholar Harold Bloom in his Introduction to the Modern Library edition. "I venture that no other living American novelist, not even Pynchon, has given us a book as strong and memorable." Cormac McCarthy's masterwork, *Blood Meridian*, chronicles the brutal world of the Texas-Mexico borderlands in the mid-nineteenth century. Its wounded hero, the teenage Kid, must confront the extraordinary violence of the Glanton gang, a murderous cadre on an official mission to scalp Indians and sell those scalps. Loosely based on fact, the novel represents a genius vision of the historical West, one so fiercely realized that since its initial publication in 1985 the canon of American literature has welcomed *Blood Meridian* to its shelf. "A classic American novel of regeneration through violence," declares Michael Herr. "McCarthy can only be compared to our greatest writers."

The distinction between functional categories and lexical categories is at the heart of present-day grammatical theory, in theories on language acquisition, code-switching and aphasia. At the same time, it has become clear, however, that there are many lexical items for which it is less easy to decide whether they side with the lexical categories or the functional ones. This book deals with the grammatical behavior of such in-between-categories, which are referred to here as "semi-lexical categories".

This study questions the traditional view of sacrifices in hero-cults during the Archaic to the early Hellenistic periods. The analysis of the epigraphical and literary evidence for sacrifices to heroes in these periods shows, contrary to the traditional notion, that the main ritual in hero-cults was a *thysia* at which the worshippers consumed the meat from the animal victim. A particular handling of the animal's blood or a holocaust, rituals previously taken to be typical for heroes, can rarely be documented and must be considered as marginal features in hero-cults. The terms *eschara*, *escharon*, *bothros*, *enagizein*, *enagisma*, *enagismos* and *enagisterion*, believed to be characteristic for hero-cults, are seldom used in hero-contexts before the Roman period and occur mainly in the Byzantine lexicographers and in the scholia. Since the main kind of sacrifice in hero-cults was a *thysia*, a ritual intimately connected with the social structure of society, the heroes must have fulfilled the same role as the gods within the Greek religious system. The fact that the heroes were dead seems to have been of little significance for the sacrificial rituals and it is questionable whether the rituals of hero-cults are to be considered as originating in the cult of the dead.
