Immune-mediated neurological disorders present an increasing challenge to neurologists. Recent advances have identified new antibodies, new effector mechanisms and new diagnostic tests; these have greatly enhanced our understanding of disease aetiology and opened up therapeutic opportunities, but a critical understanding of this fast-developing field is not easy to find. This volume was conceived following a very successful course on neuroimmunology in Bergamo in 2000, and was written mainly by clinicians who are active in the laboratory. It will help to keep practising neurologists and neuroimmunologists abreast of the most recent developments, and to assess new information more critically. Angela Vincent and Gianvito Martino should be congratulated on master-minding this timely and practical text. July 2001 J. A philosopher/mechanic's wise (and sometimes funny) look at the challenges and pleasures of working with one's hands "This is a deep exploration of craftsmanship by someone with real, hands-on knowledge. The book is also quirky, surprising, and sometimes quite moving." —Richard Sennett, author of *The Craftsman* Called "the sleeper hit of the publishing season" by *The Boston Globe*, *Shop Class as Soulcraft* became an instant bestseller, attracting readers with its radical (and timely) reappraisal of the merits of skilled manual labor. On both economic and psychological grounds, author Matthew B. Crawford questions the educational imperative of turning everyone into a "knowledge worker," based on a misguided separation of thinking from doing. Using his own experience as an electrician and mechanic, Crawford presents a wonderfully articulated call for self-reliance and a moving reflection on how we can live concretely in an ever more abstract world.

International media assistance is a small but important form of international democracy-promotion aid. Media assistance boomed after the 1989 transitions in Central Europe, but now flows to virtually all regions of the world. Today the media assistance industry is focused on the problem of sustainability: How are free and independent public affairs media supposed to maintain their editorial mission while facing hostile political systems or the demands of the consumer marketplace? Many media in developing countries have been or are grant-dependent. When grants are exhausted or withdrawn, media that were funded to further democratic consolidation typically wither and die. Some become mere grant chasers. Others abandon public service to the demands of market competition, or political patronage. As a result, governmental and non-governmental grant makers now emphasize the need for sustainability in considering grants in the media sector. Many grant recipients have grown frustrated, sometimes bitter, and have sought to take a much more active role in the way assistance programs are put together. Just how is sustainability to be achieved while also ensuring a public-service editorial mission? Exporting Press Freedom examines the history and practice of media assistance, and argues that the dilemma of media independence and sustainability is best understood as an economic problem rather than one of poor editorial standards or lack of will. It includes profiles of news and public affairs media in developing and democratizing countries, and also of two non-governmental organizations that have pioneered the use of low-interest loans in media assistance. These profiles exemplify strategic and entrepreneurial approaches to developing and supporting public service media. Such approaches may be of use not only in the developing world, but in the consolidated Western democracies as well, where concern has grown about poor journalistic performance and its consequences for democratic governance.
