What is administrative reform? How is it differentiated from other kinds of social reform? Who are administrative reformers and how do they approach their task? And who benefits and who suffers from it? Does a theory of administrative reform exist? A survey of published research on administrative reform reveals that satisfactory answers to these questions are handicapped by methodological and theoretical shortcomings. There are no common definitions, no agreement over content, no selected boundaries, no clear links with the wide phenomenon of social reform, no firm hypothesis tested by empirical findings, and no continuous dialogue

between practitioners and theorists. This book is the first comprehensive and systematic treatment of the subject for professionals and students in the fields of public and private administration. It carefully examines the diverse interdisciplinary literature on the subject and identifies and develops the most promising approaches towards a unified theory. Caiden shows how the study of administrative reform can contribute substantially to the development of administrative theory, and constructs a working definition of the phenomenon of administrative reform, distinguishing it from social change and from administrative change. The practical use of this definition is tested by the analysis of various case histories of administrative cultures of different periods in history, from which a common cycle of reform processes is discerned. The author follows with a detailed examination of the processes themselves. The book concludes with a discussion of the obstacles to reform and a review of the author's findings and conclusions.

Under pressure from the World Bank, the International Monetary Funds and the World Trade Organization governments of both industrialized and less developed nations have undertaken extensive reforms and reorganization to streamline their public sectors. This volume, with chapters written by authorities from around the world, provides information on administrative reform in varied nations. Following an introduction, which sets a theoretical framework, the book contains sections devoted to Asia, the Near/Middle East, Africa, and a comparison of East/South Europe and Asia. Administrative reform has become a widespread challenge to national and sub-national governments around the globe. Under pressure from the World Bank, the International Monetary Funds and the World Trade Organization governments of both industrialized and less developed nations have undertaken extensive reforms and reorganization to streamline their public sectors. This volume, with chapters written by authorities from around the world, provides information on administrative reform in varied nations. Developing nations face acute problems on a daily basis, making administrative reform an essential function of public administration. With chapters devoted to experiences in such nations as Korea, India, Iran, Turkey, the Arab States, Nigeria, and South Africa, this volume sheds valuable light on administrative reform in developing countries and provides lessons for future policy actions.

state of civil services in South Asia countries. It brings together experiences of former senior bureaucrats and critics from India and other SAARC nations to affirm the state of civil service and the need for reforms. While there have been studies describing the character, structure and the progress of the administrative systems in South Asia, there is no comprehensive account on the region's present bureaucracy. This book attempts to bridge that gap through 15 insightful chapters by experts and experienced bureaucrats. There is a general introduction too by the editor. The chapters have been divided thematically into four parts. The first two parts discuss the present state of civil service in India and possible reforms. The third part offers a comparative account of the functioning of civil service commissions in the SAARC nations. The fourth part has case studies based on on-the-job experience of bureaucrats from SAARC countries that describes how the system functions within the parameters of good governance. This well-presented collection with contributions from academics and administrators reflects the growing concern towards the present-day practice of governance. It focuses on the need for Governance for Sustainable Human Development to manage the country's social as well as economic resources leading to better development-founded on four pillars of Accountability, Transparency, Predictability, and Participation. It thus calls for unfolding various issues and devising suitable strategies towards humane governance through appropriate political, bureaucratic, economic, and legal reforms. Highlighting its theme in the initial chapters in the New Public Management perspective,

the book goes on to unravel the major administrative loopholes in Indian administration, such as lack of transparency and accountability, and the stranglehold of corruption, all of which lead to human deprivation. Later chapters give a synoptic overview of administrative reforms so far undertaken in India, and emphasize the effectiveness of governance in establishing appropriate balance in relative roles of public, private and civil society organizations, rights and responsibilities of politicians, bureaucrats and community, and economic and social justice. The book closes on a positive note strongly reiterating administrative re-engineering to meet the challenges of the twenty-first century for ensuring a holistic development of the country. Recent and real life happenings infused in the text to substantiate arguments, make it an interesting reading. The book will be of immense use to the students and teachers of public administration, social science, political science, and those who practise public administration. It will also be useful to a large number of government departments-both at the union and the state levels.

It is a widely accepted fact that human resources play a crucial role in the development of nations. Those countries which have developed their people by investing in sectors such as education, health, and science and technology, have achieved considerable success. Whenever they face a resource crunch, most developing nations tend to make human resource development (HRD) choices haphazardly rather than in continuous and planned manner, especially in terms of identifying human resources sectors and target

groups, and in choosing appropriate processes.

This book analyses public sector reform comprehensively in all parts of China's public sector – government bureaucracy, public service units and state-owned enterprises. It argues that reform of the public sector has become an issue of great concern to the Chinese leaders, who realize that efficient public administration is key to securing the regime's governing capacity and its future survival. The book shows how thinking about public sector reform has shifted in recent decades from a quantitative emphasis on 'small government', which involved the reduction in size of what was perceived as a bloated bureaucracy, to an emphasis on the quality of governance, which may result in an increase in public sector personnel. The book shows how, although Western ideas about public sector reform have had an impact, Chinese government continues to be best characterized as 'state capitalism', with the large state-owned enterprises continuing to play an important – and increasing – role in the economy and in business. However, state-owned enterprises no longer provide care for large numbers of people from the cradle to the grave – finding an alternative, efficient way of delivering basic welfare and health care is the big challenge facing China's public sector.

A state-of-the-art, one-stop resource, *Public Administration in South Asia: India, Bangladesh, and Pakistan* examines public administration issues and advances in the Indian subcontinent. The book fulfills a critical need. These nations have the largest public administration programs in South Asia, yet existing knowledge on them is fragmented at best. Bringing together leading scholars from these countries, this book provides both an insider perspective and a scholarly look at the challenges and accomplishments in the region. Focusing on the machinery of government, the book explores questions such as: What is the history of public administration

development? How are major decisions made in the agencies? Why are anti-corruption efforts so much a challenge? What is the significance of intergovernmental relations? What is the success of administrative reform? What are examples of successful social development programs? How successful is e-government, and what are its challenges? Why is civil service reform difficult to achieve? How is freedom of information being used as a means to combat corruption and invoke grassroots activism? What can be learned from the successes and failures? While public administration practice and education have become considerably professionalized in the last decade, a sufficiently in-depth and well-rounded reference on public administration in these countries is sorely lacking. Most available books tackle only aspects of public administration such as administrative reforms, civil service, economic developments, or public policy, and are country specific. None provide the in-depth analysis of the sphere of public action in South Asia found in this book. It supplies an understanding of how public administration can be either the source of, or solution to, so many of the problems and achievements in the Indian subcontinent.

Today, India is one of the leading players on the global stage. It is competing with other countries not just in the marketplace but also in respect of its governance structures. This book underscores the need for creating a modern civil service, which epitomizes best practices overseas and in the private sector, and exemplifies contemporary management philosophy, and techniques. Using a comparative approach, S.K. Das identifies a range of initiatives that will serve to transform the civil service into a world-class organization, compatible with strategic, economic, and technological requirements of the twenty-first century. Based on the reform experiences of Australia, New Zealand, Sweden, and the UK, these initiatives have

India is a developing country after seven decades, although having lots of resources like mining & minerals, water resources, forestry, marine products, scope of industries, tourism facilities, agriculture, electricity and development of IT etc. It is mainly due to lack of morality, unity and nationality among the citizens. Such diversion has happened due to narrow feelings already generated in the name of religions, castes, languages, rich -poor status and zonal difference. In fact, all human beings are same, and these differences are manmade. Irrespective of higher education one may have, can fall into the pit of criminal activities. To tune up all into a positive character, Moral Science has been prepared from class 1 to graduation, considering all are human beings and Indians. This has been submitted to Hon'ble Prime Minister, India for implementing as compulsory subject. Such moral value would generate poverty, crime free ideal Indians with morality, unity and nationality in course of time. The solutions to the major issues of the country, cited in the chapters are suitable for maximum countries, mostly undeveloped, under-developed and developing countries of the world. I belong to 'Planet Earth', being Indian, so entire mankind belongs to 'Planet Earth', may be from different countries. Therefore, everybody belongs to one family of our Mother Earth. Harming our planet by any means, is not only villainous but also unpardonable. The contents in the book aim at strengthening India. The development of the country depends on government. Government means minister supported by secretary of concerned department, since they are policies makers. The authorities controlling the departments, should possess the character of being 'Exceptional' i.e. honest, sincere, progressive and innovative, who can reform policies as per suitability of situation. Without such character the development will be feeble. To generate

such qualitative administrators, citizens and political leaders, it is required to include moral value in educational curriculum. Suggestion on Moral Value are cited in this book for administrative reforms; welfare of the citizens and making the country highly developed. Present adoption of Aadhaar Card in the country is the initiation of the Author during 2009. Similarly, control of "Overdraft" and Land Reform have been suggested to governments for betterment of the citizens and country on the whole. It is good news that govt. of Odisha has considered "Leasing out land" on land reform, which was an initiation from this end. All the writeups in the book are author's original concepts, generated instantly even in odd hours. These are subsequently made into articles and suggested to concerned authorities after being debated through experts. Author got scope to be associated with some organizations, through which it was possible to suggest to government on solution-oriented issues.

Performance management is a means of identifying critical dimensions of performance, its planning, review and development. It is a simple and commonsensical way to measure productivity as also to enhance performance and is a critical tool for organizations in today's competitive environment. Organizations are constantly on the lookout for a performance system that is appropriate to their environment and work culture. This book explores the many facets of performance management and how it works. The author defines performance management as a continuous process which consists of defining, planning, analyzing and developing performance through competency building. It focuses on commitment and support building as also recognizing and rewarding performance and contribution. The author maintains that more than just a method of reviewing performance, a performance management facilitates learning among managers. This system brings about role clarity and resultantly,

there is more focus on performance development. It also raises levels of trust, which create better communication, and as a consequence a more transparent and productive organization. A key feature of the book is that it advises organizations to shift their focus from an appraisals only approach to the more holistic framework of performance management. This will ensure growth and development of employee performance. This book discusses the latest theoretical developments in the field in a jargon free and accessible style. It encompasses critical implementation aspects of performance management and includes a number of chapters which provide insightful information on performance management. It also includes recent experiences of organizations which have incorporated performance management systems in their structure, thus giving the reader a realistic and comprehensive feel of the topic.

My dissertation attempts to study the administrative reforms in India since 1991 in order to examine and explain the presence (or absence) of NPM in India. In doing so, I have first clarified the concept per se before doing a thorough literature survey of both the secondary and primary sources of NPM in the international context as well as with regard to the developing countries and India in particular. In keeping with the research objective, a structured questionnaire was used as an appropriate qualitative research tool to elicit response from key government functionaries associated with administrative reforms in India, so as to validate the learning from literature review. Based on the literature review, study of primary documents and responses received from key government functionaries I have concluded that

The political parties are a link between the citizens and the government and give meaning to the electoral process in a democracy. Since independence, political parties in India have been playing an important role in sustaining India's democracy. A question may, however, be asked 'how have they fared compared to their counterparts in other democracies?' A comparison is perhaps possible based on the respective visions of the political parties as reflected in their election manifestoes. The present book examines the vision of political parties with respect to 'administrative reforms'. Significantly, the two Administrative Reforms Commissions in the past identified a host of areas needing reforms. While a good many of their recommendations have been implemented, a larger number of them have remained unimplemented. 'Lack of political will' has often been held responsible for their non-implementation. The book attempts to draw attention to issues relating to administrative reforms at the level of the Central Government, the State Government and the Local Bodies.

The book covers G.S. Paper IV - Ethics for Civil Services exam with a focused

approach, engaging and reader friendly language. The journey of ethics learning is simplified with frequent case studies and the application of theoretical learning to the practical case studies. The inclusion of previous years' questions with answers and the expected questions ensure that the readers do not lose sight of their goal as it is easy to get deviated from the main focus while constantly reading pages and pages of printed words. Right at the beginning in each of the 9 chapters, a note to readers has been presented to give a feel of the crux of each of the chapters, their relative importance from the perspective of exam and their rationale from the perspective of the syllabus setters.
