This selection of papers presented at the 20th Comparative Germanic Syntax Workshop brings together contributions that address issues in syntactic predication and studies in the nominal system, as well as papers on data from the history of English and German. Showing a strong comparative commitment, the contributions include studies on previously neglected data on case and predicative structures in Icelandic and other Germanic languages, on the (non-)syntactic distinction of predicative vs. argument NP/DPs, on quirky V2 in Afrikaans, the pronominal system, resumptive pronouns with relative clauses in Zurich German, as well as historical papers on word-formation processes, on auxiliary selection in relation to counter factuality, and on the development of VO-OV orders in the history of English. This volume presents a wide range of studies that enrich both the theoretical understanding and the empirical foundation of comparative research on the Germanic languages.

It's South Africa 1990. Two major events are about to happen: the release of Nelson Mandela and, more importantly, it's Spud Milton's first year at an elite boys only private school. Cursed with parents from well beyond the lunatic fringe, a senile granny, and a dormitory full of strange characters, Spud has his hands full trying to adapt to his new home. Surrounded by names such as Gecko, Rambo, Rain Man and Mad Dog, Spud takes his first tentative steps along the path to manhood. (The path, it seems, could be a rather long road.) Armed with only his wits and his diary, Spud takes us from illegal night swimming to the red-hot furnace of the cricket pitch, from ghostbusting to a catastrophic family vacation. He also invites us into the mind of a boy

struggling to come to terms with a strange new world; a boy whose eyes are being opened to love, friendship and complete insanity.
