"As the first agent to publicly betray the CIA, Philip Agee was on the run for over forty years--a pariah akin to Edward Snowden. Agee revealed in spectacular detail what many had feared about the CIA's actions, but he also outed and endangered hundreds of agents. Agee relentlessly opposed the CIA and the regimes it backed, whether in America or around the world. In Jonathan Stevenson's words, Agee became "one of history's successful viruses: undeniably effective and impossible to kill." In this first biography of Agee, Stevenson will reveal what made Agee tick, and what made him run"--

A stunningly ambitious and entertaining novel that gives us a counter-factual history of the modern world, from the author of the international bestseller HHHH. Binet's best book yet: the work of a major writer just hitting his stride. A delightful counterfactual novel. ***** - Daily Telegraph c.1000AD: Erik the Red's daughter heads south from Greenland 1492: Columbus does not discover America 1531: the Incas invade Europe Freydis is the leader of a band of Viking warriors who get as far as Panama. Nobody knows what became of them... Five hundred years later, Christopher Columbus is sailing for the Americas, dreaming of gold and conquest. Even when captured by Incas, his faith in his superiority and his mission is unshaken. Thirty years after that, Atahualpa, the last Inca emperor, arrives in Europe. What does he find? The Spanish Inquisition, the Reformation, capitalism, the miracle of the printing press, endless warmongering between the ruling monarchies, and constant threat from the Turks. But most of all, downtrodden populations ready for revolution. Fortunately, he has a recent guidebook to acquiring power -

Machiavelli's *The Prince*. It turns out he is very good at it. So, the stage is set for a Europe ruled by Incas and, when the Aztecs arrive on the scene, for a great war that will change history forever. *Civilisations* is a wildly entertaining counterfactual story about the modern world, colonisation, empire-building and the eternal human quest for domination. It is an electrifying novel by one of Europe's most exciting writers. 'What if the 1492 'discovery' of America...alerted the Incas to the existence of a land to the east that might be ripe for conquest?' *Literary Review*

As the twentieth century closed, Fred Adams and Greg Laughlin captured the attention of the world by identifying the five ages of time. In *The Five Ages of the Universe*, Adams and Laughlin demonstrate that we can now understand the complete life story of the cosmos from beginning to end. Adams and Laughlin have been hailed as the creators of the definitive long-term projection of the evolution of the universe. Their achievement is awesome in its scale and profound in its scientific breadth. But *The Five Ages of the Universe* is more than a handbook of the physical processes that guided our past and will shape our future; it is a truly epic story. Without leaving earth, here is a fantastic voyage to the physics of

In *Ivory Shoals*, twelve-year-old Gussie Dwyer--audacious, resilient, determined to adhere to the morals his mother instilled in him--undertakes to trek across the sumptuous yet perilous peninsula of post-Civil War Florida in search of his father, a man who has no idea of his son's existence. Gussie's journey sees him cross paths with hardened Floridians of every stripe, from the brave and noble to a bevy of cutthroat villains, none worse than his amoral shark of a stepbrother. Rich in visceral details and told with a pulse-quickenning pace, *Ivory Shoals* is a distinctly American story, in the tradition of Mark Twain and Cormac McCarthy. The novel is also a timeless epic, tracking Gussie's odyssey from childhood toward adulthood. Will he survive his quest, and at what cost?

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

The #1 New York Times bestseller by Senator Al Franken, author of *Giant of the Senate* Al Franken, one of our "savviest satirists" (People), has been studying the rhetoric of the Right. He has listened to their cries of "slander," "bias," and even "treason." He has examined the GOP's

policies of squandering our surplus, ravaging the environment, and alienating the rest of the world. He's even watched Fox News. A lot. And, in this fair and balanced report, Al bravely and candidly exposes them all for what they are: liars. Lying, lying liars. Al destroys the liberal media bias myth by doing what his targets seem incapable of: getting his facts straight. Using the Right's own words against them, he takes on the pundits, the politicians, and the issues, in the most talked about book of the year. Timely, provocative, unflinching, honest, and always funny, Lies sticks it to the most right-wing administration in memory, and to the right-wing media hacks who do its bidding.

In his first work of narrative nonfiction, Matthew Pearl, bestselling author of acclaimed novel *The Dante Club*, explores the little-known true story of the kidnapping of legendary pioneer Daniel Boone's daughter and the dramatic aftermath that rippled across the nation. On a quiet midsummer day in 1776, weeks after the signing of the Declaration of Independence, thirteen-year-old Jemima Boone and her friends Betsy and Fanny Callaway disappear near the Kentucky settlement of Boonesboro, the echoes of their faraway screams lingering on the air. A Cherokee-Shawnee raiding party has taken the girls as the latest salvo in the blood feud between American Indians and the colonial settlers who have decimated native lands and resources. Hanging Maw, the raiders' leader, recognizes one of the captives as Jemima Boone, daughter of Kentucky's most influential pioneers, and realizes she could be a valuable pawn in the battle to drive the colonists out of the contested Kentucky territory for good. With Daniel Boone and his posse in pursuit, Hanging Maw devises a plan that could ultimately bring greater peace both to the tribes and the colonists. But after the girls find clever ways to create a trail of clues, the raiding party is ambushed by Boone and the rescuers in a

battle with reverberations that nobody could predict. As Matthew Pearl reveals, the exciting story of Jemima Boone's kidnapping vividly illuminates the early days of America's westward expansion, and the violent and tragic clashes across cultural lines that ensue. In this enthralling narrative in the tradition of Candice Millard and David Grann, Matthew Pearl unearths a forgotten and dramatic series of events from early in the Revolutionary War that opens a window into America's transition from colony to nation, with the heavy moral costs incurred amid shocking new alliances and betrayals.

But by the Winter of 1943, resistance is growing. Among those fighting their brutal Nazi occupiers are two Jewish sisters, Janny and Lien Brilleslijper from Amsterdam. Risking arrest and death, the sisters help save others, sheltering them in a clandestine safehouse in the woods, they called “The High Nest.” This secret refuge would become one of the most important Jewish safehouses in the country, serving as a hiding place and underground center for resistance partisans as well as artists condemned by Hitler. From The High Nest, an underground web of artists arises, giving hope and light to those living in terror in Holland as they begin to restore the dazzling pre-war life of Amsterdam and The Hague. When the house and its occupants are eventually betrayed, the most terrifying time of the sisters' lives begins. As Allied troops close in, the Brilleslijper family are rushed onto the last train to Auschwitz, along with Anne Frank and her family. The journey will bring Janny and Lien close to Anne and her older sister Margot. The days ahead will test the sisters beyond human imagination as they are stripped of everything but their courage, their resilience, and their love for each other. Based on meticulous research and unprecedented access to the Brilleslijpers' personal archives of memoirs and photos, *Sisters of Auschwitz* is a long-overdue homage to two young women's heroism and moral bravery—and a reminder of the power each of us has to change the world.

A sharply honest and moving debut perfect for fans of The Perks of Being a Wallflower and Ask the Passengers. Riley Cavanaugh is many things: Punk rock. Snarky. Rebellious. And gender fluid. Some days Riley identifies as a boy, and others as a girl. But Riley isn't exactly out yet. And between starting a new school and having a congressman father running for reelection in über-conservative Orange County, the pressure—media and otherwise—is building up in Riley's life. On the advice of a therapist, Riley starts an anonymous blog to vent those pent-up feelings and tell the truth of what it's really like to be a gender fluid teenager. But just as Riley's starting to settle in at school—even developing feelings for a mysterious outcast—the blog goes viral, and an unnamed commenter discovers Riley's real identity, threatening exposure. And Riley must make a choice: walk away from what the blog has created—a lifeline, new friends, a cause to believe in—or stand up, come out, and risk everything. From debut author Jeff Garvin comes a powerful and uplifting portrait of a modern teen struggling with high school, relationships, and what it means to be a person.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why

biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Ever since humans sketched primitive maps in the dirt, the quest to understand our surroundings has been fundamental to our survival. Studying geography revealed that the earth was round, showed our ancestors where to plant crops, and helped them appreciate the diversity of the planet. Today, the world is changing at an unprecedented pace, as a result of rising sea levels, deforestation, species extinction, rapid urbanization, and mass migration. Modern technologies have brought people from across the globe into contact with each other,

with enormous political and cultural consequences. As a subject concerned with how people, environments, and places are organized and interconnected, geography provides a critical window into where things happen, why they happen where they do, and how geographical context influences environmental processes and human affairs. These perspectives make the study of geography more relevant than ever, yet it remains little understood. In this engrossing book, Alexander B. Murphy explains why geography is so important to the current moment.

A leading economic historian traces the evolution of American capitalism from the colonial era to the present—and argues that we've reached a turning point that will define the era ahead. "A monumental achievement, sure to become a classic."—Zachary D. Carter, author of *The Price of Peace* In this ambitious single-volume history of the United States, economic historian Jonathan Levy reveals how capitalism in America has evolved through four distinct ages and how the country's economic evolution is inseparable from the nature of American life itself. The Age of Commerce spans the colonial era through the outbreak of the Civil War, and the Age of Capital traces the lasting impact of the industrial revolution. The volatility of the Age of Capital ultimately led to the Great Depression, which sparked the Age of Control, during which the

government took on a more active role in the economy, and finally, in the Age of Chaos, deregulation and the growth of the finance industry created a booming economy for some but also striking inequalities and a lack of oversight that led directly to the crash of 2008. In *Ages of American Capitalism*, Levy proves that capitalism in the United States has never been just one thing. Instead, it has morphed through the country's history—and it's likely changing again right now. “A stunning accomplishment . . . an indispensable guide to understanding American history—and what's happening in today's economy.”—*Christian Science Monitor* “The best one-volume history of American capitalism.”—Sven Beckert, author of *Empire of Cotton*

When a small-town family is pushed to the brink, how far will they go to protect one of their own? An edgy, propulsive read about what we will do in the name of love and blood Tony has always looked out for his younger brother, Nick. So when he's called to a hospital bed where Nick is lying battered and bruised after a violent sexual assault, his protective instincts flare, and a white-hot rage begins to build. As a small-town New England lawyer, Tony's wife,

Julia, has cases involving kids all the time. When Detective Rice gets assigned to this one, Julia feels they're in good hands. Especially because she senses that Rice, too, understands how things can quickly get complicated. Very complicated. After all, one moment Nick was having a drink with a handsome stranger; the next, he was at the center of an investigation threatening to tear not only him, but his entire family, apart. And now his attacker, out on bail, is disputing Nick's version of what happened. As Julia tries to help her brother-in-law, she sees Tony's desire for revenge, to fix things for Nick, getting out of control. Tony is starting to scare her. And before long, she finds herself asking: does she really know what her husband is capable of? Or of what she herself is? Exploring elements of doubt, tragedy, suspense, and justice, *The Damage* is an all-consuming read that marks the explosive debut of an extraordinary new writer.

A raw and funny memoir about sex, dating, and relationships in the digital age, intertwined with a brilliant investigation into the challenges to love and intimacy wrought by dating apps, by firebrand New York Times–bestselling author Nancy Jo Sales At forty-nine, famed Vanity Fair writer Nancy Jo Sales was nursing a broken heart and wondering, “How did I wind up alone?” On the advice of a young friend, she downloaded Tinder, then a brand-new dating app. What followed was a raucous ride through the world of online dating. Sales, an award-winning journalist and single mom, became a leading critic of the online dating industry, reporting and writing

articles and making her directorial debut with the HBO documentary *Swiped: Hooking Up in the Digital Age*. Meanwhile, she was dating a series of younger men, eventually falling in love with a man less than half her age. *Nothing Personal* is Sales's memoir of coming-of-middle-age in the midst of a new dating revolution. She is unsparingly honest about her own experience of addiction to dating apps and hilarious in her musings about dick pics, sexting, dating FOMO, and more. Does Big Dating really want us to find love, she asks, or just keep on using its apps? Fiercely feminist, *Nothing Personal* investigates how Big Dating has overwhelmed the landscape of dating, cynically profiting off its users' deepest needs and desires. Looking back through the history of modern courtship and her own relationships, Sales examines how sexism has always been a factor for women in dating, and asks what the future of courtship will bring, if left to the designs of Silicon Valley's tech giants—especially in a time of social distancing and a global pandemic, when the rules of romance are once again changing.

The American Geographical Society was the pre-eminent geographical society in the nineteenth-century U.S. This book explores how geographical knowledge and practices took shape as a civic enterprise, under the leadership of Charles P. Daly, AGS president for 35 years (1864-1899). The ideals and programmatic interests of the AGS link to broad institutional, societal, and spatial contexts that drove interest in geography itself in the post-Civil War period, and also link to Charles Daly's personal role as New York civic leader, scholar, revered New York judge, and especially, popularizer of geography. Daly's leadership in a number of civic and social reform causes resonated closely with his work as geographer, such as his influence in tenement housing and street sanitation reform in New York City. Others of his projects served commercial interests, including in American

railroad development and colonization of the African Congo. Daly was also New York's most influential access point to the Arctic in the latter nineteenth century. Through telling the story of the nineteenth-century AGS and Charles Daly, this book provides a critical appraisal of the role of particular actors, institutions, and practices involved in the development and promotion of geography in the mid-nineteenth century U.S. that is long overdue.
