This magnificent book tells the story of a Ferrari 250 GTO with a particularly interesting and varied history. The car, chassis number 4153 GT, came fourth in its first outing at the Le Mans 24 Hours in 1963, and won the 10-day race-cum-rally Tour de France in 1964 with Lucien Bianchi and Georges Berger. It competed in almost every form of motorsport, including the Angolan Grand Prix, Africa in 1964, and endurance racing, hill-climbing and rallying in 1965, entered by the great Belgian team Ecurie Francorchamps. In 1966-69, it raced in Spain with owner Gerard Delgado and his friend Eugenio Baturone, a period that is described here for the first time. All this is covered in fascinating detail, supported by a fine collection of period photographs.

The origins, evolution, development and individual competition histories of the SP cars, bringing the story up-to-date.

This time honoured classic has been re-built completely: after six editions the editor has decided that a radical revision is necessary. The new edition has been developed as a result of intensive consultation with trainees in OB/GYN as to what they want, what they need and how they learn. The book is organised into two halves covering obstetrics and gynaecology. Within each, the chapters are structured into sections containing pedagogic features such as boxes, highlights and key points for the first time. It contains everything the clinician needs to practice the art of obstetrics and gynaecology and sufficient information to help sub-specialists develop their specific interests. This text is recommended reading for the Royal College of Obstetrics and Gynaecology membership examination. This seventh

Having left motor racing in the early 1950s - at least officially - Alfa Romeo returned to the sport once again at the start of the following decade due to the commitment and enthusiasm of Autodelta. This Alfa offshoot distinguished itself by preparing and racing about 30 of the manufacturer's different cars that really did make history. Among them, the Giulia TZ holds a place at the head of the crowd. It had a 1.5-litre, 113 hp engine from the Giulia SS, front and rear suspension of modern conception, disc brakes and an especially bold body shaped by Zagato on a modern tubular chassis. Those were the strong points of this car, which scored results of absolute prestige in its brief career at Sebring, in the Targa Florio, the 24 Hours of Le Mans and the Tour de France. Prato, already the author of a meticulously written book on the Alfa Romeo SZ, covers the winning, human, technical and sporting factors of this unforgettable car in a monumental work. A book which, to the precise text and painstaking historical reconstruction, has been added illustrations of previously unpublished pictures and technical designs by Autodelta.

Advances in Hydrogen Production, Storage and Distribution reviews recent developments in this key component of the emerging "hydrogen economy," an energy infrastructure based on hydrogen. Since hydrogen can be produced without using fossil fuels, a move to such an economy has the potential to reduce greenhouse gas emissions and improve energy security. However, such a move also requires the advanced production, storage and usage techniques discussed in this book. Part one introduces the fundamentals of hydrogen production, storage, and distribution, including an overview of the development of the necessary infrastructure, an analysis of the potential environmental benefits, and a review of some important hydrogen production technologies in conventional, bio-based, and nuclear power plants. Part two focuses on hydrogen production from renewable resources, and includes chapters outlining the production of hydrogen through water electrolysis, photocatalysis, and bioengineered algae. Finally, part three covers hydrogen production using inorganic membrane reactors, the storage of hydrogen, fuel cell technology, and the potential of hydrogen as a fuel for transportation. Advances in Hydrogen Production, Storage and Distribution provides a detailed overview of the components and challenges of a hydrogen economy. This book is an invaluable resource for research and development professionals in the energy industry, as well as academics with an interest in this important subject. Reviews developments and research in this dynamic area

Copiously researched and documented, Hit Men is the highly controversial portrait of the pop music industry in all its wild, ruthless glory: the insatiable greed and ambition; the enormous egos; the fierce struggles for profits and power; the vendettas, rivalries, shakedowns, and payoffs. Chronicling the evolution of America's largest music labels from the Tin Pan Alley days to the present day, Fredric Dannen examines in depth the often venal, sometimes illegal dealings among the assorted hustlers and kingpins who rule over this multi-billion-dollar business. Updated with a new last chapter by the author.

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble Fiat hatchback, would the cars ever be considered 'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup

Superbly illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa Romeo.

Through detailed readings of a wide variety of accounts, debates, and representations, *Encounters with Wild Children* explores the many different meanings these children were given and the varied responses they elicited. Adriana Benzaquén explains why wild children continue to haunt and fascinate Western scientists and shows how the knowledge they have generated in different disciplines, including anthropology, psychology, psychiatry, pedagogy, linguistics, and sociology, has contributed to the shaping and reshaping of the modern understanding of "the child" and affected the social and institutional practices directed at all children in schools, welfare, mental health, and the law.

Examines the history of the Alfa Romeo automobile, highlighting the racing history, discussing notable leaders in the company, and describing the technological innovations of the vehicle.

Engine production for the typical car manufactured today is a study in mass production. Benefits in the manufacturing process for the manufacturer often run counter to the interests of the end user. What speeds up production and saves manufacturing costs results in an engine that is made to fall within a wide set of standards and specifications, often not optimized to meet the original design. In short, cheap and fast engine production results in a sloppy final product. Of course, this is not what enthusiasts want out of their engines. To maximize the performance of any engine, it must be

balanced and blueprinted to the exact tolerances that the factory should have adhered to in the first place. Four cylinder, V-8, American or import, the performance of all engines is greatly improved by balancing and blueprinting. Dedicated enthusiasts and professional racers balance and blueprint their engines because the engines will produce more horsepower and torque, more efficiently use fuel, run cooler and last longer. In this book, expert engine builder and veteran author Mike Mavrigian explains and illustrates the most discriminating engine building techniques and perform detailed procedures, so the engine is perfectly balanced, matched, and optimized. Balancing and blueprinting is a time consuming and exacting process, but the investment in time pays off with superior performance. Through the process, you carefully measure, adjust, machine and fit each part together with precision tolerances, optimizing the design and maximizing performance. The book covers the block, crankshaft, connecting rods, pistons, cylinder heads, intake manifolds, camshaft, measuring tools and final assembly techniques. For more than 50 years, balancing and blueprinting has been an accepted and common practice for maximi

This is a collection of informatively captioned photographs detailing the birth and development of Alfa Romeo saloon cars. Indeed, back in the 1950s and 60s, they were perceived as the benchmark sports saloons and set the pace long before the arrival of such other sporting models as those from the BMW 3-series. This book follows the story of Alfa Romeo from the early days of production in 1910, through a multitude of racing successes, to the company's emergence as a builder of world-class sports and touring machines in the 1950s. John Tipler explores the development of the four-door saloon cars during the 1950s and 60s, from the 1900 Giulietta, Giulia TI and Super Berlinas to the Alfetta and Alfasud saloons of the 1970s and the 33 and 75 models of the 1980s. The author also describes the new generation of cars, which emerged in the 1990s, including the striking 156 that instantly gained the coveted Car of the Year Award.

The powerful and beautiful Alfa Romeo Montreal coupé is the ultimate "dream car that came true." Created as a futuristic concept car for Canada's Expo 67 World Fair, the exciting prototype was a dream car par excellence. The production model to

which it gave birth was equipped with a race-bred 200bhp V8 engine, and manufactured in series from 1970 to 1977. Almost 4,000 Montreals were built, and sound cars are readily available today at very affordable prices. This book is a comprehensive pictorial tribute to the Montreal, a visual testimonial to the combined talents of Alfa Romeo engineers and Bertone stylists. It highlights the fusion of technical ingenuity and aesthetics that created one of the most stunning series production automobiles of the twentieth century. The book explores the marriage of technology and art that appeals to both reason and the heart, combining man's rational desire for fast, efficient personal transportation with his emotive passion for exotic vehicles. In a portfolio of over 500 illustrations, it paints a unique and detailed graphic portrait of all the facets of this elegant and potent classic GT, revealing why it is immensely enjoyable to drive and turns heads wherever it appears.

In the 1950s and 1960s, luxury car buyers, from government ministers to captains of industry, almost invariably bought British. These were stately, dignified, and grand vehicles, with many featuring leather interiors and wood trim. Unfortunately, that market has now largely disappeared and, with it, so have the car-makers themselves. This new book covers cars in the over-3-litre class from the biggest names in British luxury motoring including Alvis,

Daimler, and Lagonda, and high-end models from Austin, Rover, and Jaguar. It examines the features and characteristics of these classic cars, as well as explaining why they fell from prominence in the 1970s. Replete with beautiful photography throughout, this book is a loving portrait of the British luxury car, a dearly missed saloon defeated by foreign imports.

For the first time, one of the major names in Italian car design tells his story from the beginning; from when he made his first sketches on paper, unbeknown to his parents and not only of cars, to reaching a point at which his name became synonymous with some of the best known and most important cars on the international front. In his 23-year career at Pininfarina, Leonardo Fioravanti, who was first a designer and architect, then managing director and director general of 'Studi & Ricerche' department, created some of the most beautiful Ferraris of all time; they ranged from the 1965 250 LM sports coupe Speciale to the immortal 1968 Daytona through to the 1975 308 GTB and GTS and the 1984 288 GTO, as well as the P5 and P6 of 1968. While continuing his Ferrari essay during his Pininfarina career, Fioravanti also guided the creation of numerous other projects, among them the Dino road car, the 1980 Pinin four-door prototype and went on to the 1984 Testarossa and the 1987 F40. He worked for the Fiat Group from 1988 until

1991, during which time he took on the roles of deputy director general of Ferrari, later became responsible for advanced design CRF and then head of the Fiat Styling Centre. In 1987, he founded Fioravanti srl, an architectural studio, and in 1991 he extended his services to industry, in particular the design of means of transport. Images of an epoch, designs from his own personal archive never previously seen and, above all, a passionate first person account. Those are the key elements of this outstanding book which, through the creations of Leonardo Fioravanti, covers over 50 years of the history of automobile style and culture.

What do you do when your life feels as busy as a three-ring circus? Juggling Elephants tells a simple but profound story about one man with a universal problem. Mark has too much to do, too many priorities, too much stress, and too little time. As he struggles to balance his many responsibilities without cracking under the pressure, Mark takes a break to attend the circus with his family. There he has a surprising conversation with a wise ringmaster. He leaves with a simple but powerful lesson: Trying to get everything done is like juggling elephants -- impossible. So Mark begins to think about his work, family, and personal life the way a ringmaster thinks about the many acts in a three-ring circus. He discovers that managing his various acts can be fun and easy once he changes his attitude and follows his new friend's ongoing guidance. Mark soon realizes:

- If you keep trying to juggle elephants, no one, including you,

will be thrilled with your performance. • A ringmaster cannot be in all three rings at once. • The key to the success of a circus is having quality acts in all three rings. • Intermission is an essential part of any good circus. Juggling Elephants is a wonderfully lighthearted guide for everyone who feels like they're about to be squashed. It will help you better focus your time and energy, so you'll be able to enjoy more of the things that are important to you. Above all, it will teach you how to run your circus, instead of letting the circus run you.

Media has long been considered a primary site for political discourse in Western liberal democracies, but now, with the advent of social media, giant multinational digital platforms such as Google, and online journalism, the way we do politics, talk politics, and cover politics has completely transformed. Trump, Trudeau, Tweets, Truth considers the ways that technology has led to an irreversible transition in power distribution, political journalism, and public discourse. Discussing how the military-industrial complex of the 1950s gave way to today's celebrity-distribution complex, Bill Fox examines the amount of power accorded to people well-known for being well-known, from Donald Trump to Justin Trudeau. Taking on a Canadian perspective, Fox addresses the disturbing cries of "fake" news in the post-truth age and demonstrates how journalism, no longer the domain of a select few political reporters and editors, has become decentralized and disaggregated. In a world that now plays out on mobile devices, Trump, Trudeau, Tweets, Truth seeks a path through the debris left behind by recent seismic shifts in political media and technology.

A lost classic of Western herbalism—rediscovered and restored with 200 full-color images. Herbalist to King Charles I, John Parkinson (1567–1650) was a master apothecary, herbalist, and gardener. Famous in his own lifetime for his influential books, his magnum opus, the *Theatrum Botanicum*, was published in 1640 and ran to 1,766 large pages. The sheer scope and size was perhaps to prove the book's downfall, because while it was much revered—and plagiarized—it was never reprinted and, centuries later, has attained the status of an extremely rare and valuable book. Parkinson was writing at a time when Western herbalism was at its zenith, and his skills as a gardener (from his grounds in Covent Garden) combined perfectly with his passion for science, observation, and historical scholarship. In *The Herbalist's Bible*, Julie Bruton-Seal and Matthew Seal have beautifully combined selections from Parkinson's book with their own modern commentary on how each plant is used today to create a truly one-of-a-kind, comprehensive collection of herbal information old and new. Parkinson's clear and lively description of a chosen plant's "vertues" or healing properties side-by-side with the editors' notes—including copious herbal recipes—make this the perfect book for students and practitioners of herbalism, historians, and gardeners, all of whom will welcome this restoration of Parkinson's lost classic.

This book presents the fundamental principles of drilling engineering, with the primary objective of making a good well using data that can be properly evaluated through geology, reservoir engineering, and management. It is written to assist the geologist, drilling engineer, reservoir engineer, and manager in performing their assignments. The topics are introduced at a level that should give a good basic understanding of the subject and encourage further investigation of specialized interests. Many organizations have separate departments, each performing certain functions that can be done by several methods. The reentering of old areas, as the industry is doing today, particularly emphasizes the necessity of good holes, logs, casing design, and cement job. Proper planning and coordination can eliminate many mistakes, and I hope the topics discussed in this book will play a small part in the drilling of better wells. This book was developed using notes, comments, and ideas from a course I teach called "Drilling Engineering with Offshore Considerations." Some "rules of thumb" equations are used throughout, which have proven to be helpful when applied in the proper perspective. The topics are presented in the proper order for carrying
