frozen death has never deterred the steady stream of treasure hunters searching for a legendary prize hidden somewhere in the vast expanse of ice. Jorie thinks they're all fools, which makes scavenging their possessions easier. It's how she and her sister, Brenna, survive. Then Jorie scavenges off the wrong body. When the dead man's enemy believes Jorie took something valuable from the body, he kidnaps Brenna as collateral. He tells Jorie that if she wants her sister back, she'll have to trade her for the item he thinks she stole. But how can Jorie make a trade when she doesn't even know what she's looking for? Two years ago when we published James Herriot's All Creatures Great and Small, we called it a "miracle between covers." In the first major review of the book, Alfred Ames said: "If there is any justice, All Creatures Great and Small will become a classic of its kind. The publishers call it a miracle-- not too strong a word for a book that offers something for everyone: gusto, humor, pathos, information,

romance, insight, style. It is vicarious living with one of the happiest and most admirable of people, a veterinary surgeon in the Yorkshire dales who can write superlatively well." James, the miracle worker, has done it again. All Things Bright and Beautiful is precisely the warm and joyful sequel that readers all over America have been asking for. James is now married, and he and Helen live on the top floor of Skeldale House, while his former boss, now partner, Siegfried lives downstairs with Siegfried's brother Tristan. James continues the rich and rewarding day-to-day life of a small-town veterinarian, and we journey with him across the dales meeting a whole new cast of unforgettable characters-- humans, dogs, horses, lambs, parakeets-- all of them drawn with the same infinite fascination, affection, and insight that have made Herriot one of the most beloved authors of our time. This is the most loving book of the year to have-- or to give.

A thought-provoking, original appraisal of the meaning of religion by the host of public radio's On Being Krista Tippett, widely becoming known as the Bill Moyers of radio, is one of the country's most intelligent and insightful commentators on religion, ethics, and the human spirit. With this book, she draws on her own life story and her intimate conversations with both ordinary and famous figures, including Elie Wiesel, Karen Armstrong, and Thich Nhat Hanh, to explore complex subjects like science, love, virtue, and violence within the context of spirituality and everyday life. Her way of speaking about the mysteries of life--and of listening with care to those who endeavor to understand those mysteries--is nothing short of revolutionary.

For many surviving military veterans, the Vietnam War is an indelible part of their lives. That they survived is due in many cases to the heroic, life-saving actions of combat medics like Bill "Doc" Strusinski. Being a frontline medic was, and still is, one of the most dangerous jobs in the Army. Medics were targeted by the enemy and often

called upon to aid fallen soldiers in the line of fire. In Strusinski's riveting book, "Care Under Fire," Strusinski thrusts the reader squarely into moments of terror during firefights, the exhaustion of endless patrols, the anguish of losing buddies despite best efforts to save them, and the intimate bonds created during times of desperate need. This is a book about war, yes, but even more about how one man was transformed by his "sacred duty" to offer care under fire to the young soldiers he fought beside.

The highs and lows of being a vet in the Yorkshire Dales are perfectly captured in James Herriot's *All Creatures Great and Small* which contains *If Only They Could Talk* and *It Shouldn't Happen to a Vet*.

Davison has gone ahead and written his autobiography anyway. It wasn't the book they tried to stop – it was more like the book they didn't want him to start. An aspiring singer-songwriter, once dubbed Woking's answer to Bob Dylan (by his mum, who once heard a Bob Dylan song), Peter actually penned a hit for Dave Clark but soon swapped a life on the pub circuit to tread the boards. From colonial roots – his dad was Guyanese and his mother was born in India – the family settled in Surrey where Peter's academic achievements were unspectacular – he even managed to fail CSE woodwork, eliciting a lament from his astonished teacher ('All you have to do is recognise wood!'). Despite this, Peter has secured his place in science fiction history, becoming the fifth Doctor Who, although he nearly turned down the role. The Time Lord connection continued with the marriage of his daughter Georgia to Dr Who number ten, David Tennant. The artist formerly known as Peter Malcolm Gordon Moffett has starred in a number of television series including Love for Lydia, A Very Peculiar Practice, At Home with the Braithwaites and The Last Detective and became a national treasure for having his arm up a cow in his role as Tristan Farnon in All Creatures Great and Small. He was also in a Michael Winner movie... He made his first stage appearance with an amateur dramatic company, but The Byfleet Players' loss was the West End's gain as he now has a number of musicals to his name, including Legally Blonde, Chicago and Spamalot. Most recently he starred in the box office record-breaking Gypsy where he rubbed shoulders backstage with Dames Meryl Streep,

One thing is for sure: of all the British screen and stage actors of the last fifty years, Peter Davison is certainly one of them and, within these pages, intrepid readers will at last have the dubious honour of sharing in his life and times – as he despairs over whether there truly ever can be life outside the box.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.
