

Almost All Aliens By Paul Spickard

Race and Immigration in the United States is a collection of the very best of the new generation of scholarship in the field of immigration history. The traditional Ellis Island model of immigrant assimilation is no longer adequate to understand American history. A more subtle model is needed – one which does not exclude peoples of color from view, nor treat the experiences of European immigrants as a template for the experiences of non-white migrants. In this important collection, Paul Spickard draws together essays that illuminate the crucial differences that race makes in the study of American history. Bringing the insight of ethnic studies scholarship into the history of immigration, Race and Immigration in the United States is an essential collection for anyone studying ethnicity and immigration in American history.

All over the world there are fantastic ruins and objects that cannot be explained by conventional history, archaeology or religion. In the ground-breaking Chariots of the Gods, Erich von Daniken provides answers to these questions...why do religious texts often refer to Gods who descend from fiery chariots? Why do modern space launch sites look like constructions on the plains of Nazca in Peru? Was God an astronaut? By looking at human history and the ruins of ancient civilisations with an open mind, Erich von Daniken offers a new solution to these eternal mysteries in Chariots of the Gods. Why, for instance, do the world's sacred books describe Gods who came down from the sky in fiery chariots and always promised to return? How could an ancient Sanskrit text contain an account which could only be of a journey in an alien craft? Compare photographs of American space centre launch sites to the constructions on the plains of Nazca in Peru. In order to understand the mysteries which Erich von Daniken has catalogued we must go back to these ancient relics with an open mind. We must call in the resources and experience of sciences other than archaeology. Chariots of the Gods is a provocative attempt to explain some of the universe's most interesting mysteries. Erich von Daniken has spent a lifetime gathering evidence to prove that, before the dawn of recorded history, our ancestors were visited by an alien race. Erich von Daniken was responsible for popularising the ancient astronaut hypothesis of human development. Orthodox historians have been sceptical but a vast public have been drawn to his ideas by instinctive interest and wonder. His 26 books have sold over 60 million copies in over 40 languages.

THEY'RE UP THERE... Meet Arcadia Alvarado, Governor of New Mexico and Presidential hopeful. She's dealing with immigration policy, budget cuts, an alcoholic ex--and she was abducted by aliens. Or was she? Shadowy organizations, hypno-regression therapy, missing Roswell files, a lot to deal with while running for President and in a desperate act, Governor Alvarado seeks help from a disgraced, Harvard UFOologist who... might not be completely sane. It's a strange road to the White House but Alvarado is determined to get there because she has information that could stop an alien invasion and save the world. From the warped minds of writer Paul Cornell and artist Ryan Kelly SAUCER COUNTRY is a gripping story that explores the dirty world of politics while probing for the truth at the core of alien mythology and the American psyche. Collects all 14 issues of the original series.

Sean Murphy, a responsible, doting husband, father, and provider, executes his impulsive plan to kidnap a wealthy infant heir. His wife Kathryn and their two toddler daughters, Nichole and Lauren, are unknowing participants in this perfect crime. Sean rents a cozy, secluded cottage to provide a relaxing summer for his family, and they welcome the unexpected, beautiful baby boy that Sean brings home to join their lazy days by the lake. Sean's arrangements are unfolding as the perfect crime, or are they? Are his plans as seamless and foolproof as he believes? He takes every precaution, or does he? Will the Winslows ever hold their baby again? Will Kathryn discover her husband's covert activities? Deemed a "riveting crime story that had my full attention" by retired New York Police Department Chief Michael Scagnelli, "Ransom By Mail" is a suspenseful fiction that will keep you engaged until the final page. Paul R. Payton's first novel will captivate human nature and the conflict of resentment, revenge, and wealth resurfacing and influencing reasoning, life choices, and life's finale in a thriller with twists and turns that no one expects.

Sir Arthur Ignatius Conan Doyle DL (22 May 1859 - 7 July 1930) was a Scottish physician and writer who is most noted for his fictional stories about the detective Sherlock Holmes, which are generally considered milestones in the field of crime fiction. He is also known for writing the fictional adventures of a second character he invented, Professor Challenger, and for popularising the mystery of the Mary Celeste. He was a prolific writer whose other works include fantasy and science fiction stories, plays, romances, poetry, non-fiction, and historical novels. Sherlock Holmes is a fictional detective created by Scottish author and physician Sir Arthur Conan Doyle, a graduate of the University of Edinburgh Medical School. A London-based "consulting detective" whose abilities border on the fantastic, Holmes is famous for his astute logical reasoning, his ability to adopt almost any disguise, and his use of forensic science skills to solve difficult cases. Holmes, who first appeared in publication in 1887, was featured in four novels and 56 short stories. The first novel, A Study in Scarlet, appeared in Beeton's Christmas Annual in 1887 and the second, The Sign of the Four, in Lippincott's Monthly Magazine in 1890. The character grew tremendously in popularity with the first series of short stories in The Strand Magazine, beginning with "A Scandal in Bohemia" in 1891; further series of short stories and two novels published in serial form appeared between then and 1927. The stories cover a period from around 1880 up to 1914. All but four stories are narrated by Holmes's friend and biographer, Dr. John H. Watson; two are narrated by Holmes himself ("The Blanched Soldier" and "The Lion's Mane") and two others are written in the third person ("The Mazarin Stone" and "His Last Bow"). In two stories ("The Musgrave Ritual" and "The Gloria Scott"), Holmes tells Watson the main story from his memories, while Watson becomes the narrator of the frame story. The first and fourth novels, A Study in Scarlet and The Valley of Fear, each include a long interval of omniscient narration recounting events unknown to either Holmes or Watson.

YA. Featuring the eighth Dr Who on an island in the East Indies in a lost city. 11 yrs+

In recent years, Europeans have engaged in sharp debates about migrants and minority groups as social problems. The

discussions usually neglect who these people are, how they live their lives, and how they identify themselves. Multiple Identities describes how migrants and minorities of all age groups experience their lives and manage complex, often multiple, identities, which alter with time and changing circumstances. The contributors consider minorities who have received a lot of attention, such as Turkish Germans, and some who have received little, such as Kashubians and Tartars in Poland and Chinese in Switzerland. They also examine international adoption and cross-cultural relationships and discuss some models for multicultural success.

Home to generations of humans, the starship Argonos has wandered aimlessly throughout the galaxy for hundreds of years, desperately searching for other signs of life. Now, a steady, unidentified transmission lures them toward a nearby planet, where the grisly remains of a former colony await the crew. Haunted by what they have seen, the crew has no choice but to follow when another signal beckons the Argonos into deep space—and into the dark heart of an alien mystery... “[Russo] is not afraid to take on the question of evil in a divinely ordered universe... This is an ambitious novel of ideas that generates considerable suspense while respecting its sources, its characters, and most important, the reader.”—The New York Times “A tale of high adventure and personal drama in the far future.”—Library Journal “Relentlessly suspenseful...full of mystery...very exciting.”—Science Fiction Chronicle

Colonial American History Stories - 1215 - 1664 contains almost 300 history stories presented in a timeline that begins in 1655 with the performance of the first documented play performed in British North America and ends with the switch from the Julian to the Gregorian Calendar in 1752. This journal of historical events mark the beginnings of the United States and serve as a wonderful guide of American history. These reader friendly stories include: September 27, 1540 - Society of Jesus (Jesuits) Founded By Ignatius Loyola December 19, 1675 - The Great Swamp Fight September 19, 1676 - Bacon's Rebellion - Bacon Burns Jamestown April 18, 1689 - 1689 Boston Revolt February 29, 1692 - Sarah Good, Sarah Osborne and Tituba Accused Of Witchcraft in Salem, Massachusetts May 22, 1718 - Edward Teach - Blackbeard - Begins Blockade of Charlestown. November 02, 1734 - Daniel Boone Born December 08, 1741 - Vitus Bering Died December 23, 1750 - Ben Franklin Attempts to Electrocute a Turkey December 31, 1752 – Julian/Gregorian Calendar Switch Complete timeline, journal, events, stories, united states, beginnings, guide

Twenty-third century Earth, ravaged by climate change, looks backwards to the holy ideal of a pre-industrial Eden. Political power has been grabbed by a few powerful families and their green saints. Millions of people are imprisoned in teeming cities; millions more labour on Pharaonic projects to rebuild ruined ecosystems. On the moons of Jupiter and Saturn, the Outers, descendants of refugees from Earth's repressive regimes, have constructed a wild variety of self-sufficient cities and settlements: scientific utopias crammed with exuberant creations of the genetic arts; the last outposts of every kind of democratic tradition. The fragile detente between the Outer cities and the dynasties of Earth is threatened by the ambitions of the rising generation of Outers, who want to break free of their cosy, inward-looking pocket paradises, colonise the rest of the Solar System, and drive human evolution in a hundred new directions. On Earth, many demand pre-emptive action against the Outers before it's too late; others want to exploit the talents of their scientists and gene wizards. Amid campaigns for peace and reconciliation, political machinations, crude displays of military might, and espionage by cunningly wrought agents, the two branches of humanity edge towards war...

IS THE TOWN OF DULCE, NEW MEXICO THE LOCATION OF AN UNDERGROUND BASE GUARDED BY U.S. FORCES AND INHABITED BY A GROUP OF SINISTER EXTRATERRESTRIALS? OR IS ALL THE UFO AND PARANORMAL ACTIVITY IN THE AREA MERELY A FALSE FLAG DESIGNED TO ACT AS A CONVENIENT COVER STORY FOR SECRET BLACK PROJECT OPERATIONS? OR PERHAPS SOMETHING EVEN MORE SINISTER IS TAKING PLACE AT THIS LOCAL AS SUGGESTED BY RADIO HOST JC JOHNSON WHEN HE ASKS, "Are the beings working with the government there in fact demons whose evil exceeds anything we may think we know about aliens in Dulce?" "It is an absolutely incredible story," says Timothy Green Beckley, editor of the Conspiracy Journal. Since the mid to late 1970s there have been all sorts of rumors about an underground laboratory beneath the town of Dulce. The UFO Hunters show on the History Channel recently featured the entire saga of what has been taking place on Native American soil, and a few days later George Noory and Coast to Coast AM plunged head first trying to make sense out of the various accounts that have surfaced. Beckley admits that it is difficult to pin-point exactly when this macabre saga started to develop. But he gives credit to an engineer named Paul Bennewitz for getting the ball rolling when Bennewitz says he was called to the area when aliens started to communicate with him over a radio receiver. He had been directed to Dulce after observing UFOs over Kirkland Air Force Bases nuclear storage facility. Standing near the tall cliffs outside Dulce, Bennewitz took a series of photographs showing unidentified craft diving into the mountains through what he claimed were entrance ways that could be opened and closed. Around the same time there was a dramatic increase in animal mutilations in the vicinity and at least one person, Christa Tilton came forward to claim that she was abducted and taken to this subterranean facility. Her full report and all the information which makes for a startling cosmic Dragnet story are included in this far reaching work. One individual in the U.S. military who was involved in the early stages of this investigation claims he engaged in hand to hand combat with ETs who had taken over level seven of the Dulce Base after a conflict with our soldiers. Another person involved in this epic committed "suicide" shortly after the "Dulce affair" was made public. Much has been speculated upon regarding this sinister matter. But this is the complete work that contains balanced information and details from all sides. First time ever interview with Paul Bennewitz who was pushed over the edge never to return to sanity.

The Earth lies in ruins in the aftermath of an extraterrestrial invasion, the land devastated by a desperate war with no winners between mankind and a race of vicious, intelligent creatures. The seas are drying up while the atmosphere corrodes and slowly cooks any life remaining on the now desolate rock. Food is scarce, trust even more so, and the only people left alive all have done horrific things to stay that way. Among the few survivors is Lucas, an ordinary man hardened by the last few years after the world's end. He's fought off bandits, murderers, and stranded creatures on his long trek across the country in search of his family, the one thing that drives him to outlive his dying planet. What he finds instead is hope, something thought to be lost in the world. There's a ship buried in a crater wall. One of theirs. One that works. To fly it, Lucas must join forces with a traitorous alien scientist and a captured, merciless raider named Asha. But unless they find common ground, all will die, stranded on a ruined Earth. Combining gritty post-apocalyptic survival and epic space opera, The Last Exodus is the beginning of a new action-packed science fiction adventure where the future of the human race depends on its survivors leaving the past behind. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

First comes the red rain: a strange, scarlet downpour from a cloudless sky that spreads across cities, nations, and the entire globe. In a matter of panicked hours, every living thing on earth succumbs to swift, bloody death. With only wits, weapons, and a bicycle, Emily must undertake a grueling journey across a country that's turning increasingly alien. For though she fears she's been left to inherit the earth, the truth is far more terrifying than a lifetime of solitude.

Visit spearheadbooks.com and christopherhopper.com today! DESCRIPTION: Read the story that turned children into warriors, and warriors into legends. The Dairne-Reih haven't been seen in Dionia for generations-their kind and their king, Morgui, banished long ago from haunting paradise. But when creation shows signs of deterioration, the kings of the seven realms converge in the sacred Gvindollion gathering to arrive at one inexplicable conclusion: Morgui has returned. In the hopes of entrusting Dionia's brave history and perilous future to a generation that has never known war, the kings decide to raise up their young sons as an elite group of warriors, known only as the Dibor. Gorn, legendary hero of the First Battle, is commissioned to teach the Dibor the art of war, leading them on a four-year adventure on the Isle of Kirstell. It is Luik, son of Lair, who soon emerges as the warband's spirited front man. But he is not the only one of his peers to grow in power; his dear friend Fane discovers hidden abilities among the Mosfar under the mentorship of Li-Saide of Ot, while Princess Anorra finds that her lifelong tutor knows as much about combat as he does about etiquette. There is little time for the Dibor to enjoy the satisfaction of graduation, however, as a sinister plot is discovered to dethrone Dionia's kings and flatten the capital city of Adriel. The Dibor are summoned to war, along with the rest of Dionia's fighting men. It is before the gates of Adriel Palace that Luik and his army face Morgui's prince, Valdenil, as well as the unending ranks of the Dairne-Reih.

"The stories in Varzally's book are great, and they drive the analysis, which really does tell us a lot about how people form interracial relationships and how interethnic coalitions-indeed, how races-are formed in the everyday reality of people's experiences." -Paul Spickard, author of *Almost All Aliens: Immigration, Race, and Colonialism in American History and Identity* "Most important among its contributions, this book points towards a broad reconceptualization of America's past that incorporates the various cultural communities of the United States, not as subordinate actors in an Anglo-centric narrative, but as equal participants in our nation's history." -Mark Wild, author of *Street Meeting: Multiethnic Neighborhoods in Early Twentieth Century Los Angeles*

Scholarship on immigration to America is a coin with two sides: it asks both how America changed immigrants, and how they changed America. Were the immigrants uprooted from their ancestral homes, leaving everything behind, or were they transplanted, bringing many aspects of their culture with them? Although historians agree with the transplantation concept, the notion of the melting pot, which suggests a complete loss of the immigrant culture, persists in the public mind. The Oxford Handbook of American Immigration and Ethnicity bridges this gap and offers a comprehensive and nuanced survey of American racial and ethnic development, assessing the current status of historical research and simultaneously setting the goals for future investigation. Early immigration historians focused on the European migration model, and the ethnic appeal of politicians such as Fiorello La Guardia and James Michael Curley in cities with strong ethno-political histories like New York and Boston. But the story of American ethnicity goes far beyond Ellis Island. Only after the 1965 Immigration Act and the increasing influx of non-Caucasian immigrants, scholars turned more fully to the study of African, Asian and Latino migrants to America. This Handbook brings together thirty eminent scholars to describe the themes, methodologies, and trends that characterize the history and current debates on American immigration. The Handbook's trenchant chapters provide compelling analyses of cutting-edge issues including identity, whiteness, borders and undocumented migration, immigration legislation, intermarriage, assimilation, bilingualism, new American religions, ethnicity-related crime, and pan-ethnic trends. They also explore the myth of "model minorities" and the contemporary resurgence of anti-immigrant feelings. A unique contribution to the field of immigration studies, this volume considers the full racial and ethnic unfolding of the United States in its historical context.

In the vein of Randall Munroe's *What If?* meets Brian Green's *Elegant Universe*, a senior writer from Space.com leads readers on a wild ride of exploration into the final frontier, investigating what's really "out there." We've all asked ourselves the question. It's impossible to look up at the stars and NOT think about it: Are we alone in the universe? Books, movies and television shows proliferate that attempt to answer this question and explore it. In *OUT THERE* Space.com senior writer Dr. Michael Wall treats that question as merely the beginning, touching off a wild ride of exploration into the final frontier. He considers, for instance, the myriad of questions that would arise once we do discover life beyond Earth (an eventuality which, top NASA officials told Wall, is only drawing closer). What would the first aliens we meet look like? Would they be little green men or mere microbes? Would they be found on a planet in our own solar system or orbiting a star far, far away? Would they intend to harm us, and if so, how might they do it? And might they already have visited? *OUT THERE* is arranged in a simple question-and-answer format. The answers are delivered in Dr. Wall's informal but informative style, which mixes in a healthy dose of humor and pop culture to make big ideas easier to swallow. Dr. Wall covers questions far beyond alien life, venturing into astronomy, physics, and the practical realities of what long-term life might be like for we mere humans in outer space, such as the idea of lunar colonies, and even economic implications. Dr. Wall also shares the insights of some of the leading lights in space exploration today, and shows how the next space age might be brighter than ever.

Scientists and governments are actively searching for signs of life in the universe. Will their efforts meet with success? Award-winning author Paul Davies, an eminent scientist who writes with the flair of a science fiction writer, explores the ramifications that the discovery of extraterrestrial life would have for our science, our religions, and our worldview in general.

This is one of the most important books ever written on the clandestine world of the UFO cover-up. Grant Cameron and Scott Crain do more than demonstrate the reality of an extraterrestrial presence on Earth. Through tenacious investigation and impeccable research, they shine a light into the CIA, NSA, Air Force, Navy, and other inside groups that have managed this secret for decades. Their conclusion is inescapable and shocking: this is a secret that the insiders themselves struggle to understand and contain. "Government agencies, at various times, perceive a need to release some UFO information to the public. Some, definitely not all. How do they do it? Always via avenues that leave no one at risk. That means ensuring there is no direct connection between the agency and whomever is doing the actual releasing. It also means the necessity of mixing in some false information. It means, ultimately, to tell the truth, but tell it with a slant. Until there is a full disclosure of the UFO/ET reality, deniability will remain paramount to those in possession of this great secret." - By the authors, from the book's Introduction.

'Race and Nation' offers a comparison of the various racial & ethnic systems that have developed around the world, in locations that include China, New Zealand, Eritrea & Jamaica.

Draws together a far-ranging set of experiences, all of which bear on the phenomenon of intermarriage. Through his introduction of cultural themes of acceptance, the author broadens the reader's scope of reference in comprehending the forces driving intermarriage.

The mystifying connection between the occult, the New Age movement, and the UFO phenomenon. From both a Christian and objective perspective, and through his unique approach, the author reveals a complex and ingenious scheme that is rapidly unfolding as

A detailed, logical look at the most exciting presidential saga ever, piecing together an explosive puzzle which reveals that other U.S. presidents likely renewed Dwight Eisenhower's secret agreement with visiting ETs on remaining aloof to this day, in order to avoid global panic.

One of the world's leading scientists explains why—and how—the search for intelligent life beyond Earth should be expanded. Fifty years ago, a young astronomer named Frank Drake first pointed a radio telescope at nearby stars in the hope of picking up a signal from an alien civilization. Thus began one of the boldest scientific projects in history, the Search for Extraterrestrial Intelligence (SETI). After a half-century

of scanning the skies, however, astronomers have little to report but an eerie silence—eerie because many scientists are convinced that the universe is teeming with life. Physicist and astrobiologist Paul Davies has been closely involved with SETI for three decades and chairs the SETI Post-Detection Taskgroup, charged with deciding what to do if we're suddenly confronted with evidence of alien intelligence. He believes the search so far has fallen into an anthropocentric trap—assuming that an alien species will look, think, and behave much like us. In this provocative book Davies refocuses the search, challenging existing ideas of what form an alien intelligence might take, how it might try to communicate with us, and how we should respond if it does.

Almost All Aliens offers a unique reinterpretation of immigration in the history of the United States. Leaving behind the traditional melting-pot model of immigrant assimilation, Paul Spickard puts forward a fresh and provocative reconceptualization that embraces the multicultural reality of immigration that has always existed in the United States. His astute study illustrates the complex relationship between ethnic identity and race, slavery, and colonial expansion. Examining not only the lives of those who crossed the Atlantic, but also those who crossed the Pacific, the Caribbean, and the North American Borderlands, Almost All Aliens provides a distinct, inclusive analysis of immigration and identity in the United States from 1600 until the present. For additional information and classroom resources please visit the Almost All Aliens companion website at www.routledge.com/textbooks/almostallaliens.

Let Me Tell A Story is quite a departure from the military crime fiction Betit has published in the past. Written in the same tight but detailed style characteristic of his earlier books, this collection is a mix of short fiction and memoir, first-person stories that take place over a period of nearly 60 years. Although written in the first person, the narrator of one story is not necessarily the narrator of the next story in the book. It starts with a tale about a 12-year-old boy who learns some important life lessons during a family trip to Maine's northern-most Aroostook County in the 1950s. It ends with a piece about an elderly Maine couple learning some lessons of their own while coming to grips with old age in the near present. In between there are stories about young soldiers and old soldiers, husbands and wives, mothers and fathers and other sordid types. Half of the ten stories in the book take place in Maine. A lot of the pieces were based on Betit's experiences during the Vietnam War and its aftermath "I call them woulda-coulda-shoulda stories," he said. "All of them contain more than one grain of truth. Usually, a lot more." Previously, Betit published *Phu Bai*, *Kagnew Station* and *The Man In The Canal*, military crime novels set in South Vietnam, Ethiopia and Sweden, respectively, during the late 60s and early 70s. That series follows the adventures of U.S. Army CID investigator John Murphy. During book talks promoting his crime novels Betit sometimes read early versions of a few of the stories in *Let Me Tell A Story* at his events. "It was a good change of pace and the stories were well received," he said. "Like my other books, this book can be classified as a good read."

The story is about a golden-haired youth who wanders into the city of Teloth, telling tales of the great city of Aira, where he was prince. While Iranon enjoys singing and telling his tales of wonder, few appreciate it. A city solon even orders Iranon to cease his singing & music, and become apprenticed to the cobbler - or leave the city by sunset. When a disenfranchised boy named Romnod suggests leaving Teloth to go to the famed city of Oonai (which he thinks may be Aira, now under a different name), Iranon takes him up on his offer.

ABOUT THE BOOK Since the terrorist attack of September 11th America has been filled with clouds of evil. They have darkened our reason and covered us with ashes of anger. How do we sort out our feelings of revenge and retaliation with those of understanding, compassion and love? Some of us believe knowledge of American history will give us the insight and maturity that we need to help our nation through this war on terrorism. We need to understand the basic principles of democracy and freedom to know what we have fought for in the past and what we fight for now. Americans need to rededicate themselves to the cause of freedom to face the future. Freedom should not be taken for granted because there are those who would take it from us. We need to understand that some governments terrorize and abuse their people. These governments intentionally control their people by keeping them oppressed and ignorant. The history of our country is great but as Thomas Jefferson warned: "If a nation expects to be ignorant and free, it expects what never was and never will be." A recent alarming ACTA report which polled seniors at the nation's top 55 colleges indicates that we have a generation of Americans who are historically illiterate. The survey revealed that almost half would fail the basic test in American history required for immigrants who seek citizenship in the United States.

American Symbols For Schools has the common information about the different state flowers, birds and trees as well as information about the many new symbols which the states have enacted which includes their scientific names and dates of inception it also includes the active and colorful history of each state and interesting facts and trivia about the states. This special commemorative Civics and History reference book also contains the American Symbols Collection (flags, seals and more than 150 photographs of American symbols), National symbols, History, National Parks, Places of Interest, Tourist Information, United We Stand Anthem, Song and Bookmark. Editorial Reviews From the Author As author of this keepsake edition I have taken great care in compiling this information to insure its value to you in your library. I sincerely hope you enjoy reading American Symbols For Schools as much as I enjoyed writing it. Debbie Sennett

In a futuristic military adventure a recruit goes through the roughest boot camp in the universe and into battle with the Terran Mobile Infantry in what historians would come to call the First Interstellar War

"Del Rey book." Battling the Taurans in space was one problem as Private William Mandella worked his way up the ranks to major. In spanning the stars, he aged only months while Earth aged centuries.

"In the spring of 2031 terrorists detonate nuclear bombs in nine American and European cities. They are not the small "suitcase" bombs intelligence agencies had anticipated, but large strategic weapons, smuggled to their targets on trucks and aboard ships. Millions die in the firestorms. In the months that follow, thousands more are lost to radiation sickness, starvation and the lawless gangs terrorizing the countryside. The global financial system collapses. The military labors to establish order but is forced to commit nearly all its resources to the cities, which have become massive refugee camps. In the rural outland there is anarchy. The Chinese offer aid, but demand an impossible concession: the dissolution of the United States and creation of a new Sino-American continental state. They are refused. Can the U.S. hope to rebuild without aid? Its wounds are deep, the damage severe. The struggle continues, the days grind on, but the leaders know they are making almost no progress. In July they receive news so terrible that at first they cannot believe it. In five locations at once, Chinese troops are landing on American beaches. For the first time in over 200 years the United States is being invaded by a foreign power!"--Amazon blurb.

Paul Hill was a well-respected NASA scientist when, in the early 1950s, he had a UFO sighting. Soon after, he built the first flying platform and was able to duplicate the UFO's tilt-to-control maneuvers. Official policy, however, prevented him from proclaiming

his findings. "I was destined," says Hill, "to be as unidentified as the flying objects." For the next twenty-five years, Hill acted as an unofficial clearinghouse at NASA, collecting and analyzing sightings' reports for physical properties, propulsion possibilities, dynamics, etc. To refute claims that UFOs defy the laws of physics, he had to make "technological sense... of the unconventional object." After his retirement from NASA, Hill finally completed his remarkable analysis. This book, published posthumously, presents his findings that UFOs "obey, not defy, the laws of physics." Vindicating his own sighting and thousands of others, he proves that UFO technology is not only explainable, but attainable.

Have you ever felt there was something else out there? Have you ever felt you could do more for the world than what you thought was being done already? Have you ever felt like you weren't quite meeting your potential, but didn't know how to take that extra step towards greatness? Have you ever thought about what you might do if suddenly all those questions had answers? I hadn't. I also did not believe in love at first sight or soul mates. I just wanted to lead a quiet, inconspicuous, normal life. Until the day she walked through my classroom door and everything changed.

A war has left his people on the brink of extinction; Drystan Commander of the King's Warriors will turn to any means necessary to save his people. Jane, an ordinary woman of Earth, falls into the strange land of muscle bound, sword wielding men, unlike she has ever seen and what's worse they seem to want her! Could this woman be the savior of their people? Savior or not Drystan knows what he wants, and he wants Jane. As the passion starts to sizzle evil forces threaten to tear them apart, can Drystan hold onto the woman not only he needs but his people?

Winner of multiple awards, praised by librarians and teachers as one of the best books ever written for teens—NOW BACK IN PRINT! New town, new school, new friends. It was difficult for Ginny at first, but her senior year is finally starting to feel kind of normal. That is, until she sees him—the beautiful mystery in her English class. He has never spoken a word to anyone. He moves through each day at school without making eye contact. His name is Smitty Tibbs, but everyone calls him the Alien. Ginny is convinced there's more to the Alien than his muted exterior. But as she attempts to break into his safe and emotionless world, she realizes her efforts might be causing more harm than good. Has she gone too far, or not far enough? "Utterly compelling...totally satisfying. A fast-moving, unusual contemporary romance that should have great appeal." School Library Journal "The thick wall an abused teenager builds between himself and the world is penetrated at last by an extraordinary pair of friends... A strong book with healing at the end, memorable for its spirited friendships and unpreachy soul-searching." Kirkus Reviews "Ginny's deft and engaging narration reveals a delightful and totally believable teen. [T]he overall impact of this psychological novel is so powerful." Booklist

The Ambassador of God provides exhaustive and in-depth answers to very difficult questions about our cosmic origin and the planet earth. Almost everything to do with the Sun, Moon, Stars, Water, Mars, Jupiter, Aliens... and most importantly - God About the book and author _____ God is real. And for the first time, experimental and observable science reveals his existence. Throughout history, many have argued the existence of God, yet discussions of the Divine have been limited to the realm of philosophy and religion. But what if nature could reveal its creator? And what if science could provide compelling evidences that we have never seen before? What if the identity of the creator behind the origin of our universe can be known for certain? What if... This is what The Ambassador of God, a ground breaking look at our cosmic origin, has provided. In this probing book, difficult questions are answered. As renowned scientists and thinkers challenge the biblical narratives for our cosmic origin, The Ambassador of God uncovers the mysteries that have been hidden from human eyes. Using compelling evidences from astronomy to investigate the underpinnings of the Bible, The Ambassador of God provides a 'cosmic objective certainty' for the existence of a universal Creator. Additionally, it unveils a well of exhaustive insights that eliminates ambiguities in our understanding. How is it possible that God is one and three distinct persons, but not three Gods? Why is the earth and the human body mostly water? Who created the sun, moon and stars? What about aliens and the other solar planets? What is the mystery and purpose behind human existence and other life forms on our planet earth? Why are we here and how did we first arrive on this planet? How do we come to understand divinity in the current scheme of scientific reasoning? How do we make peace with the grand designer behind it all? Readers seeking answers to these questions (and other similar questions) will find them here. They will not find dogma. Instead, they will embark on a journey-an experimental voyage through the lens of science that reveals the mind of God. In a "show" rather than "tell" fashion and a template that's more coherent than any prevailing secular science view, we shall find who God is! Who is the Author? Olumide Sanya is a contemporary poet and writer. Beside poetry and writing, Lumi, as he is affectionately known, helps others to achieve their dreams as a life coach. Unusually drawn to books between the ages of 4 - 9, Lumi neither enjoyed reading nor read books but spent his childhood years looking for abandoned tomes that he turned into a formidable collection. Despite being a non-reader, he realised the dream of becoming a writer in his tender years and for more than 12 years, he abandoned this dream. ...Until one day, God paid him a visit. But it didn't start there, it began with falling in love and writing poems about love and heartbreaks but that's another story for another year. "God has a sense of humor," says Lumi. "It's not hard to see that if you know my story-where I've been, where I'm at, and what God has planned for my tomorrow. What is most important to recognize is what God can do with a 'nobody' like me." The Ambassador of God, he notes, is not just about answers to large existential questions "It is also a road map that offers optimism and guidance in today's confused and increasingly complex modern world." You don't have to be a physics professor or a philosopher to understand Sanya's work. The Ambassador of God aims to open discussion and understanding at the broadest possible level. It is written for everyday people.
