The fifth edition of a work that defines the field of cognitive neuroscience, with entirely new material that reflects recent advances in the field. Each edition of this classic reference has proved to be a benchmark in the developing field of cognitive neuroscience. The fifth edition of *The Cognitive Neurosciences* continues to chart new directions in the study of the biological underpinnings of complex cognition—the relationship between the structural and physiological mechanisms of the nervous system and the psychological reality of the mind. It offers entirely new material, reflecting recent advances in the field. Many of the developments in cognitive neuroscience have been shaped by the introduction of novel tools and methodologies, and a new section is devoted to methods that promise to guide the field into the future—from sophisticated models of causality in brain function to the application of network theory to massive data sets. Another new section treats neuroscience and society, considering some of the moral and political quandaries posed by current neuroscientific methods. Other sections describe, among other things, new research that draws on developmental imaging to study the changing structure and function of the brain over the lifespan; progress in establishing increasingly precise models of memory; research that confirms the study of emotion and social cognition as a core area in cognitive neuroscience; and new findings that cast doubt on the so-called neural correlates of consciousness.

The new edition of a popular guide to the key issues in tax reform, presented in a clear, nontechnical, and unbiased way. To follow the debate over tax reform, the interested citizen is often forced to choose between misleading sound bites and academic treatises. *Taxing Ourselves* bridges the gap between the oversimplified and the arcane, presenting the key issues clearly and without a political agenda. Tax policy experts Joel Slemrod and Jon Bakija lay out in accessible language what is known and not known about how taxes affect the economy and offer guidelines for evaluating tax systems—both the current tax system and proposals to reform it. This fifth edition has been extensively revised to incorporate the latest data, empirical evidence, and tax law. It offers new material on recent tax reform proposals, expanded coverage of international tax issues, and the latest enforcement initiatives. Offering historical perspectives, outlining the basic criteria by which tax policy should be judged (fairness, economic impact, enforceability), examining proposals for both radical change (replacement of the income tax with a flat tax or consumption tax) and incremental changes to the current system, and concluding with a voter's guide, the book provides readers with enough background to make informed judgments about how we should tax ourselves. Praise for earlier editions “An excellent book.” —Jeff Medrick, *New York Times* “A fair-minded exposition of a politically loaded subject.” —Kirkus Reviews

In *Vocation: Common Priest by Baptism*, the author sets forth his personal experience in discerning whether Jesus, The Christ is calling him to the common priesthood in Christ via Baptism or the ministerial priesthood in Christ via Holy Orders. It is the true story of his 21st-Century discernment within the diocese of Los Angeles, including the natural (i.e., deductive logic) and supernatural (i.e., divine signs) factors that went into determining if, in his case, there was/is a vocation to the office of the ministerial priesthood, based the special graces he has received, including his being associated with that office by family, friends, and strangers 41 times over an 18-year period. He is publishing it to document and share his journey in hopes that other Catholic men formally in discernment may find it instructive. Finally, this estract is part of the author's lay apostolate of Catholic-Christian witness to the reality, power, and transforming/saving Love of God, as well as the author's response to and promotion of the Church's "universal call to holiness" (*Lumen Gentium*) and the "new evangelization" (*Novo Millenio Ineunte*), in the electronically and globally connected virtual world of the Internet. Autobiographical accounts by twenty-three Nobel laureates give a picture of the richness of contemporary economic thought and insights into the creative process. *Lives of the Laureates* offers readers an informal history of modern economic thought as told through autobiographical essays by twenty-three winners of the Nobel Prize in Economics. The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. This fifth edition adds five recent Nobel laureates to its list of contributors: Vernon L. Smith (2002), Clive W. J. Granger (2003), Edward C. Prescott (2004), Thomas C. Schelling (2005) and Edmund S. Phelps (2006). Also included is the editors' revised afterword, "Lessons from the Laureates." *Lives of the Laureates* grows out of a continuing lecture series at Trinity University in San Antonio, which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms. Each laureate achieves the goal of clarity without sacrificing inherently difficult content: Kenneth Arrow makes grasping the essentials of his "impossibility theorem" painless; Lawrence Klein clearly presents what goes into econometric "model building"; George Stigler masterfully describes his "information theory"; and so on. These lectures demonstrate the richness and diversity of contemporary economic thought. The reader will find that paths cross in unexpected ways—that disparate thinkers were often influenced by the same teachers—and that luck as well as hard work plays a role in the process of scientific discovery.
