The popularity of artificial intelligence is increasing every day. Artificial intelligence is now the hot topic in the computing industry. With artificial intelligence, computer experts are now able to create systems that act like human beings. Computers can now listen and understand voice commands issued by human beings. Alexa is an application that was developed by Amazon based on artificial intelligence. It can be integrated with devices such as Amazon Echo, Echo Dot, Echo Plus, etc. When the integration is done, it becomes easy for anyone to perform some of the daily tasks at home using voice commands. For instance, you can use Alexa and Echo to turn the lights in your house on and off, change their color and even control the intensity of the lights by simply issuing voice commands. You can also control the temperature of your house if you have a thermostat. Other than using Alexa for basic home tasks, it is a good source of entertainment. For instance, you can issue commands to Alexa to play music, read
