The Science of Religion: A Defence offers a brilliant overview of Donald Wiebe's contributions on methodology in the academic study of religion, of the development of his thinking over time, and of his intellectual commitment to 'a science of religion'.

A critical history of the Americanization of legal education in fourteen countries The second half of the twentieth century witnessed the export of American power—both hard and soft—throughout the world. What role did US cultural and economic imperialism play in legal education? American Legal Education Abroad offers an unprecedented and surprising picture of the history of legal education in fourteen countries beyond the United States. Each study in this book represents a critical history of the Americanization of legal education, reexamining prevailing narratives of exportation, transplantation, and imperialism. Collectively, these studies challenge the conventional wisdom that American ideas and practices have dominated globally. Editors Susan Bartie and David Sandomierski and their contributors suggest that to understand legal education and to respond thoughtfully to the mounting present-day challenges, it is essential to look beyond a particular region and consider not only the ideas behind legal education but also the broader historical, political, and cultural factors that have shaped them. American Legal Education Abroad begins with an important foundational history by leading Harvard Law School historian Bruce Kimball, who explains the factors that created a transportable American legal model, and the book concludes with reflections from two prominent American law professors, Susan Carle and Bob Gordon, whose observations on recent disruptions within US law schools suggest that their influence within the global order of legal education may soon fall into further decline. This book should be considered an invaluable resource for anyone in the field of law.

The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

This is the third volume of a four-part series which covers the development of the university in Europe (east and west) from its origins to the present day, focusing on a number of major themes viewed from a European perspective. The originality of the series lies in its comparative, interdisciplinary, collaborative and trans-national nature. It deals also with the content of what was taught at the universities, but its main purpose is an appreciation of the role and structures of the universities as seen against a backdrop of changing conditions, ideas and values. This 2004 volume deals with the modernisation, differentiation and expansion of higher education which led to the triumph of modern science, changing the relations between universities and national states, teachers and students, their ambitions and political activities. Special attention is focused on the fundamental advances in 'learning' - the content of what was taught at the universities.

"This anthology of more than 165 seminal writings by influential twentieth- and twenty-first century artists and critics who explore and challenge complex definitions of what it means to be 'Latin American' or 'Latino' is designed to be an indispensable tool for the study of Latin American and Latino art"--

This book is a concise overview of the recent history of U.S.-Central American relations. Part of the Contemporary Inter-American Relations series edited by Jorge Dominguez and Rafael Fernandez de Castro, it focuses on the relations between the U.S. and this region since the end of the Cold War. The volume considers economic relations between the two regions, presenting pertinent information on the Central American Free Trade Agreement (CAFTA). It also looks at political issues such as military cooperation, security issues, the drug trade and organized crime, democracy in the region, and migration. Finally, it concludes with an assessment of the direction US-Central American relations are taking at present, moving beyond the black-and-white challenges of Soviet domination in the region to address post-9/11 security concerns. The United States and Central America will be of interest to students and scholars of foreign policy, Latin American politics and politics and international relations in general. With the end of the Cold War, the American political establishment perceived Islam as the new enemy. The 1993 explosion at the World Trade Center, the 1998 bombing of the American embassies in Africa, and the events of 9/11 - all culminated in substantiating this perception. The War on Terrorism has raised several complicated issues surrounding the relationship between the United States and Islam. With America's increasing involvement in the Middle East, it is imperative for Muslims to understand America; but at the same time, Americans must learn to understand Islam. The progress of civilization hangs on the ability for cooperation and understanding between these cultures. Although this challenge of removing the "clash" between these two cultures is indeed pressing, it is not new. Negative images of Islam have persisted in the United States throughout its history. This volume of The Annals reflects on how damaging images of Islam have endured in the United States and how Americans' perceptions and misconceptions about Islam is inexorably linked to United States' policy in the Middle East. The articles in this special issue will spark intriguing debate and discussion as well as shed light on the complex concerns engulfing Americans' ideas about Islam and Muslim states and how this relationship influences global politics. Candor, breadth, judiciousness-all these are attributes Irving Louis Horowitz possesses as a scholar. Under his leadership there is no academic publication from which I have learned as much as Transaction-Society."David Riesman, Harvard University "We are all happy beneficiaries of Horowitz's acutely perceptive and (often) devastatingly plain-spoken self as sociologist and sage, broad-gauged scholar,

Robert H. Jackson has produced a catalog of the evils of the mission system on the northern frontier of New Spain, Mexico. The book focuses on mission areas that now form part of Arizona, California, New Mexico, Texas, and Baja California. Organized by theme, chapters cover mission economics and construction, social and cultural change, Indian resistance and social control, the decline of the mission populations, and the demise of the mission system. Different circumstances characterized these areas, making generalizations difficult. Relying on quantitative data from earlier studies, Jackson convincingly argues that the conventional view of population decline among Native American populations, emphasizing epidemic disease as the main cause, does not adequately explain the situation at every mission. In June 1846 Susan Shelby Magoffin, eighteen years old and a bride of less than eight months, set out with her husband, a veteran Santa Fe trader, on a trek from Independence, Missouri, through New Mexico and south to Chihuahua. Her travel journal was written at a crucial time, when the Mexican War was beginning and New Mexico was occupied by Stephen Watts Kearny and the Army of the West. Her journal describes the excitement, routine, and dangers of a successful merchant's wife. On the trail for fifteen months, moving from house to house and town to town, she became adept in Spanish and the lingo of traders, and wrote down in detail the customs and appearances of places she went. She gave birth to her first child during the journey and admitted, "This thing of marrying is not what it is cracked up to be." Valuable as a social and historical record of her encounters—she met Zachary Taylor and was agreeably disappointed to find him disheveled but kindly—her journal is equally important as a chronicle of her growing intelligence, experience, and strength, her lost illusions and her coming to terms with herself.

Naráyana's best-seller gives its reader much more than "Friendly Advice." In one handy collection—closely related to the world-famous Pañcatantra or Five Discourses on Worldly Wisdom —numerous animal fables are interwoven with human stories, all designed to instruct wayward princes. Tales of canny procuresses compete with those of cunning crows and tigers. An intrusive ass is simply thrashed by his master, but the meddlesome monkey ends up with his testicles crushed. One prince manages to enjoy himself with a merchant's wife with her husband's consent, while another is kicked out of paradise by a painted image. This volume also contains the compact version of King Vikrama's Adventures, thirty-two popular tales about a generous emperor, told by thirty-two statuettes adorning his lion-throne. A new feature, "Contending Voices," offers paired quotes from original historical sources, accompanied by questions that prompt students to think about conflicting perspectives on controversial subjects. Additional pedagogical aids make THE AMERICAN PAGEANT accessible to students: part openers and chapter-ending chronologies provide a context for the major periods in American history, while other features present additional primary sources, scholarly debates, and key historical figures for analysis. This volume interprets 18 years of gathered evidence and prognostications about the next generation of Catholicism in America. Gallup polls were conducted in 1987, 1993, 1999, and 2005 focusing on trends in Catholic thinking. The authors studied how Catholics participate in their faith and what attitudes characterize their practice. They offer evidence that American Catholicism is changing in the minds and hearts of every Catholic congregation. Blind adherence to statements and directives from church hierarchy is being supplanted by intelligent and socially committed folks taking responsibility for their own faith development. This book suggests that the future will see more Catholics making decisions about their own faith and fewer Catholics who are fervently committed to church life.

Carolina Maria de Jesus (1914-1977), nicknamed Bitita, was a destitute black Brazilian woman born in the rural interior who migrated to the industrial city of Sao Paulo. This is her autobiography, which includes details about her experiences of race relations and sexual intimidation.

American Realities Historical Episodes from First Settlements to the Civil War Prentice Hall

New York Times Bestseller In the most ambitious one-volume American history in decades, award-winning historian and New Yorker writer Jill Lepore offers a magisterial account of the origins and rise of a divided nation, an urgently needed reckoning with the beauty and tragedy of American history. Written in elegiac prose, Lepore's groundbreaking investigation places truth itself—a devotion to facts, proof, and evidence—at the center of the nation's history. The American experiment rests on three ideas—"these truths," Jefferson called them—political equality, natural rights, and the sovereignty of the people. And it rests, too, on a fearless dedication to inquiry, Lepore argues, because self-government depends on it. But has the nation, and democracy itself, delivered on that promise? These Truths tells this uniquely American story, beginning in 1492, asking whether the course of events over more than five centuries has proven the nation's truths, or belied them. To answer that question, Lepore traces the intertwined histories of American politics, law, journalism, and technology, from the colonial town meeting to the nineteenth-century party machine, from talk radio to twenty-first-century Internet polls, from Magna Carta to the Patriot Act, from the printing press to Facebook News. Along the way, Lepore's sovereign chronicle is filled with arresting sketches of both well-known and lesser-known Americans, from a parade of presidents and a rogues' gallery of political mischief makers to the intrepid leaders of protest movements, including Frederick Douglass, the famed abolitionist orator; William Jennings Bryan, the three-time presidential candidate and ultimately tragic populist;

Pauli Murray, the visionary civil rights strategist; and Phyllis Schlafly, the uncredited architect of modern conservatism. Americans are descended from slaves and slave owners, from conquerors and the conquered, from immigrants and from people who have fought to end immigration. "A nation born in contradiction will fight forever over the meaning of its history," Lepore writes, but engaging in that struggle by studying the past is part of the work of citizenship. "The past is an inheritance, a gift and a burden," These Truths observes. "It can't be shirked. There's nothing for it but to get to know it."

Since the 1990s and the recent rise of the Black Lives Matter movement, there has been a rise in diverse racial representation on television. In particular, Black characters evolved and began to move away from racial stereotypes. In this collection of essays, the representation of Black characters in professionally defined careers is examined. Commentary is also provided on the portrayal of Black people in relation to stereotypes alongside the importance of Black representation on screen. This work also introduces the idea of the Black-collar category to highlight the Black experience in white-collar jobs. The essays are divided into six parts based on themes, including profession, and focuses on a select number of Black characters on TV since the 1990s. The articles collected together in this volume are concerned with why and how people get involved in politics, whether through formal mechanisms such as voting, through some of the more informal means and settings of social movement networks and political protest, or through engagement in public debate. But just as important is the question of why people do not get involved in politics. What social conditions, ideas and values facilitate or discourage political activity? How is it that some people are systematically disempowered in democratic societies in comparison with others? What social forms offer the most promise for extending and deepening democracy? This volume brings together the most seminal papers, which together form a record of how political sociologists since the 1970s have framed questions about the range and limits of democratic political engagement and developed concepts and methodologies in order to research the answers to those questions.

After five centuries of Eurocentrism, many people have little idea that Native American tribes still exist, or which traditions belong to what tribes. However over the past decade there has been a rising movement to accurately describe Native cultures and histories. In particular, people have begun to explore the experience of urban Indians—individuals who live in two worlds struggling to preserve traditional Native values within the context of an ever-changing modern society. In *Genocide of the Mind*, the experience and determination of these people is recorded in a revealing and compelling collection of essays that brings the Native American experience into the twenty-first century. Contributors include: Paula Gunn Allen, Simon Ortiz, Sherman Alexie, Leslie Marmon Silko, and Maurice Kenny, as well as emerging writers from different Indian nations.

This book brings together scholars from various disciplines to explore current issues and trends in the rethinking of migration and citizenship from the perspective of three major immigrant democracies – Australia, Canada, and the United States. These countries share a history of pronounced immigration and emigration, extensive experience with diasporic and mobile communities, and with integrating culturally diverse populations. They also share an approach to automatic citizenship based on the principle of *jus soli* (as opposed to the traditionally common *jus sanguinis* of continental Europe), and a comparatively open attitude towards naturalization. Some of these characteristics are now under pressure due to the "restrictive turn" in citizenship and migration worldwide. This volume explores the significance of political structures, political agents and political culture in shaping processes of inclusion and exclusion in these diverse societies. This book was originally published as a special issue of *Citizenship Studies*.

A highly respected, balanced, and thoroughly modern approach to U.S. history, *LIBERTY, EQUALITY, POWER: A HISTORY OF THE AMERICAN PEOPLE*, Seventh Edition, uses these three themes to show how the United States was transformed from hunter-gatherer and agricultural Native American societies into the most powerful industrial nation on Earth. This approach helps students understand the impact of the notions of liberty and equality, which are often associated with the American story and recognize how dominant and subordinate groups have affected and been affected by the ever-shifting balance of power. The text integrates the best of recent social and cultural scholarship—including fun material on movies and other forms of popular culture—into a political story, offering a comprehensive and complete understanding of American history. Mention a diplomatic career and most people imagine high-level meetings, formal dress and cocktail parties. Few stop to think that behind the occasional glitter of official functions are thousands of families facing all the routines and crises of life--births, deaths, childrearing, divorce--far from home, relatives, and friends, in an unfamiliar and sometimes unfriendly country and culture. This book provides reflections and perspectives on the realities of Foreign Service life as experienced by members of the Foreign Service community around the world. The writers share their unvarnished views on a wide variety of topics they care about: maintaining long-distance relationships, raising teens abroad, dealing with depression, coping with evacuations, readjusting to life in the United States, and many others. These are stories from the diplomatic trenches--true experiences from those who have lived the lifestyle and want to share their hard-learned lessons with others. If you are new to the Foreign Service, this book will offer insights and practical information useful in your overseas tours and when you return home. Even if you are a seasoned veteran of the Foreign Service, the reports and reflections of others may encourage you to compare and evaluate your own experiences. If you (or your partner) are contemplating joining the Foreign Service, this book can serve as a reality check, giving you honest, personal perspectives on both the positive and negative aspects of Foreign Service life. If you are a student wondering what the Foreign Service is all about, this book will broaden your knowledge and provide you with an insider's view not found in any textbook.

Volume 18, covering part of the final session of the First Congress, shows Jefferson as Secretary of State continuing his effective collaboration with James Madison in seeking commercial reciprocity with Great Britain by threatening--and almost achieving--a retaliatory navigation bill. During these few weeks Jefferson produced a remarkable series of official reports on Gouverneur Morris' abortive mission to England, on the first case of British impressment of American seamen to be noticed officially, on the interrelated problems of Mediterranean trade and the American captives in Algiers, and on the French protest against the tonnage acts. All of these state papers reflected the consistency of Jefferson's aim to bolster the independence of the United States, to promote national unity, and even, as his report on the Algerine captives indicates, to lay the foundations for American maritime power. This volume reveals Jefferson's continuing interest in a unified system of weights and measures, his effort to create a mint, and his concern over executive proceedings in the Northwest Territory. It contains also his suggestions for the President's annual message and his first encounter, at the hands of Noah Webster, with Federalist ridicule of his interest in science. Despite his heavy official duties and the confusion into which his household was thrown when 78 crates of books, wines, and furniture arrived from France, Jefferson never failed to write his promised weekly letter to his daughters and son-in-law under the alternating plan which obligated each of them to write only once every three weeks. The record of this time of extraordinary pressure shows that Jefferson retained his usual equanimity except when, after a full two months, he failed to receive any scrap of writing from the little family at Monticello.
