Anatomy is the science of understanding the structure and the parts of living organisms. Physiology, on the other hand, deals with the internal mechanisms and the processes that work towards sustaining life. These can include biochemical and physical interactions between various factors and components in our body. Your study of anatomy and physiology will make more sense if you continually relate the form of the structures you are studying to their function this coloring book will try to assist you in that process. Human Anatomy and Physiology Coloring Book is visually stunning, step-by-step introduction to human body system.

Comparative Anatomy and Histology: A Mouse and Human Atlas is aimed at the new mouse investigator as well as medical and veterinary pathologists who need to expand their knowledge base into comparative anatomy and histology.
