Five thousand years ago there began the most momentous revolution in human history. Starting in Mesopotamia, city civilization emerged for the first time on earth, to be followed in Egypt, India, China and the Americas. The ideals of these ancient civilizations still shape the lives of the majority of mankind. In *Search of the First Civilizations* (previously published as *Legacy*) asks the intriguing question: what is civilization? Did it mean the same to the Chinese, the Indians and the Greeks? What can the values of the ancient cultures teach us today? And do the ideals of the West - a latecomer to civilization - really have universal validity? In this fascinating historical search, Michael Wood explores these ancient cultures, looking for their essential character and their continuing legacy. A brilliant exploration. Sunday Times Well-written, gorgeous and guaranteed to induce thought... Wood takes great care to put everything in a large historical perspective, which is actually more disturbing than comforting. Max Weber, widely recognized as the greatest of the founders of classical sociology, is often associated with the development of capitalism in Western Europe and the analysis of modernity. But he also had a profound scholarly interest in ancient societies and the Near East, and turned the youthful discipline of sociology to the study of these archaic cultures. The Agrarian Sociology of Ancient Civilizations – Weber's neglected masterpiece, first published in German in 1897 and reissued in 1909 – is a fascinating examination of the civilizations of Mesopotamia, Egypt, Hebrew society in Israel, the city-states of classical Greece, the Hellenistic world and, finally, Republican and Imperial Rome. The book is infused with the excitement attendant when new intellectual tools are brought to bear on familiar subjects. Throughout the work, Weber blends a description of socio-economic structures with an investigation into mechanisms and causes in the rise and decline of social systems. The volume ends with a magisterial explanatory essay on the underlying reasons for the fall of the Roman Empire.

Inside you will read about... - Legendary Beginnings- The Senate and the People- Ave Caesar- Empire- Rulers of the World- The Fall- Legacy From legendary beginnings, a city rose from the swamp surrounded by the seven hills and split by the Tiber River. Built and rebuilt, a sacred republic and a divine empire, blessed by a thousand gods and by One, the story of her rise and fall has been told and retold for a thousand years and is still relevant in today's world, as echoes of her ancient glory have shaped our culture, laws, lifestyle and beliefs in subtle and pervasive ways.

The 'salmon-fishers' of North America, the nomadic tribes of the great central plains, and the highly cultured civilizations of Mesoamerica and the Andes are integral components of an extraordinary time in history. Beginning with the emergence of the first civilizations around 1200 BC, this book covers one of the most dynamic periods of America's history. As a huntergatherer way of life gave rise to agriculture, the emerging civilizations began producing cultural artefacts such as pottery, metalwork and textiles, which encouraged trade and, ultimately, prosperity. Religion served to unite peoples from diverse regions, but also led to warfare when seizing captives for sacrifice. This book investigates both the peaceful and violent aspects of ancient American civilizations and uses the most recent information to bring to life these fascinating cultures, some of which flourished until just a few centuries ago. In ancient North and South America extraordinary civilizations rose, flourished and fell. The Mayan pyramids and the ruins of Machu Picchu in Peru and Teotihuacan in Mexico remain a testament to these cultures. Ancient Civilizations of the Americas tells the remarkable story - b

Ideas abound as to why certain complex societies collapsed in the past, including environmental change, subsistence failure, fluctuating social structure and lack of adaptability. Why Did Ancient Civilizations Fail? evaluates the current theories in this important topic and discusses why they offer only partial explanations of the failure of past civilizations. This engaging book offers a new theory of collapse, that of social hubris. Through an examination of Mesopotamian,

Egyptian, Roman, Maya, Inca, and Aztec societies, Johnson persuasively argues that hubris blinded many ancient peoples to evidence that would have allowed them to adapt, and he further considers how this has implications for contemporary societies. Comprehensive and well-written, this volume serves as an ideal text for undergraduate courses on ancient complex societies, as well as appealing to the scholar interested in societal collapse.

Traditional scholarship on how ancient civilizations emerged is outmoded and new insights call for revision. According to the well-established paradigm, Mesopotamia is considered the cradle of civilization. Following the cliché of ex oriente lux ("light from the East") all major achievements of humankind spread from the Middle East. Modern archaeology, cultural science and historical linguistics indicate civilizations did not originate from a single prototype. Several models produced divergent patterns of advanced culture, developing both hierarchical and egalitarian societies. This study outlines a panorama of ancient civilizations, including the still little-known Danube civilization, now identified as the oldest advanced culture in Europe. In a comparative view, a new paradigm of research and a new cultural chronology of civilizations in the Old and New Worlds emerges, with climate change shown to be a continual influence on human lifeways.

About 5,000 years ago the first urban societies developed laying the foundations for the first civilizations. Nearly all civilizations share the same few features- they have abundant food surpluses, contained cities, political bureaucracies, armies, defined religious and social hierarchies and long distance trading. Ancient Egyptian culture flourished between c. 5500 BCE with the rise of technology (as evidenced in the glass-work of faience) and 30 BCE with the death of Cleopatra VII, the last Ptolemaic ruler of Egypt. It is famous today for the great monuments which celebrated the triumphs of the rulers and honored the gods of the land. The culture is often misunderstood as having been obsessed with death but, had this been so, it is unlikely it would have made the significant impression it did on other ancient cultures such as

Greece and Rome. Neolithic means "new stone", even though agriculture was the crowning achievement of the period. Civilizations started out small. Agriculture at first tended to tie only small groups together. These groups also all settled along rivers, important as a reliable and predictable source of water. As time passed, families usually worked the same plot of land over successive generations, leading to the concept of ownership. Ancient mortars and grinding tools unearthed in a large mound in the Zagros Mountains of Iran reveal that people were grinding wheat and barley about 11,000 years ago. Grass pea, wild wheat, wild barley, and lentils were found throughout the site, including some of the earliest known samples. This was much further east than most sites known for early agriculture. This book furnishes with utmost facility to all classes of readers, the needed information on ancient civilization. The unusual variety of the subject makes this a work of endless fascination.
