The book presents authentic texts in two Yukaghir languages, Tundra and Kolyma Yukaghir, an isolate group of languages spoken by few small communities in Siberia. The major goal of the book is to make primary Yukaghir data accessible for readers who have no previous knowledge of these languages. Each text is provided with a detailed morph-to-morph translation following the current linguistic standards, as well as with idiomatic English translation. In addition, the book contains Yukaghir-English vocabularies for both Yukaghir languages, with cross-references to all text occurrences of each word, a set of comprehensive morphemic and grammatical indices to text corpora, and a brief overview of basic ethnographic and grammatical facts. The principles of text representation are described in a user's guide. The book will serve as a useful source of data for scholars of the Yukaghir languages and cultures, as well as for anyone interested in cross-linguistic or cross-cultural studies.

Nuclear Energy and the Environment provides an assessment, based on the opinions and findings of international experts in the field of atomic energy, of the environmental impact of the different stages of the nuclear fuel cycle. Chapters in the book cover different subjects in the use of nuclear energy such as the environmental impacts of energy production and use; the environmental impact of mining and milling of radioactive ores, upgrading processes, and the fabrication of nuclear fuels; none radiological environmental implications of nuclear energy; and the technology and environmental hazards of nuclear waste disposal. Nuclear scientists, environmentalists, ecologists, nuclear engineers, and policy makers will find the book interesting.

Acknowledging that getting a handle on the new features of a development environment is difficult, the tips in this guide organize the new features of Visual FoxPro 9 into functional categories, revealing how and why to use each of them. Visual FoxPro 9 features improvements in many areas, for example, the Report Designer, which include multiple detail bands; built-in output to HTML, XML, and image files; object protection; an improved user interface; extendible Report Designer; extendible run-time features; and GDI+ rendering. Each of these new features are covered in detail so developers can be immediately productive. The new improvements in form design, including dockable forms and the ability to anchor controls for resizing are also addressed, along with the enhancements in the SQL sublanguage and the significant improvements for handling remote data.

The four volumes of the Encyclopaedia of International Aviation Law are intended for students, lawyers, judges, scholars and readers of all backgrounds with an interest in Aviation Law; and to provide the definitive corpus of relevant national and regional legislation, including global aviation treaties and legislation to enable all readers without exception, to develop the background, knowledge and tools to understand local, regional and international Aviation Law in contextual fashion.

This book comes as part of a new series on Solar Energy R+D, including Biomass which is carried out by the European Community. The commission of the European Communities' Directorate General (XII) for Science, Research and Development is currently implementing, on a cost-sharing basis, a solar energy R+D programme through contracts with European industry, research institutions and universities. This programme includes a very strong activity on Biomass. Besides general R+D work on all aspects of Biomass growth and utilization which is reported elsewhere in this series, the Commission is currently starting a new activity on Pilot Plants based on the use of Biomass for energy purposes, and in particular on methanol production from wood. The commission considers that the subject of methanol production from wood offers important prospects for application within the European Community and in other parts of the world, in particular some of the developing countries & The state of art in Europe In this field is still considered to be very high as a result of related work which was performed in Europe during World War II and the time before.

This new volume in the Innovations and Challenges in Micro Irrigation series covers an array of technologies to estimate evapotranspiration and to evaluate parameters that are needed in the management of micro irrigation, with worldwide applicability to irrigation management in agriculture. Topics include recent evapotranspiration research, performance evaluation of filters and emitters, evaluation of fertigation and ground water with treated wastewater effluent, performance of pulse drip irrigated potato under organic agriculture practices in sandy soils, impact of polyethylene mulch on micro irrigated cabbage, and tree injection irrigation.

This collection of essays examines Leviticus in its compositional and literary context, issues of cult and sacrifice in Leviticus, Leviticus on the priesthood, and Leviticus in translation and interpretation. The volume will serve biblical studies well long into the future.

The success of the previous Conferences on Energy from Biomass, held in Brighton 1980 and Berlin 1982, and the continued interest among European countries, encouraged the Commission of the European Communities to organise the third conference on this area of energy production. It brought together about 500 experts from many countries thus presenting an international forum for discussion of the most recent advances in research and development, manufacture and industrial applications.

In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately.

Permettre de concevoir, développer et utiliser des systèmes de diagnostic, de surveillance et de maintenance prédictive pour systèmes complexes (avions, centrales nucléaires, transport, etc.), afin d'optimiser les performances de la sûreté de fonctionnement : tel est l'objectif de cet ouvrage. Pour cela Fiabilité, diagnostic et maintenance prédictive des systèmes s'appuie sur la modélisation des systèmes (parties commandes et opératives), l'évaluation probabiliste et déterministe du fonctionnement, et la conception de systèmes de surveillance. Cet ouvrage fait le lien entre le diagnostic, la maintenance et la fiabilité des systèmes techniques, du plus simple au plus complexe. Son approche novatrice et sa présentation en font un véritable guide théorique et pratique pour les ingénieurs qui pourront y trouver la réponse à de nombreux problèmes de diagnostic, de surveillance et de maintenance, en particulier grâce à l'analyse vibratoire. Très didactique et accompagné de plus de 100 exercices et problèmes résolus reflétant des situations concrètes, il présente les concepts de base pour concevoir et développer correctement des outils ou des systèmes de diagnostic et de maintenance conditionnelle (prédictive) indispensables aux ingénieurs ou aux élèves ingénieurs en génie industriel, génie mécanique, robotique ou sûreté de fonctionnement dans les domaines les plus variés.

In this book we open our insights in the Theory of the Firm, obtained through the application of Optimal Control Theory, to a public of scholars and advanced students in economics and applied mathematics. We walk on the micro economic side of the street that is bordered by Theory of the Firm on one side and by Optimal Control Theory on the other, keeping the reader away from all the dead end roads we turned down during our 10 years lasting research. We focus attention on the expressiveness and variety of insights that are obtained through studying only simple models of the firm. In this book mathematics is our tool, insight in optimal corporate policy our goal. Therefore most of the mathematics and calculations is put into appendices and in the main text all attention is on modelling corporate behaviour and on analysing the results of the calculations. So, the main text focusses on micro economics, even more specific: on Theory of the Firm. In that way this book is contrasted from such famous text books in applied Optimal Control with a much broader portfolio of applications, like Feichtinger & Hartl (1986) or with a more rigorous introduction into theory, like Seierstad & Sydsaeter (1987).

Consists of 65 interactive lessons on college prealgebra. Topics covered: whole numbers, fractions and decimals, integers, rational numbers and square roots, the language of algebra, linear equations, polynomials, ratio and percent, measurement, area, perimeter and volume, polygons and circles.

The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information available for each entry. Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane .
