This stunning new atlas is your first-class pass on a world tour of the homes of Earth's most incredible animals. The latest exciting title in DK's popular Where on Earth? series maps out the habitats of the world's mammals, fish, birds, reptiles, invertebrates, and more. Whether it's plotting the range of a lion, following the flight paths of birds, tracking great white sharks in the oceans, or exploring the migration of the monarch butterfly, you will see exactly where and how more than 100 extraordinary animal species live. What makes Where on Earth? Animals unique are the maps themselves. Each one is individually commissioned in 3-D, with detail to show the habitat of each animal, as well as its geographic location. This reveals an astonishing amount of information about the behavior of these animals, from how seals are adapted to survive in freezing Antarctic seas to how beetles survive in the heat of the Sahara desert. There is also a focus on

the conservation and protection of animals. Maps reveal the shrinking territories of some species, showing where they used to roam in the past compared to what's left of their range today. Whichever animal you're trying to track down, you're sure to find it in *Where on Earth? Animals*.

We all have a certain creature that makes our skin scrawl and give us the 'heebie jeebies'. Spiders that make us scream, mice that make us jump on top of furniture until the coast is clear, or bats that make us shudder at the thought of them flapping around our hair. There are creatures big and small all over the world that make us squirm and wriggle in our seats just at the mere thought of them. But what did these animals ever do to deserve such a bad reputation? Most of the time it's humans that have labelled them ugly, dangerous and downright gross. But it's one false acquisition too many for these little guys. They've had enough of being called scary, slimy, nasty and ewwy. They're here to dispel these false acquisitions and set the record straight once and for all! "You humans have given us a BAD rep! You've been spreading rumours about us - you think we're scary and spooky and dangerous and icky. Well we're here to set the record straight because we're fed up with the lies you've been spreading. We're not bad animals at all -we're just misunderstood!" With laugh-out-loud illustrations from the immensely talented Sophie Corrigan, uncover the truth behind the animal and learn all about how each creature plays an important role in our world. With bitesize text that will leave you giggling and a fact box about each misrepresented creature, this is the perfect introduction to over 30 critters big and small who really aren't all that bad at all!

A personal journey into our evolving relationships with animals, and a thought-provoking look at how those bonds are being challenged and reformed across disciplines We love animals, but does that make the animals' lives any happier? With factory farms, climate change and deforestation, this might be the worst time in history to be an animal. If we took animals' experiences seriously, how could we eat, think and live differently? How to Love Animals is a lively and important portrait of our evolving relationship with animals, and how we can share our planet fairly. Mance works in an abattoir and on a pig farm to explore the reality of eating meat and dairy. He explores our dilemmas over hunting wild animals, over-fishing the seas, visiting zoos and saving wild spaces. What might happen if we extended the love we show to our pets to other sentient beings? In an age of extinction and pandemics, our relationship with animals has become unsustainable. Mance argues that there has never been a better time to become

vegetarian or vegan, and that the conservation movement can flourish, if people in wealthy countries shrink our footprint. Mance seeks answers from chefs, farmers, activists, philosophers, politicians and tech visionaries who are redefining how we think about animals. Inspired by the author's young daughters, his book is a story of discovery and hope that outlines how we can find a balance with animals that fits with our basic love for them.
