Burned in a house fire a few days before losing his father, college student Shawn Carpenter has spent years working, caring for his family, and paying penance.

When an acquaintance introduces him to God and invites him to a college youth group, the changes in his life are immense and unsettling. The most unsettling part is Jenny Clearwater, his boss's daughter. He can't deny his attraction, but she courts instead of dating, and courting seems all about keeping the Shawn Carpenters of the world away from the Jenny Clearwaters. A frank and entertaining memoir, from the daughter of Edward Said, about growing up second-generation Arab American and struggling with that identity. The daughter of a prominent Palestinian father and a sophisticated Lebanese mother, Najla Said grew up in New York City, confused and conflicted about her cultural background and identity. Said knew that her parents identified deeply with their homelands, but growing up in a Manhattan world that was defined largely by class and conformity, she felt unsure about who she was supposed to be, and was often in denial of the differences she sensed between her family and those around her. The fact that her father was the famous intellectual and outspoken Palestinian advocate Edward Said only made things more complicated. She may have been born a Palestinian Lebanese American, but in Said's mind she grew up first as a WASP, having been baptized Episcopalian in Boston and attending the wealthy Upper East Side girls' school Chapin, then as a teenage Jew, essentially denying her true roots, even to herself—until, ultimately, the psychological toll of all this self-hatred began to threaten her health. As she grew older, making increased visits to Palestine and Beirut, Said's worldview shifted. The attacks on the World Trade Center, and some of the ways in which Americans responded, finally made it impossible for Said to continue to pick and choose her identity, forcing her to see herself and her passions more clearly. Today, she has become an important voice for second-generation Arab

Americans nationwide.

"Either the Constitution means what it says, or it doesn't." America's founding fathers saw freedom as a part of our nature to be protected—not to be usurped by the federal government—and so enshrined separation of powers and guarantees of freedom in the Constitution and the Bill of Rights. But a little over a hundred years after America's founding, those God-given rights were laid siege by two presidents caring more about the advancement of progressive, redistributionist ideology than the principles on which America was founded. Theodore and Woodrow is Judge Andrew P. Napolitano's shocking historical account of how a Republican and a Democratic president oversaw the greatest shift in power in American history, from a land built on the belief that authority should be left to the individuals and the states to a bloated, far-reaching federal bureaucracy, continuing to grow and consume power each day. With lessons rooted in history, Judge

Napolitano shows the intellectually arrogant, anti-personal freedom, even racist progressive philosophy driving these men to poison the American system of government. And Americans still pay for their legacy—in the federal income, in state-prescribed compulsory education, in the Federal Reserve, in perpetual wars, and in the constant encroachment of a government that coddles special interests and discourages true competition in the marketplace. With his attention to detail, deep constitutional knowledge, and unwavering adherence to truth telling, Judge Napolitano moves through the history of these men and their times in office to show how American values and the Constitution were sadly set aside, leaving personal freedom as a shadow of its former self, in the grip of an insidious, Nanny state, progressive ideology.
