This book applies a structural model of convenience theory to suspected crime and a maturity model to investigation reports. Evidence of white-collar convenience themes in each case study is derived from internal investigation reports by fraud examiners. The study of white-collar offenders has received increased attention in recent years. This book contributes to our understanding of financial crime by privileged individuals in professional settings by identifying convenience themes for offenders. Based on the theory of convenience, the work presents a number of case studies to identify convenience in financial motive, organizational opportunity, and willingness for deviant behavior. Case studies presented are from Austria, Asia, Congo, Denmark, Germany, Norway, Sweden, and the United States. The book will be of interest to researchers and academics in Law, Criminology, Business, and Sociology. It will also provide a valuable resource for fraud examiners, defense attorneys, police investigators, and prosecutors.

The goal of this book is to demonstrate this need for proper and complete internal investigations, and to teach the entry level and tenured police supervisor the form and function of the internal investigations process. The text selectively focuses on the purposes and practical implications of internal investigations and the pitfalls. The goal is to guide students and professionals through definitions, terminology, legal and labor issues, case law, techniques and procedures, critical and special investigations, including issues in administrative and civil claims. The reader will find a model for conducting internal investigations of police personnel that will allow a police supervisor or commander to perform investigations in a thorough, ethical, legal, and equitable manner. This book will meet the needs of attorneys who litigate cases involving allegations of police misconduct as well as representatives of collective bargaining groups who represent police personnel in similar actions.
