Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities

"Transcultural Nursing Theory and Models: Application in Nursing Education, Practice, and Administration is a must read for the nurse currently practicing. National and global changes in demographics, a changing global economy, have further dramatized the need for culturally competent nurses. I found this book to be what I had hoped for and more related to my understanding of the concept of transcultural nursing (TCN)....I would highly recommend this book to any nurse who is looking to deepen her understanding of the many diverse cultures she encounters at the bedside, or out in the community using components of the theory, models and assessment guide presented in this book."--Advance for Nurses "This book makes a worthwhile contribution to the field of transcultural nursing by complementing texts that introduce theory and models or delve into them individually and more deeply. Sagar contributes her expertise as a Transcultural Nursing Scholar by focusing on how to use the models and guide. She explains and shows the reader how transcultural nursing theory can be disseminated and implemented."--Online Journal of Cultural Competence in Nursing and Healthcare This volume is the first to examine and promote the application of current, major transcultural nursing (TCN) theory and models and assessment tools in nursing education, practice, and administration. As a comprehensive text for master's and bachelor's level nursing students, it features case studies, care plans, initial role playing exercises, and implications of TCN concepts when planning, implementing and evaluating client care.
