"Entertainers and trainers have a lot in common. Both require an audience. Both require a polished, professional delivery. And both must attract -- and keep -- attention. Or else the show is over. Unlike the audience at a show, training participants are often disinterested and easily distracted. In order to keep them tuned in and help them retain information, trainers are constantly in search of new ways to engage learners. Grounded in the latest adult learning and training theories, "Show Biz Training" provides creative techniques that use comedy, props, magic, theater, and music, giving readers all the tools they need to perform the many activities found inside. The book uses specific examples and provides step-by-step instructions, resource lists, and worksheets to help trainers support and further learning by engaging emotion, building rapport, creating the proper atmosphere, and crafting lessons out of a host of entertainment-inspired ideas. Packed with fun, original concepts for serious educators, "Show Biz Training" is a highly informative way to set the stage for exciting, effective learning."

Offers a guide on how to teach the rules of the APA style manual to students, including a series of multiple-choice tests,

answer keys, and advice on how to integrate the topic into the curriculum.

Expanded and updated from the Electronic Resources section, The APA style guide to electronic resources outlines for students and writers the key elements with numerous examples. Dissertations and theses; bibliographies; curriculum and course material; reference materials, including Wiki; gray literature, such as conference hearings, presentation slides, and policy briefs; general interest media and alternative presses such as audio podcasts; and online communities, such as Weblog posts and video Weblog posts.

Most students struggle with learning how to find references, use them effectively, and cite them appropriately in a required format. One of the most common formats is that of APA. The authors all have vast experience teaching writing courses to various levels of students from undergraduates to graduates in other countries. However, there was lacking a book that could explain the basics of APA in simple, easy-to-understand language for non-native speakers of English, who are often unfamiliar with using references and formatting an essay in a particular method. In order to offer English Learner student writers a source of information that is appropriate for their level, and is cost-effective, this updated APA 7th edition guidebook provides students with important information in clear, concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials on the market targets native speakers of English. The problem with this is that they present the nitpicky details of APA in ways that do not make sense to native speakers of English, let alone to those for whom English is not their first language, because the information is presented in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that make sense to both native and non-native English speaking student writers. Additionally, student writers often struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this important information that is concise and easy to understand. NOTE: This is a REVISED edition of our original The Concise APA Handbook, which has been updated for APA 7th edition, which was issued in the fall, 2019.

The present book contains the proceedings of two conferences held at the World Computer Congress 2010 in Brisbane, Australia (September 20–23) organised by the International Federation for Information Processing (IFIP). In the first part, the reader can find the proceedings of the 9th Human Choice and Computers International Conference (HCC9) organised by the IFIP Technical Committee TC9 on the Relationship Between ICT and Society. The HCC9 part is subdivided into four tracks: Ethics and ICT

Governance, Virtual Technologies and Social Shaping, Surveillance and Privacy, and ICT and Sustainable Development. The second part consists of papers given at the Critical Information Infrastructure Protection Conference (CIP) organized by the IFIP Technical Committee TC11 on Security and Privacy Protection in Information Processing Systems. The two parts of the book are introduced by the respective Conference Chairs. Chapter 1 introduces HCC9, providing a short summary of the HCC conference series, which started in 1974, and explaining the overview of HCC9, detailing the rationale behind each of the tracks in this conference. The details related to the papers of each track are discussed by the Track Chairs in the respective introductions to the specific tracks of HCC9 (Chaps. 2, 10, 16 and 22). Finally, Chap. 22 introduces the CIP part.

Critical English for Academic Purposes: Theory, Politics, and Practice is the first book to combine the theory and practice of two fields: English for academic purposes and critical pedagogy. English for academic purposes (EAP) grounds English language teaching in the cognitive and linguistic demands of academic situations, tailoring instruction to specific rather than general purposes. Critical pedagogy acknowledges students' and teachers' subject-positions, that is, their class, race, gender, and ethnicity, and encourages them to question the status quo. Critical English for academic purposes engages students in the types of activities they are asked to carry out in academic classes while inviting them to question and, in some cases, transform those activities, as well as the conditions from which they arose. It takes into account the real challenges non-native speakers of English face in their discipline-specific classes while viewing students as active participants who can help shape academic goals and assignments. Critical English for Academic Purposes: Theory, Politics, and Practice: \* relates English for academic purposes and critical pedagogy, revealing and problematizing the assumptions of both fields, \* provides theoretical and practical responses to academic syllabi and other institutional demands to show that teachers can both meet target demands and take students' subjectivities into account in a climate of negotiation and possibility, \* offers "rights analysis" as a critical counterpart to needs analysis, \* discusses the politics of "coverage" in lecture classes and proposes alternatives, and \* features teaching examples that address balancing the curriculum for gender; building community in an EAP class of students from diverse economic and social

backgrounds; students' rights; and organizing students to change unfavorable conditions. This book is intended for undergraduate and graduate courses for preservice and in-service ESL and EAP teachers. It is also a professional book for those interested in critical approaches to teaching and EAP.

When children with learning challenges are identified, the educational community in the United States diligently applies a well-established model of remediation that has, for the most part, yielded positive results. Research, however, has demonstrated that the American perception of disability may vary from those in Eastern cultures. These cultural differences can play a significant role in the failure to achieve learning success on behalf of children from the Middle East, North Africa, and Southwest Asian (MENASWA) families. It is critical for the school community to recognize and acknowledge these differences and bring them into alignment in order to meet these students' learning needs. Learning Challenges for Culturally and Linguistically Diverse (CLD) Students With Disabilities is an essential reference publication that identifies ways in which CLD families can be involved with schools to help build educators' cultural competence and explores the idea of disabilities as a social model with a focus on strengths rather than a medical model focused on needs and weaknesses. Featuring coverage on a wide range of topics including racial identity, leadership wisdom, and family-school collaboration, this book is ideally designed for educators, principals, administrators, curriculum developers, instructional designers, policymakers, advocates, researchers, academicians, and students.

What does it mean to be white in a society that proclaims race meaningless yet is deeply divided by race? In the face of pervasive racial inequality and segregation, most whites cannot answer that question. Robin DiAngelo argues that a number of factors make this question difficult for whites: miseducation about what racism is; ideologies such as individualism and colorblindness; defensiveness; and a need to protect (rather than expand) our worldviews. These factors contribute to what she terms white racial illiteracy. Speaking as a white person to other white people, Dr. DiAngelo clearly and compellingly takes readers through an analysis of white socialization. She describes how race shapes the lives of white people, explains what makes racism so hard for whites to see, identifies common white racial patterns, and speaks back to popular white narratives that work to deny racism. Written as an accessible introduction to white identity from an anti-racist framework, *What Does It Mean To Be White?* is an invaluable resource for members of diversity and anti-racism programs and study groups and students of sociology, psychology, education, and other disciplines.

Careers in astronomy for women (as in other sciences) were a rarity in Britain and Ireland until well into the twentieth century. The book investigates the place of women in astronomy before that era, recounted in the form of biographies of about 25 women born between 1650 and 1900 who in varying capacities contributed to its progress during the eighteenth, nineteenth and early twentieth centuries. There are some famous names among them whose biographies have been written before now, there are others who have received less than their due recognition while many more occupied inconspicuous and sometimes thankless places as assistants to male family members. All deserve to be remembered as interesting individuals in an earlier opportunity-poor age. Placed in roughly chronological order, their lives constitute a sample thread in the story of female entry into the male world of science. The book is aimed at astronomers, amateur astronomers, historians of science, and promoters of women in science, but being written in non-technical language it is intended to be of interest also to educated readers generally.
