Lead effectively in today's complex health systems! As hospitals and healthcare organizations strive to meet standards to achieve status in the Magnet Hospital Recognition Program and address the issues in the Institute of Medicine's Nursing Work Force Issues Initiative, they must be able to respond in ways that embrace rapid change. The 3rd Edition of this groundbreaking text addresses the leadership roles advanced practice nurses can assume in this new environment. It defines the concept of complexity and teaches the leadership skills that are best suited for complex adaptive systems, while also enabling you to build the self-awareness you need to learn new ways to lead. Case studies help you apply your new skills and prepare for your advanced practice roles.

This practical, real-world approach provides all of the how-tos, what-tos, when-tos, and why-tos you need to master the art and science of assessment in a well-organized, well-illustrated text that makes the material easier to learn now and reference later. The book simplifies the approach to assessment in two ways. First, it focuses on the normal and the normal variants of the adult, child, elderly, and pregnant patients that you'll see most frequently in practice. Then, when a finding falls outside of those parameters, you'll be able to identify it as abnormal. Second, assessment is presented as a linear and consistent process; so you are able to undertake the same steps in the same order to ensure that you don't miss anything.

Lists over 1,500 of the latest and most common FDA-approved drugs, including information on drug action, dosage, interactions, contraindications, and guidelines for administration.
