This Country Profile on Uzbekistan's housing and land management sectors, prepared at the request of the Government of Uzbekistan, is the 18th in the series. The Country Profile programme continues to focus on specific challenges or achievements in the housing and land management sectors that are particularly relevant to the country under review. In the case of Uzbekistan, these issues include housing policies and Government support measures for the construction of housing in rural areas; increased demand for housing of the fast-growing population; and depleted urban infrastructure inherited from the Soviet times.

Issues for Jan. 1973-May 1977 include section: Industrialized building.

The embedding of energy efficiency in the management of individual housing organisations is crucial for the realization of current ambitious energy efficiency policies. This issue is examined for the first time in this book through an analysis of selected case studies in new 'green' buildings, as well as in the retrofitting of existing housing, maintenance and budgeting. The links between policy ambitions, practice and housing management institutions are given particular attention. Thus the book is primarily concerned with how ambitions about energy efficiency are carried forward in investment decisions at the housing estate level. Technical and financial issues relevant for this are also addressed. The editors combine a wealth of experience in comparative research on housing policy and housing management with a strong academic background in housing studies and economics. The book aims to be internationally comparative including a range of countries. A chapter will be devoted to each of the following countries:- Sweden; Denmark; Germany; the Netherlands; England; France; Switzerland; Austria; Czech Republic; Slovenia; Canada. The book will appeal to a large audience of students and academics who are concerned with housing issues, urban policy and politics as well as to those engaged in research in energy efficiency policies in the built environment.

Every organization has its share of political drama: Personalities clash. Agendas compete. Turf wars erupt. But you need to work productively with your colleagues—even the challenging ones—for the good of your organization and your career. How can you do that without compromising your integrity? By acknowledging that power dynamics and unwritten rules exist—and constructively navigating them. Whether you're a new professional or an experienced one, this guide will teach you how to: (1) Build relationships with difficult people, (2) gain allies and increase your sphere of influence, (3) wrangle resources, (4) move up without alienating your colleagues, (5) avoid power games and petty rivalries, and (6) claim credit when it's due.

Oil and gas projects have special characteristics that need a different technique in project management. The development of any country depends on the development of the energy reserve through investing in oil and gas projects through onshore and offshore exploration, drilling, and increasing facility capacities. Therefore, these projects need a sort of management match with their characteristics, and project management is the main tool to achieving a successful project. Written by a veteran project manager who has specialized in oil and gas projects for years, this book focuses on using practical tools and methods that are widely and successfully used in project management for oil and gas projects. Most engineers study all subjects, but focus on project management in housing projects, administration projects, and commercial buildings or other similar projects. However, oil and gas projects have their own requirements and characteristics in management from the owners, engineering offices, and contractors' side. Not only useful to graduating engineers, new hires, and students, this volume is also an invaluable addition to any veteran project manager's library as a reference or a helpful go-to guide. Also meant to be a refresher for practicing engineers, it covers all of the project management subjects from an industrial point of view specifically for petroleum projects, making it the perfect desktop manual. Not just for project managers and students, this book is helpful to any engineering discipline or staff in sharing or applying the work of a petroleum project and is a must-have for anyone working in this industry.

Hotel Law, Transactions, Management and Franchising presents a practical guide to the issues that face lawyers and industry leaders working in the hospitality field. It aims to develop the reader's understanding of the acquisition process and the complex relationships in management and franchise deals that dominate the hotel industry. This text is written primarily as a desktop reference for legal practitioners working in the hotel law field and is also suitable for students studying towards hotel and hospitality careers both at an undergraduate and law school or graduate level. The highly experienced author, contributors and editors offer insights into the industry players and their preferred positions, desired outcomes, and the potential pitfalls that can ensnare even the most well-planned deals. With broad coverage of the rapidly growing field of hospitality law—including gaming, recreation, and amenities—the book's approach examines the dominant models of hotel ownership, management and franchising, and includes independent hotels and the move towards complex resorts. The book's coverage of key legal topics ranges from real estate, to intellectual property, contracts, and finance. Hotel Law will give readers an understanding of the hospitality industry from the perspective of the

transactional practitioner, while examining the multi-party relationships and agreements that develop between an owner, operator, licensor and lender.

This is a text for those engaged in creating new, high-value software solutions for which an existing exemplar does not exist. Creating new software is not the same as replicating or doing something similar. It discusses creating software with high uncertainty about what is required, what the users will do, how the users will react, and what value will be delivered. The text addresses software similar to Class IV, V, and VI rapids, and considers how to understand the problem, determine requirements, design for uncertainty and the unknown, plan and execute a project involving innovative software, and how to form a suitable team for the activity. While these topics are sometimes touched upon in other texts, this book adopts a holistic view of the challenge and discusses how the pieces fit together and what must be done to deal with the inherent risks of innovative projects. Approximately one-half of the text is on how to understand the problem and figure out the requirements, with the other focusing on the design and implementation aspects for high-risk software.

With extensive case studies for illustration, this is a practitioner's guide to an entirely new production system for construction management using flowline scheduling. Covering the entire process of presenting a comprehensive management system – from design, through measurement, scheduling, and visualization and control – its emphasis is on reducing cost and increasing quality. Drawing its components together into a management system, the authors not only include theory and explanations of how and why it works, but also examine and present a suite of methods for successful project implementation. Perfect as a how-to guide for researchers and advanced construction students to discover the simple application of the new techniques, and invaluable for acquiring the practical tools for planning and controlling projects. The Chinese Research Institute of Construction Management (CRIOCM) in collaboration with Shenzhen University (SZU) proudly invites all academics, researchers and professionals to participate in the CRIOCM 2012, the 17th International Symposium on "Advancement of Construction Management and Real Estate." We will uphold and preserve the idea and tradition of pragmatism and innovation, to offer an excellent academic and communication platform for academics and professionals to exchange information on the latest developments in real estate and construction management.

Through *Homelessness Prevention in Treatment of Substance Abuse and Mental Illness: Logic Models and Implementation of Eight American Projects*, psychiatrist, psychologists, and social workers will discover the results of eight, three-year long development projects funded by the Substance Abuse and Mental Health Services Administration (SAMHSA) designed to prevent homelessness in high- risk populations who have problems with alcoholism, drug abuse, and/or mental illness. Through this

informative book, you will examine the theory or logic guiding each program, including an up-to-date review of the literature supporting each theory. You will also find a description of the implementation of the program as well as its history, the practical issues involved in delivering services, the pitfalls, lessons learned, and recommendations for the future so you can use the best ideas to implement in your own community and stop these individuals from reaching the streets. Homelessness Prevention in Treatment of Substance Abuse and Mental Illness provides insight into how to deal with many common issues that you are faced with every day, such as matching clients to appropriate services, preventing relapse, case management, training in independent living skills and money management, acquiring and maintaining housing, and benefits and employment for your disadvantaged clients. Compelling and informative, this unique book provides you with many tips and suggestions on how you can help the disadvantaged in our population avoid the added trauma of becoming homeless, such as: examining a new modified therapeutic community (TC) intervention program for mothers recovering from substance abuse who live with their children so you can learn to treat the family as a whole and not just treat the person with a “problem” gaining insight into a new intervention program for families caring for another family member with serious mental illness or substance abuse disorders so you can address such issues as the importance of respite for the family and home visits for relationship building among the entire household discovering a new, independent living model which allows clients with serious mental illnesses to select their own apartments learning about a new program in Philadelphia that offers support services to clients with serious mental illnesses and substance use disorders and provides several levels of housing from emergency shelter to highly supportive permanent housing discovering a community counseling center in Chicago that operates a “bank” that helps mentally ill clients or those with substance use disorders develop skills to independently manage their financial affairs through the use of “vouchers” that can be redeemed for cash for the payment of monthly bills Homelessness Prevention in Treatment of Substance Abuse and Mental Illness provides you with new insights into how you can help your clients overcome political, economic, and environmental barriers to treatment that can lead to homelessness. This essential book will help you improve your services to your clients as well as give you step-by-step guide to implement these new programs in your community.
