Living and working abroad. Sounds glamorous—and maybe it is, if you're posted to Hong Kong or Sydney. But what if your company sends you to Bangkok, Warsaw, or Manila? Many questions arise: Is it safe to go out at night? Do quality schools exist? How polluted is the air? Is public transportation handy? What's the average monthly rent for a decent house? What inoculations should you get before you go? Can you find your favorite brand of toothpaste? The *Global Manager's Guide to Living and Working Abroad: Eastern Europe and Asia* answers these and many other questions expats will have about the cities that companies send employees to most often in Eastern Europe and Asia, as well as Australia, New Zealand, and South Africa. Though the heart of the book is the city-by-city listing, it also includes tips on preparing for the move, dealing with culture shock, staying connected to the home front, understanding the psychological aspects of living abroad, country-specific business and social etiquette, and other topics of concern to workers sent abroad. The guide also includes information for corporate HR people: When a cost of living differential is appropriate and how to calculate it, how to obtain necessary work permits and visas, how to help employees stay as safe and secure as possible, and how to arrange for healthcare and insurance. Best of all, the information is up to date and comes right from the fresh research of Mercer—the consultancy many other companies turn to for advice and the latest facts regarding working and living conditions in all corners of the globe. That's why this book

Widening global inequalities make it difficult for parents in developing nations to provide for their children, and both mothers and fathers often find that migration in search of higher wages is their only hope. Their dreams are straightforward: with more money, they can improve their children's lives. But the reality of their experiences is often harsh, and structural barriers—particularly those rooted in immigration policies and gender inequities—prevent many from reaching their economic goals. *Sacrificing Families* offers a first-hand look at Salvadoran transnational families, how the parents fare in the United States, and the experiences of the children back home. It captures the tragedy of these families' daily living arrangements, but also delves deeper to expose the structural context that creates and sustains patterns of inequality in their well-being. What prevents these parents from migrating with their children? What are these families' experiences with long-term separation? And why do some ultimately fare better than others? As free trade agreements expand and nation-states open doors widely for products and profits while closing them tightly for refugees and migrants, these transnational families are not only becoming more common, but they are living through lengthier separations. Leisy Abrego gives voice to these immigrants and their families and documents the inequalities across their experiences.

exchanges in one's daily work. Participants and other beneficiaries of this internationalization include not only multi-national companies but also SMEs (small and mid-sized enterprises), for which the increased global market access offers substantial opportunities. With the growth of internationalization, too, comes an increase in employee assignments. In business practice, the number of questions from foreign companies, management, HR, tax and legal professionals, investors and non German employees etc., is growing. In order to be certain that sending employees to or from Germany on work assignments can take place as smoothly and efficiently as possible, relevant questions asked by companies and workers need to be taken into consideration. This text does just that with a focus on answering common expat-relevant questions posed by professionals. It is a reference work for those foreigners subject to and applying German law.
