In a world of increasing dependence on information technology, the prevention of cyberattacks on a nation's important computer and communications systems and networks is a problem that looms large. Given the demonstrated limitations of passive cybersecurity defense measures, it is natural to consider the possibility that deterrence might play a useful role in preventing cyberattacks against the United States and its vital interests. At the request of the Office of the Director of National Intelligence, the National Research Council undertook a two-phase project aimed to foster a broad, multidisciplinary examination of strategies for deterring cyberattacks on the United States and of the possible utility of these strategies for the U.S. government. The first phase produced a letter report providing basic information needed to understand the nature of the problem and to articulate important questions that can drive research regarding ways of more effectively preventing, discouraging, and inhibiting hostile activity against important U.S. information systems and networks. The second phase of the project entailed selecting appropriate experts to write papers on questions raised in the letter report. A number of experts, identified by the committee, were commissioned to write these papers under contract with the National Academy of Sciences. Commissioned papers were discussed at a public workshop held June 10-11, 2010, in Washington, D.C., and authors revised their papers after the workshop. Although the

authors were selected and the papers reviewed and discussed by the committee, the individually authored papers do not reflect consensus views of the committee, and the reader should view these papers as offering points of departure that can stimulate further work on the topics discussed. The papers presented in this volume are published essentially as received from the authors, with some proofreading corrections made as limited time allowed.

Clifford K. Berryman to engage students in a discussion of what Congress is, how it works, and what it does. It features the masterful work of one of America's preeminent political cartoonists and showcases his ability to use portraits, representative symbols and figures, and iconic personifications to convey thought-provoking insights into the institutions and issues of civic life. The House of Representatives and Senate take center stage as nationally elected officials work to realize the ideals of the Founders. This eBook is designed to teach students to analyze history as conveyed in visual media. The cartoons offer comments about various moments in history, and they challenge the reader to evaluate their perspective and objectivity. Viewed outside their original journalistic context, the cartoons engage and amuse as comic art, but they can also puzzle a reader with references to little-remembered events and people. This eBook provides contextual information on each cartoon to help dispel the historical mysteries. Berryman's cartoons were originally published as illustrations for the front page of the Washington Post and the Washington Evening Star at various dates spanning the years from 1896 to 1949. Thirty-nine cartoons selected from the more than 2,400 original Berryman drawings preserved at the Center for Legislative Archives convey thumbnail sketches of Congress in action to reveal some of the enduring features of our national representative government. For more than 50 years, Berryman's cartoons engaged readers of Washington's newspapers, illustrating everyday political events as they related to larger issues of civic life. These cartoons promise to engage

students in similar ways today. The cartoons intrigue and inform, puzzle and inspire. Like Congress itself, Berryman's cartoons seem familiar at first glance. Closer study reveals nuances and design features that invite in-depth analysis and discussion. Using these cartoons, students engage in fun and substantive challenges to unlock each cartoon's meaning and better understand Congress. As they do so, students will develop the critical thinking skills so important to academic success and the future health and longevity of our democratic republic.

"HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men.

On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, “The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science.”

This text traces the history of the civil rights movement in the years following World War II, to the present day. Issues discussed the Civil Rights Act of 1964, the Voting Rights of 1965, and the Northern Ireland ghetto's.

It was due the next day. We were out at our family cabin in Bolinas, and he was at the kitchen table close to tears, surrounded by binder paper and pencils and
